

SREE SNIGDHA TUMMALA

Allen, TX | (469)229-2485 | snigdha.t1909@gmail.com | <https://www.linkedin.com/in/snigdha-tummala-84391b118/>

Summary

A highly skilled Software Engineer with 4+ years of experience in enterprise Java development, designing and developing scalable and maintainable applications. Strong foundation in Computer Science fundamentals, including Data Structures and Algorithms. Extensive experience in building multi-tier, distributed web applications with AWS knowledge. Proficient in Java programming (Java 8 and above), J2EE, Spring Framework, Spring Boot, RESTful services, Hibernate, JPA, and database management using Oracle and NoSQL. Experienced in Test-Driven Development, Continuous Integration, performance tuning, and caching solutions. Adept at debugging, scripting, problem-solving, and technological adaptability. Open to constructive criticism and thrives in an Agile environment, contributing to IT solutions.

Skills

- Methodology: SDLC, Agile, Waterfall, SOLID principles, Test-Driven Development, Scrum, Pair Programming.
- Databases: Oracle, PL/SQL, MySQL, PostgreSQL, MongoDB (NoSQL), DynamoDB.
- Languages: Java (Java 8 and above), SQL, Python, C, JavaScript, Shell Scripting.
- Architecture: Monolithic, Microservices, MVC Architecture.
- Frameworks: Spring (Spring Boot, Spring Data, Spring MVC, Spring Security), JPA, Hibernate, RESTful API development, log4j, Mockito.
- Cloud Technologies: AWS (Lambda, EC2, S3, IAM, VPC, ECS, Elastic Beanstalk), Cloud Management & Administration.
- Web Technologies: RESTful services, JSON, XML, HTTP, SSL, TCP/IP, Web Development.
- Testing & CI/CD: JUnit, TestNG, Mockito, Postman, Jenkins, Git, Bitbucket, GitLab.
- Logging & Monitoring: Splunk, ELK Stack.
- Operating Systems & Servers: Windows, Linux, MacOS, JBoss, WebSphere, Operating System management.
- Automation & Infrastructure Management: Ansible, Terraform, Docker, Kubernetes, Software Engineering Automation.

Work Experience

Kingston Technologies Inc., Principle Software Engineer

Mar 2024 – Current

- Designed and implemented RESTful API services using Java 11+ and Spring Boot, ensuring efficient data retrieval and processing.
- Developed and integrated APIs with complex data models, utilizing JUnit and Mockito for unit testing, achieving 98% test coverage.
- Engineered a distributed caching mechanism, reducing service latency by 90% and improving throughput by 40%.
- Built microservices-based applications deployed on AWS, leveraging AWS Lambda, DynamoDB, and S3.
- Led the development of low-latency service APIs and data aggregation pipelines.
- Optimized application performance tuning through caching strategies and SQL query optimizations in Oracle databases.
- Implemented JPA and Hibernate for efficient database interaction with relational and NoSQL databases.
- Applied Test-Driven Development (TDD) and Continuous Integration (CI/CD) principles using Jenkins and Terraform.
- Applied proper syntax validation techniques to ensure API request and response formatting adhered to industry standards.
- Troubleshoot and resolved critical performance issues in distributed applications.
- Collaborated with cross-functional teams, effectively communicating design decisions, developing applications and technical solutions.
- Contributed to talent development by mentoring junior engineers and promoting best practices.

ACCENTURE SOLUTIONS INDIA, Software Engineer I

Nov 2021 - Aug 2022

- Developed enterprise applications using Java 8, J2EE, Spring Framework, Spring Boot, JPA, Hibernate, and RESTful web services.
- Designed and optimized JSON and XML-based APIs for data communication between services.
- Implemented role-based access control with Spring Security and JWT authentication.
- Designed database schemas and optimized query performance for Oracle and NoSQL databases.
- Created API gateways for secure and scalable communication between services.
- Applied Test-Driven Development using JUnit and TestNG, ensuring robust unit testing.
- Worked on performance tuning and caching solutions to enhance system responsiveness.
- Debugged complex system issues and provided automation solutions for recurring problems.
- Effectively communicated with stakeholders to ensure project alignment with business goals.

INFOSYS LIMITED INDIA, Software Developer

Sep 2019 - Oct 2021

- Developed and deployed containerized applications using Docker and Kubernetes.
- Designed scalable microservices architecture with Java, J2EE, Spring Boot, and RESTful API development.
- Implemented caching strategies to optimize application performance and enhance response time.
- Managed AWS-based cloud infrastructure and automated deployments using Terraform and Ansible.
- Developed APIs for seamless data integration and processing across distributed systems.
- Utilized JPA and Hibernate for database interactions, ensuring efficient data persistence.
- Applied problem-solving skills to diagnose and resolve critical production issues.
- Engaged in cross-functional collaboration to refine IT solutions and ensure effective delivery with strong Problem solving skills.
- Encouraged openness to criticism by participating in Agile retrospectives and team discussions for process improvement.

Education

California State University, San Bernardino – MS Degree in Computer Science

Aug 2022 – Dec 2023
