

PROFILE

Data Engineer with over **5 years** of experience designing, implementing, and managing end-to-end data solutions on cloud platform. Proven expertise in Extract, Transform and Load (ETL) development using Python scripts, Azure Data Factory and Informatica PowerCenter. Adept at collaborating with cross-functional teams to translate business requirements into data solutions, while consistently meeting project timelines and objectives. Proficient in utilizing Azure services such as Azure SQL Database, Azure Data Factory, Azure Functions, and Azure Synapse Analytics to deliver robust and performant data solutions.

WORK EXPERIENCE

Data Engineer | Dentsu International, India

Aug 2018 – May 2022

- Enhanced data processing efficiency by designing optimized ETL pipelines using Azure Data Factory and Informatica PowerCenter.
- Monitor and adjust end-to-end Informatica workflows to enhance productivity.
- Streamlining database architecture, significantly reducing data load times.
- Achieved a 30% reduction in query execution times by meticulously analyzing and optimizing SQL statements, leading to faster data access and application performance.
- Developed Python scripts to automate the generation of departmental reports, slashing manual effort by 40% and minimizing errors, thus boosting overall team productivity.
- Leveraged Microsoft Graph API within Azure Functions to automate workflows, ensuring timely expense validation by role-based reviewers, enhancing compliance and efficiency.
- Implemented user management automation using Okta and Microsoft Graph APIs, providing precise access control to sensitive data, thereby reducing manual workload, and enhancing data security.
- Designed and implemented a secure, scalable data lake using Azure Blob Storage, facilitating centralized data access and supporting advanced analytics projects.
- Migrated legacy systems to Azure Stack (Azure SQL Server, Azure SQL Pool), improving performance and scalability while minimizing business disruption.
- Automated sending reminder emails to employees and managers to log and approve work logs using Python scripts.
- Designed scalable and maintainable data models to support business intelligence dashboards and reporting needs.

Database Developer | APA Engineering Pvt Ltd., India

Apr 2017 – Jul 2018

- Developed and deployed a web application designed to capture and analyze seller data from eBay Developer APIs, facilitating actionable insights for client performance enhancements and competitive positioning in the market.
- Engineered robust database schemas and tables, ensuring optimal data organization and storage for enhanced application performance.
- Crafted and implemented complex SQL views, functions, and stored procedures to encapsulate the application's business logic, significantly improving data retrieval efficiency and processing speed.
- Engaged in collaborative development efforts with cross-functional teams, contributing to the design and implementation of scalable, high-performance database solutions that addressed key business requirements.
- Assisted senior developers in the ideation and development of innovative solutions to complex engineering problems, demonstrating strong problem-solving skills and technical proficiency.
- Authored and maintained comprehensive documentation for existing database architectures, ensuring knowledge transfer and continuity during team transitions, and minimizing downtime.

VOLUNTEER EXPERIENCE

Data Analyst | Seminole County TNVR., Florida

Apr 2024 – Current

- Developing and implementing data-driven reports to support fundraising efforts and decision-making process.
- By collaborating with a dedicated team of volunteers to identify target demographics and optimize outreach efforts based on data analysis.

EDUCATION & CERTIFICATION

Bachelor Of Technology
Anna University, Chennai, India

Jun 2013 - Apr 2017

[Microsoft Certified: Azure Data Fundamentals](#)

SKILLS

Programming Languages:	Python, R, SQL, PHP, HTML, CSS, JavaScript
Databases:	SQL server, MySQL, Postgre SQL, Oracle.
Cloud:	Microsoft Azure – Azure Functions, Azure Data Factory, Azure SQL Server, Azure Blob, Azure SQL Pool
Tools:	Informatica PowerCenter, Git, Jira, Semarchy (MDM), PowerBI, MS Office
