

SUSMITHA KALLI

P: (572)208-0615 | E: susmithatech17@gmail.com | www.linkedin.com/in/susmithakalli

PROFESSIONAL SUMMARY

Data Analyst with **3+ years of hands-on experience** delivering data-driven solutions across **healthcare and banking** domains through academic and real-time project work. Strong expertise in **SQL, Python, Power BI, Tableau, Excel, ETL pipelines, Data Cleaning, Data Modeling, and Statistical Analysis**. Proficient in analyzing large datasets, generating actionable insights, developing interactive dashboards, and supporting business decisions using **Snowflake, AWS, Azure, and advanced Excel**. Experienced in collaborating with cross-functional stakeholders, validating data quality, and automating reporting processes for improved efficiency. Adept at leveraging **NumPy, Pandas, Matplotlib, Seaborn**, and BI tools to translate complex datasets into meaningful business insights.

TECHNICAL SKILLS

Data Analytics & BI Tools: Tableau, Power BI, Excel (Pivot Tables, Power Query, VLOOKUP), Google Data Studio, SQL Developer, Jupyter Notebook

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), R (Basics), SQL (Joins, CTEs, Window Functions)

Databases & Cloud: MySQL, PostgreSQL, Snowflake, MS SQL Server, AWS S3, Azure Data Lake

Data Engineering Tools: ETL Pipelines, Airflow (Basic), SSIS, Snowpipe

Data Modeling & Processing: Star Schema, Snowflake Schema, Data Cleaning, Data Wrangling, Feature Engineering

Version Control & DevOps Tools: Git, GitHub, Jira, Confluence

PROFESSIONAL EXPERIENCE

Data Analyst – Fifth Third Bank, Kentwood, MI | January 2025 – Present

Project: Customer Transaction Behavior Analytics (Banking Analytics)

- Analyzed customer transaction patterns using **Python Pandas** and **SQL Server** to detect trends in deposits, withdrawals, and digital usage.
- Built automated **Power BI dashboards** for loan delinquencies, NPAs, account growth, and fraud alerts.
- Performed customer segmentation using clustering techniques and behavioral analytics.
- Developed ETL pipelines integrating deposits, credit card, lending, and digital channel data.
- Designed **Star and Snowflake** models to support analytical and reporting requirements.
- Implemented fraud-detection indicators by analyzing unusual spending and transaction anomalies.
- Created dashboards used for quarterly financial performance reviews by senior leadership.
- Improved data quality by identifying mismatched transaction codes and resolving ETL inconsistencies.
- Automated monthly reporting tasks using **Python**, reducing cycle time by 50%.
- Collaborated with banking teams to convert regulatory requirements into measurable KPIs.
- Documented pipeline workflows, validation rules, and dashboard specifications.

Environment: Python, SQL Server, Power BI, Excel, Banking Data, Git, JIRA, ETL Pipelines

Data Analyst – Elevance Health, Atlanta, GA | May 2024 – December 2024

Project: Claims Insights Modernization (Healthcare Analytics)

- Analyzed large-scale claims datasets using **SQL (Window Functions, Joins, CTEs)** supporting adjudication insights.
- Built Snowflake data marts for rejection patterns, prior authorization delays, and provider performance.
- Developed **Tableau dashboards** tracking claim turnaround times, denial rates, and payer/provider trends.
- Applied **Python Pandas** for data profiling and anomaly detection of inconsistent claim codes.
- Developed ETL data flows using **Azure Data Factory** to standardize claims.
- Reduced dashboard refresh time by 40% through performance tuning.
- Automated scheduled reporting using **Tableau Server** and **Power BI Gateway**.
- Built regression-based predictive models for claim denials.
- Designed data quality rules to detect duplicates, invalid NPI codes, and missing values.
- Integrated **ICD-10 and CPT** code sets into analytical layers with SME collaboration.
- Presented insights to leadership, reducing operational rework by 18%.

Environment: Tableau, Snowflake, SQL, Python, Azure Data Factory, Excel, Healthcare Data, Confluence, JIRA

Data Analyst – Cyient, Hyderabad, India | June 2021 – July 2023

Project: Enterprise Data Analytics Platform (Healthcare Analytics)

- Developed data analytics workflows using **Python (Pandas, NumPy)** to clean and process large healthcare datasets.
- Wrote optimized **SQL queries** analyzing provider performance, claim rejections, disease categories, and appointments.
- Built interactive **Power BI dashboards** for KPIs like LOS, readmission rates, turnaround time, and referrals.
- Implemented data validation and transformation checks across ETL pipelines.
- Identified root-cause issues in datasets by reconciling mismatches across multiple systems.
- Conducted statistical analysis using **Matplotlib/Seaborn** for patient demographic trends.
- Automated daily operational reporting using **Python scripts**, saving hours of manual effort.
- Gathered requirements and translated them into analytics dashboards.
- Designed compliance and efficiency KPIs tailored to healthcare operations.
- Prepared processed datasets in **SQL Server** for downstream teams.
- Documented workflows, logic, and table definitions in **Confluence**.

Environment: Python, SQL Server, Power BI, Excel, GitHub, JIRA, Snowflake, Healthcare Data

EDUCATION

Master of Science in Computer Science, Campbellsville University — Jan 2024 to Aug 2025

Bachelor of Technology in Computer Science Engineering, RISE Krishna Sai Group of Institutions — June 2019 to May 2023

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Advanced Microsoft Power BI from Edureka
- Completion Certificate for Generative AI: Prompt Engineering Basics
