EXPERIENCE & KEY PROJECTS

MiMinions.ai – Market Research Analysis	Sept 2023 – Dec 2023
• Developed tailored pricing solutions, and devised user-friendly features to enhance the truck driver experience and utilized strategic analysis to inform app enhancements. • Derived app enhancement recommendations by conducting SWOT, PESTLE, and Porter's Five forces analysis. • Delivered customized pricing solutions for shipments by conducting competitor analysis.	
Prolifics	Jul 2023 – Sept 2023
• Predicted fraudulent transactions using company's historic data and company's outsourced data by implementing Random Forest Machine Learning model. • Trained the model using a Flask API, which can be used to check/predict if a transaction is fraudulent and it offers real-time transaction authentication to preemptively identify and flag potential fraud. • Derived insights on the number of fraudulent transactions in each state of India through Visualizations.	
Expedia.com - Customer Analytics use case to Improve Customer Bookings	Sept 2022 – Dec 2022
• Developed an algorithm to predict the booking trends for the customers from an Expedia Hotels data set which was a part of American Statistical Association data fest (ASA). • Designed and implemented prediction models achieving over 97% accuracy using Logistic Regression, and further optimised the model with Ridge and Lasso Regularisation.	
IBM, Study on Employee Attrition & Performance	Oct 2021- May 2022
• Led a retention analytics program and identified the drivers of employee attrition key factors, and created an analytics toolset to predict at-risk employees by using Random Forest for feature selection. • Communicated insights to stakeholders by employing advanced data visualisation techniques using seaborn, including correlation heat maps, violin plots, and facet grids.	
Mentormind - Uber	Jul 2021-Sept 2021
• Performed detailed analysis of skill and labor market to identify challenges affecting Uber's growth by leveraging LinkedIn for skill mapping. • Developed a scalable analytical model for profile matching, integrating various data streams to enhance accuracy and efficiency. • Generated detailed reports for executive management, providing data-driven insights and strategic recommendations to address workforce challenges and support the company's growth objective by conducting a comprehensive analysis.	
CTEL Infosystems	Apr 2021 – Jun 2021
• Assessing and evaluating existing HR processes, identifying areas of improvement by conducting interviews and discovery sessions. • Understanding of HR operations by utilising a range of structured and semi-structured tools to collect and analyse data from multiple sources. • Published a whitepaper that outlined HR market analysis, trends, functioning, and recommendations.
