

Susmitha Banoth

Full Stack Java Developer

San Antonio, TX, USA | (945) 257-9460 | susmithabanoth@outlook.com | [LinkedIn](#)

SUMMARY:

- Accomplished Full Stack Java Developer with over 4 years of hands-on experience in designing, developing, and deploying complex web applications and microservices, leveraging a robust knowledge of Java, Spring Boot, and AWS cloud solutions to deliver high-performance, scalable, and secure software systems.
- Experienced in Microservices Architecture, enabling independent scalability, efficient resource utilization, and enhanced fault tolerance using Spring Cloud, Docker, and Kubernetes.
- Expert in Cloud Technologies, deploying and managing backend services on AWS (Lambda, API Gateway, S3, RDS) and Azure (Functions, App Services) to optimize performance and cost efficiency.
- Skilled in CI/CD Automation, implementing pipelines with Jenkins, GitLab CI/CD, and Maven, ensuring seamless integration, testing, and deployment.
- Agile & DevOps Practitioner, collaborating in Scrum teams, actively participating in sprint planning, code reviews, and utilizing system reliability monitoring tools (ELK, Prometheus, Grafana).
- Database Management Expertise, working with MySQL, PostgreSQL, and MongoDB, optimizing queries, indexing strategies, and stored procedures for high-performance data processing.
- API Integration & Third-Party Services, seamlessly integrating external APIs, payment gateways, and messaging services like RabbitMQ and Kafka to ensure smooth data exchange across distributed systems.

SKILLS:

Languages: Java, Python, JavaScript, Typescript, SQL, C, C++

Frameworks: Spring Boot, Hibernate, Struts, Express.js, Node.js, Django, Spring Data JPA

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap, Angular, React.js, Tailwind CSS

J2EE Technologies: Servlets, JSP, JUnit, JMS, Multi-threading, EJB, JavaBeans, JSF, Generics, Concurrency, and Collections

Databases: MySQL, PostgreSQL, MongoDB, Oracle, Cassandra

Microservices & APIs: RESTful APIs, SOAP APIs, GraphQL, Microservices Architecture

Cloud Platforms: AWS (EC2, S3, Lambda, CloudFormation), Microsoft Azure

Containerization: Docker, Kubernetes

CI/CD: Jenkins, GitLab CI/CD, Travis CI

Version Control: Git, GitHub, GitLab

Cloud Deployment: AWS Elastic Beanstalk, Heroku, Azure App Services

Agile Tools: Jira, Confluence, Trello

Testing: JUnit, Mockito, Selenium, Postman

Other Tools: Maven, Jenkins, Postman, Swagger, Gradle

IDE's: Eclipse, Visual Code, Notepad++, NetBeans, Dream Viewer

Development Methodologies: Agile (Scrum, Kanban), Test-Driven Development (TDD), DevOps practices

Serverless Architectures: AWS Lambda, Azure Functions

Cloud-Native Solutions: Microservices, Event-Driven Architectures

Security: OAuth2, JWT, API Security Best Practices

EXPERIENCE:

Clairvoyant, TX | Full Stack Java Developer

Aug 2024 – Present

- Spearheaded the design and development of a microservices-based architecture using Spring Boot, Docker, and Kubernetes. This resulted in a 30% improvement in application scalability and fault tolerance, with deployments to AWS EKS clusters.
- Architected and implemented AWS-based solutions using EC2, S3, RDS, Lambda, and CloudFormation, reducing infrastructure costs by 25% and improving system uptime by 40%.
- Developed RESTful APIs and blended third-party services, ensuring secure and efficient data transmission, contributing to a 20% increase in application performance and reliability.

- Led a team of developers in building highly responsive, user-friendly front-end interfaces using Angular and React, improving user engagement and reducing page load times by 35%.
- Automated CI/CD pipelines using Jenkins and AWS Code Pipeline, reducing deployment times by 50% and minimizing manual intervention in the release process.
- Enhanced security protocols by implementing OAuth2 and JWT for user authentication and AWS IAM policies, ensuring compliance with data protection regulations and improving data security by 40%.
- Conducted performance tuning and optimization of database queries in MySQL and MongoDB, resulting in a 30% reduction in query execution times and improved application responsiveness.
- Collaborated with cross-functional teams to refine product requirements and deliver solutions that exceeded client expectations, contributing to a 20% increase in customer satisfaction.
- Provided mentorship and guidance to junior developers, fostering a culture of continuous learning and professional development within the team.

CueTech Systems, India | Full Stack Java Developer

Apr 2019 – Aug 2022

- Designed and developed scalable backend systems using Java, Spring Boot, and Hibernate, ensuring modularity, maintainability, and high performance to meet evolving business demands.
- Built and integrated RESTful & SOAP APIs, enabling seamless communication between distributed systems, improving interoperability, and enhancing user experience.
- Led migration from a monolithic architecture to Microservices, leveraging Spring Cloud, Docker, and Kubernetes, which improved system agility and reduced time-to-market by 30%.
- Deployed backend services on AWS and Azure, utilizing EC2, Lambda, API Gateway, and Azure Functions, leading to a 35% reduction in infrastructure costs and improved scalability.
- Implemented automated testing frameworks using JUnit and Mockito, achieving high test coverage, reducing production defects, and ensuring reliable software releases.
- Managed containerized applications with Docker & Kubernetes, optimizing deployment pipelines, achieving seamless scaling, and reducing infrastructure overhead by 30%.
- Merged third-party services and APIs, including payment gateways and messaging systems (RabbitMQ, Kafka), leading to a 25% increase in feature adoption and customer satisfaction.
- Conducted code reviews and enforced best practices, improving code quality, reducing technical debt, and ensuring maintainability across the development team.
- Developed comprehensive technical documentation, covering system architecture, API specifications, and deployment guides, streamlining knowledge transfer and maintenance efforts.
- Stayed up-to-date with emerging Java and cloud technologies, proactively integrating best practices and innovative solutions to enhance software reliability and performance.

EDUCATION

Master's Degree in Information Technology and Management

Aug 2022 – Oct 2024

Webster University, San Antonio, TX

Bachelor's Degree in Mechanical Engineering

Jul 2017 – Aug 2021

Chaitanya Bharathi Institute of Technology, Hyderabad, India
