

PROFILE SUMMARY

Data Engineer with **over 5 years of experience** in developing and optimizing scalable data pipelines, ETL processes, and big data solutions. Proficient in Python, Java, SQL, and cloud platforms like AWS and Azure. Skilled in managing both relational and NoSQL databases, ensuring data accuracy and consistency across systems. Experienced in data integration, monitoring, and machine learning integration, with a strong background in compliance, data governance, and end-to-end pipeline development.

SKILLS

- Programming:** Python, Java, Scala, SQL
 - Data Warehousing:** AWS Redshift, BigQuery, Snowflake
 - Big Data:** Hadoop, Spark, Kafka
 - Databases:** MySQL, PostgreSQL, MongoDB, Cassandra
 - Data Modeling:** Data pipelines, ETL processes
 - Cloud Platforms:** AWS, Azure, Google Cloud
- Data Integration:** Apache Airflow, Apache NiFi, Talend
 - Pipeline Development:** Apache Beam, Flink, Luigi
 - Version Control:** Git, GitHub, Bitbucket
 - APIs & Microservices:** RESTful APIs, Docker, Kubernetes
 - Monitoring:** Prometheus, Grafana, Datadog
 - ML Integration:** TensorFlow, Scikit-Learn

WORK EXPERIENCE

DATA ENGINEER TOYOTA	01/2023 - Present
- Developed and maintained scalable data pipelines using Apache Kafka and AWS Data Pipeline, resulting in a 50% reduction in data processing time for large datasets - Integrated diverse data sources using Talend and Informatica, providing a single point of access to comprehensive data repositories, which improved data availability and consistency across departments. - Managed and optimized relational and NoSQL databases, such as PostgreSQL and MongoDB, leading to improvement in query performance and faster data retrieval times. - Implemented rigorous data validation and cleansing processes using Python and SQL, increasing data accuracy and reducing data-related errors in reports and analyses. - Collaborated with data scientists and analysts, leveraging Jupyter Notebooks and Tableau, which facilitated better data-driven decision-making and increased stakeholder engagement - Designed and implemented automated ETL processes using Apache Airflow and AWS Glue, reducing manual data handling by 60% and enabling real-time data updates. - Monitored and optimized data processing systems with Prometheus and Grafana, achieving a 35% reduction in system latency and higher throughput for critical applications. - Created and maintained detailed documentation using Confluence and ensured compliance with GDPR and CCPA, enhancing data governance practices and reducing compliance risks.	
DATA ENGINEER TRITECH SOFTWARE PVT.LTD	06/2018 – 05/2021
- Conducted comprehensive data analysis, addressing data migration, cleansing, transformation, integration, import, and export activities. - Spearheaded the design, development, and meticulous documentation of the ETL (Extract, Transform, Load) strategy, utilizing the Talend ETL tool to efficiently populate data from diverse source systems into the Data Warehouse. - Developed PL/SQL Stored Procedures, Functions, Triggers, Views, and packages to enhance database functionality and efficiency. - Implemented indexing, aggregation, and materialized views to optimize query performance, ensuring swift and accurate data retrieval. - Utilized R programming and Python to construct logistic regression models, enabling the prediction of subscription response rates based on a multitude of customer variables such as past transactions, response to prior mailings, demographics, interests, and hobbies. - Crafted Azure dashboards and reports for data visualization, reporting, and in-depth analysis, presenting actionable insights to the business. - Created end-to-end data pipelines for batch processing using Spark and Scala, facilitating efficient data processing.	

INTERNSHIPS

INTERN PLANET SPARK	06/2017 – 09/2017
- Implemented basic code to extract, validate, and ingest raw data, ensuring high data quality and seamless integration within the workflow. - Applied modification techniques to transform raw data into compatible formats, enhancing the usability of downstream data sources. - Contributed to the development of data tools for efficient data transformation, management, and access, improving overall data handling processes. - Validated code to enhance data storage and availability, increasing the resilience and reliability of data platforms. - Supported performance monitoring and optimization across the data pipeline, ensuring robust performance and reducing points of failure, while assisting in testing and improving product features.	

PROJECTS

Master's Project

Project: Data Lake Implementation and Optimization

Responsibilities:

- Designed and developed ETL pipelines to ingest data from multiple sources, ensuring efficient data transformation and integration.
- Implemented data storage solutions using Hadoop and Amazon S3, optimizing data retrieval and storage costs.
- Established data governance protocols, including data cataloging, lineage, and access control, to ensure data integrity and compliance with security policies.

Bachelor's Projects

Project 1: Real-Time Data Processing System

Responsibilities:

- Developed a real-time data processing system using Apache Kafka and Apache Spark to handle high-velocity data streams.
- Integrated various data sources and ensured seamless data flow between systems, reducing latency and improving processing efficiency.
- Implemented monitoring tools to track system performance and ensure reliability, including automated alerts for system failures.

Project 2: Cloud-Based Big Data Processing

Responsibilities:

- Deployed a big data processing framework using Apache Hadoop and Amazon EMR to handle large-scale datasets in the cloud.
- Implemented data ingestion pipelines to collect data from various sources, including IoT devices and social media platforms.
- Optimized storage and retrieval of data using HDFS and Amazon S3, ensuring cost-effective and scalable data management.

CERTIFICATIONS

- AWS Solutions Architect – Associate

EDUCATION

MASTER’S IN COMPUTER SCIENCE

LAMAR UNIVERSITY, BEAUMONT, TEXAS

YEAR OF PASSING: 2022

BACHELOR’S IN COMPUTER SCIENCE

JNTUH, INDIA

YEAR OF PASSING: 2018
