LINKEDIN: [SUPREME POKHREL](#) | GITHUB: [SUPREMEPOK](#)

Education

University of North Texas

Jan 2025 – Dec 2026 (Expected)

Master of Science (M.S) Advanced Data Analytics

New Horizon College of Engineering

Aug 2019 - May 2023

Bachelor of Engineering (B.E) Computer Science

Research and Publication

Study and Application of Decentralized System and AI in Metaverse (2022). [Link](#)

Work Experience

Subhakaarya

May 2023 – Sept 2024

Developer

- Increased event engagement 25% via client segmentation and behavioural analysis.
- Cut costs 15% through vendor and process optimization.
- Built Python-based automation tools and web dashboards for operations monitoring and client insights.

Digiigo Technologies Pvt. Ltd.

Nov 2022 – April 2023

Software development intern.

- Developed interactive Streamlit dashboards integrating multiple data sources, reducing client decision-making time by 30%.
- Led data migration and visualization projects for retail digitalization initiatives.
- Collaborated with cross-functional teams to translate business requirements into scalable technical solutions.

Skills

Familiar with: Google Cloud Platform | Data Analytics | Data Visualization | Tableau | Android app development | C | C++ | Java | Python | Linux | Streamlit | MySQL | Cassandra | HTML | CSS

Projects

Key Factors Affecting Transportation Expenses Among International Students in Denton

A data analytics project conducted as part of ADTA 5130 at University of North Texas

- Designed and implemented multiple regression models using survey data from 100+ students to identify cost predictors.
- Performed One-Way and Two-Way ANOVA and constructed multiple regression models to predict cost predictors.
- Vehicle ownership found to raise costs 3× through inferential statistical analysis.

Data-Driven Crime Analysis: Evaluating County-Level Violent Crime Trends in California

A cloud-based data science project using Google Cloud Platform and BigQuery

- Analysed 13 years of California crime statistics (2M+ records) using BigQuery and SQL for large-scale data processing.
- Engineered features and identified regional anomalies through statistical pattern recognition.
- Collaborated in a 5-member team, managing project planning, cloud setup, and documentation across GCP services.

Virtual Assistance for Visually Impaired Person using YOLO

A Deep Learning based Android application built on Android studio using YOLO

- Built a low-cost Android app using YOLO for real-time object detection and voice feedback.
- Implemented voice feedback system enabling indoor/outdoor navigation for visually impaired users.

Academic and Extracurricular Activities

- Certified: IBM Data Science, NPTEL Cloud Computing, Brillio Data Analytics.
- IEEE Conference Presenter: AI & Decentralized Systems in Metaverse.
- Volunteer: JCI Bhadrapur, University admissions mentor.
- Workshops: Ethical Hacking Bootcamp, Microsoft 365 Fundamentals.
