EDUCATION

New York University

Masters of Science in Computer Science | GPA: 3.852/4.0

New York, USA

Sep '24 - Present

Delhi Technological University (DTU)

Bachelor's of Technology in Computer Engineering | GPA: 8.65/10.0

New Delhi, India

Dec '20- May '24

EXPERIENCE

[TestGrid.io](#)

New York, USA

Software Engineering (Backend) Intern

Jun '25-Aug '25

- **Engineered a FastAPI**-based metadata API, deriving test dependencies from semantic tags and modules
- Modeled test dependencies using a **Directed Acyclic Graph (DAG)** and applied topological sorting to determine execution order. The **API returned JSON schedules** to TestGrid, with endpoints verified **via Postman**
- Leveraged LLMs for semantic extraction and dependency inference, **automating scheduling for test cases**
- Analyzed runtime data to evaluate test flakiness and isolated unstable tests. Returned grouped JSON schedules to TestGrid and verified all API endpoints using Postman

[Airtel](#)

Gurugram, India

Software Engineering (Backend) Intern

Jun '23 – Aug '23

- **Implemented** Spring Boot microservices, optimizing Kafka Listener configuration to **reduce latency** and leveraging priority queues to **cut execution delay**
- Enabled **faster local deployment** cycles and **improved QA feedback turnaround** by containerizing and orchestrating Kafka and Elasticsearch with Docker Desktop
- **Increased data consistency validation coverage** through collaborative integration of microservices with relational databases in a 5-engineer Agile team

PROJECTS

Personal Finance Manager | [Github](#)

- **Architected** a high-performance desktop finance application with **5** integrated modules and BCrypt-secured authentication, optimized for **2,000+** transactions with near-zero latency, ranking among the most efficient class
- **Structured** a high-performance SQLite schema with 5 relational tables and applied HikariCP for connection pooling, **accelerating query execution by 60%** across 1000+ transaction records
- **Delivered** intuitive financial dashboards with pie, bar, and line charts, enabled CSV exports for offline reporting, and applied MVC architecture to ensure maintainability and **60%+ UI responsiveness** across screen sizes

Streaming Wars – Multi-Dimensional Analysis of OTT Platforms | [Github](#)

- **Constructed** an interactive dashboard exploring 10,000+ movies from Netflix, Hulu, Prime Video, and Disney+ to reveal genre preferences and shifting market dominance
- **Incorporated** platform and genre-based filters with responsive **Altair** visualizations, enabling real-time exploration of Rotten Tomatoes ratings (**2000–2021**)
- **Revealed key insights**, including Netflix's rise to **66% market share** and Disney+ maintaining **70% higher average ratings** in Action/Sci-Fi; ensured smooth interactivity by resolving missing data and format inconsistencies

NutriScan- AI-Powered Nutrition Assistant (HCI Project) | [Article-link](#)

- **Designed and launched** a Flutter-based cross-platform app with **100%** code reusability, integrating **Google Gemini AI** for accurate food analysis
- **Generated** 300-word nutritional reports and contextual “eat/avoid” guidance across iOS and Android
- **Crafted advanced personalization systems** for dietary advice and 150-word micro-workouts tailored to 5+ user-specific inputs (allergies, health conditions, fitness goals)
- **Navigated and resolved** 5+ technical barriers (camera permissions, JSON parsing, AI calibration) while **envisioning future enhancements** like AR overlays and IoT integration for real-time health tracking

SKILLS

Languages and Databases: Python, Java, JavaScript, MySQL, MongoDB

Frameworks and Libraries: Spring Boot, Node.js, JavaFX, Pandas, Altair, Seaborn

Technologies: REST APIs, Fast API's, JSON, Kafka Messaging, JDBC, Docker, Cursor AI

Tools: Postman, IntelliJ, VS Code, Jira, Git, Docker Desktop, Figma, Flutter

Certifications: [Python](#) - Google, [React Basics](#) - Meta, [Process Data from Dirty to Clean](#) - Google, [Blockchain Technology](#) -INSEAD

STUDENT LEADERSHIP & IMPACT

As Director of Community Services and PR Head, led Rotaract Club initiatives at DTU. **Executed over 10 large-scale events with 1,000+ attendees** and collaborated with NGOs to positively impact more than 500 individuals. **Boosted engagement by 60%** through strategic social media campaigns.
