

SURAJ GODSE

Software Engineer

IL | 708-232-8791 | suraj.g@itjobinbox.com | [GitHub](#) | [Linkedin](#)

SUMMARY

Software Engineer with 4 years of experience building and scaling full-stack web applications across frontend, backend, and cloud environments. Strong expertise in React.js, TypeScript, Node.js, Express, and Django, with a proven ability to deliver responsive user interfaces, secure REST APIs, and production-ready systems. Hands-on experience deploying containerized applications on AWS using Docker, ECS, EC2, and CI/CD pipelines, improving release efficiency and frontend performance. Skilled in database design and optimization using PostgreSQL, MongoDB, and MySQL, supporting user-facing applications while improving API responsiveness and system reliability. Known for writing clean, maintainable code, collaborating effectively with cross-functional teams.

SKILLS

Frontend Development: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Component-Based UI Development, State Management (Hooks, Context API), Basic UI/UX Principles, Cross-Browser Compatibility

Backend Development: Node.js, Express.js, Django, RESTful API Development, Server-Side Application Architecture, Authentication & Authorization (JWT, Sessions), CRUD Operations, Middleware Implementation

Programming Languages: JavaScript, TypeScript, Python, Java, C++

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Firebase, Database Design & Optimization

Cloud & Backend Services: AWS (EC2, S3, Lambda, Elastic Beanstalk, DynamoDB, ECS), Google Cloud Platform (GCP), Firebase

Cloud & DevOps: Docker, Kubernetes, CI/CD Pipelines, Linux, Bash Scripting, Git, Bitbucket, Jira

API & Integration: REST APIs, API Integration, Client-Server Communication, JSON Data Handling, Error Handling

Tools & Technologies: GitHub, Version Control Systems, Debugging & Performance Optimization, Environment Configuration, Full-Stack Application Development, Power BI

Microsoft & Development Tools: Microsoft Word, Excel, PowerPoint, Teams, Outlook, Visual Studio IDE, Microsoft Project

Certifications: AWS Certified Developer, JavaScript MERN Full Stack, Python with Data Structures & Algorithms, Databases, and Data Science

EDUCATION

Masters in Computer Science
Illinois Institute of Technology Chicago

May 2025

EXPERIENCE

ServiceNow, IL | Software Engineer

Nov 2024 - Current

- Developed and maintained React.js and TypeScript frontend modules, using Hooks and Context API to manage state and improve component reusability, reducing UI defects by 25% and improving delivery speed for 5+ internal applications.
- Built and integrated RESTful APIs using Node.js and Express, implementing JWT-based authentication and middleware for validation, increasing API reliability by 30% and reducing security incidents to zero.
- Optimized frontend performance by refactoring component lifecycles and minimizing unnecessary re-renders, resulting in 30% faster page load times and improved user engagement metrics across 3 key internal apps.
- Containerized backend services with Docker and deployed to AWS EC2 and ECS, reducing environment-related deployment issues by 40% and enabling consistent staging and production workflows.
- Integrated AI-powered features using Large Language Models (LLMs) and OpenAI APIs, automating text analysis and summarization, cutting manual processing time by 50% across internal workflows.
- Implemented prompt engineering, response validation, and fallback mechanisms for AI outputs, improving accuracy and consistency of AI-generated responses by 35%, enhancing trust in AI-driven internal tools.

Infinite Infolab, India | Software Engineer

Sep 2020 – July 2023

- Designed and developed full-stack web applications using React.js, Node.js, and Django, delivering production-ready features aligned with client requirements and business workflows.
- Built scalable REST APIs and implemented CRUD operations with PostgreSQL and MongoDB, improving data consistency and supporting applications with 10k+ active users.
- Developed responsive UIs using HTML5, CSS3, Tailwind CSS, and modern JavaScript, achieving 100% mobile responsiveness across supported browsers and devices.
- Integrated third-party APIs and Firebase services for authentication, notifications, and real-time data sync, reducing custom backend complexity and accelerating feature rollout.
- Improved database performance by optimizing queries and indexing strategies, reducing average API response times by ~35% under production load.
- Deployed and maintained applications on AWS (EC2, S3, Elastic Beanstalk) and GCP, ensuring high availability and secure access control for client-facing systems.
- Actively participated in code reviews, debugging, and performance optimization, raising overall code quality and reducing post-release production issues without increasing development timelines.

PROJECTS

Smart Home - AI-Powered E-Commerce ([GitHub](#))

- Built a scalable React frontend and Node.js backend platform with 15+ REST APIs, implementing JWT authentication for 3 user roles.
- Engineered an AI-powered customer service system using OpenAI's GPT-4 API for automated ticket classification and damage assessment through image analysis, reducing response time to 30 seconds with 90% accuracy in testing.
