

SRI SAI JAHNAVI IMANDI

Charlotte, NC | Open to relocate

(980) 318-7862 | imandi.jahnavi28@gmail.com | [linkedin](#)

Data Analyst with a Master's degree and hands-on experience using **SQL, Excel, and Power BI** to analyze operational, financial, and customer data. Skilled in **data validation, anomaly detection, KPI reporting, and documentation**, with strong attention to detail and interest in **risk, controls, and audit analytics**. Experienced supporting stakeholders with accurate, well-governed data insights.

Education

University of North Carolina at Charlotte — Master of Science in Information Technology (Emerging Technologies) | Dec 2025

Marri Laxman Reddy Institute of Technology and Management — B.E. in Electronics & Communication Engineering | May 2024

Core Skills

Analytics & BI: SQL querying & data extraction, Excel (Pivot Tables, Lookups, Data Validation), Power BI (Dashboards, KPIs, Trend Analysis), Data profiling & anomaly identification

Audit & Risk Support: Data integrity & quality checks, Control testing support (data-driven), Documentation & audit-ready reporting, Assumption validation & reconciliation

Professional: Technical documentation, Stakeholder reporting, Process improvement mindset, Detail-oriented & deadline-driven

Project

Financial & Performance Reporting Analysis

Excel, Power BI

- Built reports comparing **planned vs actual performance** to identify variances and exceptions.
- Performed **data validation and reconciliation** to ensure reporting accuracy and reliability.
- Delivered audit-ready dashboards and summaries for non-technical stakeholders.

Customer Segmentation & Retention Analysis

SQL, Excel, Power BI

- Queried and analyzed large datasets using SQL to identify **patterns, outliers, and behavioral trends**.
- Applied structured analysis to segment customers and highlight **risk and opportunity indicators**.
- Designed Power BI dashboards emphasizing clarity, traceability, and data integrity.

Marketing Performance & Audience Insights Analysis

SQL, Excel, Power BI

- Extracted and consolidated datasets from multiple sources for analysis.
 - Identified **anomalies, underperformance, and trend shifts** across time periods.
 - Documented metrics, assumptions, and data definitions to support repeatable analysis.
-

Analytical & Audit-Support Contributions

- Validated datasets for **accuracy, completeness, and consistency** prior to analysis.
 - Documented **data sources, assumptions, and analytical procedures** to support audit review.
 - Supported recurring analytics and reporting used for **control monitoring and decision support**.
 - Identified opportunities to **streamline reporting and improve efficiency**.
-

CERTIFICATIONS

- AWS Academy — Data Engineering
- Associate Data Analyst — DataCamp
- Associate Data Engineer — DataCamp
