Summary

Python Developer with over 4 years of experience in crafting tailored software solutions and SaaS Products. Experienced in both backend and frontend development, alongside a keen focus on architectural and scalability. Skilled in Backend, Frontend Development, Web Scraping Automation, DevOps practices and tool chains.

Technical Stack / Skills

- **Backend:** Django, Flask, FastAPI
- **Web Scraping:** Scrapy, Splash, Selenium, BeautifulSoup
- **AWS:** EC2, RDS, VPC, S3, Lambda, SES, Cloud Watch
- Docker, Github Actions, CI and CD pipelines
- Databases: PostgreSQL, Mongo DB
- Linux system administration and troubleshooting
- Working and Theoretical Understanding of Kubernetes, Jenkins and Shell Scripting
- RabbitMQ, Celery workflows

Experience

Independent Freelancing - 03/2025 to Present

Stack: Scrapy, Django, FastAPI, Docker

Backend, Web Scraping, Self-Learning

- Building a web scraping solutions.
- Backend Development, Deployment.

Webfriend (Remote) – 03/2024 to 04/2025

Stack: Scrapy, Django, FastAPI, Docker, AWS

Python Developer (Hornsby, New South Wales)

- Backend development deployment.
- Setting up new applications on AWS, creating a deployment pipeline for several projects.

Fetchly Labs (Remote) – 09/2022 to 03/2024

Stack: Django, Flask, Rails, NextJs, AWS, Docker

Python Developer (Austin, Texas Metropolitan Area)

- Communicating with clients to understand the requirements, convert them into sprint stories.
- Backend APIs, Server Maintenance and Setup, CI setup and frontend integration.
- Scripting and automation, for extracting and updating data to different sub systems.
- Improving data fetch and synchronization to external shopify applications.
- Backend performance tuning with caching, indexing, custom queries.

Projects:

- Offline first mobile app used in remote areas by the nurse / care provider for elderly peoples. (React Native, Flask)
- Mobile application developed for hearing test assessment.
- ACH and DRAFT payment processing system build with Rails and react.
- Measurement tool build on top of google maps and custom street view panorama to measure the wires and estimate the raw materials for construction of electrical grid lines. (Django, MATLAB, React, Nextjs)
- Automated minor repetitive and complex bug testing scenario for rails project using selenium ide.
- Custom shopify extension development on top of shopify theme with react, Django, celery.

RPALabs (Remote) – 01/2022 to 06/2022

Stack: Django, Flask, FastAPI, AWS (Lambda, SES, S3, EC2, VPC)

Python Developer (Louisville, Colorado, US)

- Setting up cloud resources for integration (Lambda, SES, and S3) on aws internal VPC for newly created backend services.
- Debugging micro services written in core python stack to figure out and test a buggy scenario.
- Making sure legacy system can still respond to user queries while migrating to a new systems.
- Creating data migration scripts, gathering sources from nosql, sql database and injecting them on new micro services.
- Hiring and mentoring a dedicated team focusing on migrating and rewriting a legacy codebase.
- Improved document processing time by splitting workload on a celery based worker responsible for NER recognition from a large pdf page.

Semesterone (Remote) – 10/2020 to 01/2022

Lead Python Developer (Hornsby, New South Wales)

- Maintaining web scraper used to collect university and courses data from different sites.
- Integrating the REST APIs build with Django to a front facing UI components build with react.
- Migrated application from Digital Ocean to AWS preserving user upload assets, database, setup cloud resources and proper CI pipeline.
- Backend performance tuning with caching, indexing, custom queries.

Kodiary Technologies (Hybrid) – 06/2020 to 10/2020

Python Developer, (Jawlakhel, Lalitpur)

- Implementing the data models and backend logics as per the supervision of senior developer.
- Ensuring the test case coverage of every module written.
- Participating in the everyday standup meeting, planning and reporting the sprints and backlogs.

Cosmio Infotech Private Limited (Onsite) – 01/2020 to 06/2020

Django Developer, (Koteshwor, Lalitpur)

- Supporting the maintenance of existing codebase for logistic and delivery management software.
- Development of data models, server-side backend logics.
- Deployment and maintenance of the servers running applications on Digital Ocean cloud servers.
- Interacting and communicating with clients to collect and understand the requirements.
- Leading a team of developers working on in-house full stack products including restaurant, management and erp solutions.

Personal Projects:

- Nepse web scraper: Built with scrapy, selenium grid setup on Kubernetes with 4 chrome node and a single hub node. [Github](#)
- Sample Deployment of Django running docker containers with stateful, stateless and persistent volume on local minikube with Jenkins Pipeline. [Github](#)
- Telephonic Bot integrated with twilio numbers built using Whisper Speech to Text and FastAPI web sockets. [Github](#)
- Daraz Smart Phones Crawler as a Managed Services with REST APIs integrated with Django. [Github](#)
- Real-time messaging web application built with Django channels web socket consumer and React Frontend. [Github](#)
- Single Sign On authentication scheme implementation with single SSO server and 2 different clients. [Github](#)

Education

Kathford International College of Engineering and Management – 2016 to 2020

Bachelors of Engineering, Computer Engineering

- Electives: Data Mining, Agile Software Development Methodology, GIS
- Major Project: Digital Attendance Using Speaker Recognition (Web Dashboard and Training Module for Speaker)
- Member of KATHFOSS open-source society.
- Volunteered on a National Hackathon Event Organized by KATHFOSS open-source society.

Glacier International College – 2014 to 2016

Physical Science, HSEB

- Basic Physics, Chemistry, Mathematics and Computer Science

Certificates / Courses

DevOps Bootcamp Course – 1/2025

NSSNetSysSoft, [Course Completion Certificate](#)

- Using DevOps Tool Chains: Git, Docker, Shell Scripting, Docker, Kubernetes.
- Kubernetes Pods, Services, Deployment, Replicasets, Job, Config, PV, PVC.
- Deploying a Django Project to Kubernetes cluster in a minikube with postgres and a redis stateful services with persistent volumes for stateful services and static, media.
- Understanding Basic AWS Resources: EC2, S3, Lambda, VPC, Auto Scaling Target Group and Load Balancer.
- Using Jenkins to build a docker container, push it to registry and trigger Kubernetes deployment.
- Setting up and using Prometheus, Grafana to monitor pods and containers on Kubernetes.

Python Concurrency Simplified – 11/2024

Udemy, [Course Completion Certificate](#)

- Fundamentals of Process, Threads.
- Understanding of pitfalls of concurrencies: Data Race, Consistency, Dining Philosopher Problem
- Using Various Primitives: Locks, Semaphores, and Values to avoid issues.

Modern Web Scraping with Python Using Scrapy Splash Selenium – 12/2021

Udemy, [Course Completion Certificate](#)

- Fundamentals of XPaths, CSS selectors.
- Using proxies to prevent the request blocking.
- Using selenium and splash tools to scrape the sites with no pre-rendered HTMLs.
- Deploying spiders as a managed service.

SQL and MySQL for Beginners – 11/2021

Udemy, [Course Completion Certificate](#)

- Learned the basics of DML, DDL and DCL with SQL.
- Performing Joins, Sub Querying to retrieve data from more than two tables.
- Creating views, triggers and stored procedures.
- Using aggregate functions and operators to retrieve and analyze the data.
- Writing a pipelines to preprocess the scraped items and store in external databases.

Python Data Structures A to Z – 01/2020

Udemy, [Course Completion Certificate](#)

- Basics and usage of python native data structures, List, Sets, Dictionaries, Tuples and strings.
- Implementing Queues, Stacks, Heaps and Binary Search Trees with python native data structures.

Ruby On Rails Foundation

Udemy, [Course Completion Certificate](#)

- Basics of ruby data structure, conditionals.
- Rails Active Record ORM, restful resources, rspec.
- Rails templating, forms and MVC.
- Deploying rails application on Heroku, self-hosted container service dokku on AWS.
