

Uday Shelke

Business Analyst

(857) 313-8300 | udayshelke28@gmail.com | [LinkedIn](#)

SUMMARY

- Business Analyst Over 3 years of experience in gathering and documenting business requirements, including creating BRDs, FRDs, SRS, and developing Use Case Diagrams and Process Flows, ensuring comprehensive business needs are captured and effectively communicated.
- Proficient in Agile (Scrum, Kanban) and Waterfall methodologies, with hands-on experience using Jira, Confluence, and MS Project to manage projects and collaborate across teams.
- Skilled in SQL, Tableau, Power BI, and advanced Excel to analyze data and create interactive dashboards that provide actionable insights for decision-making.
- Expertise in GAP Analysis, Cost-Benefit Analysis, and Risk Analysis to drive business process improvements and ensure alignment with organizational objectives.
- Familiarity with cloud platforms like AWS, Microsoft Azure, and Google Cloud. Experienced in using data processing tools like Alteryx and DataBricks for ETL tasks, enhancing data accessibility and streamlining workflows across teams.
- Effective in communicating complex technical concepts to non-technical stakeholders. Skilled in eliciting requirements, facilitating workshops, and ensuring that business requirements are understood and translated into actionable solutions.

SKILLS

Business Analysis & Documentation: BRD, FRD, SRS, BPMN, User Stories, Use Case Diagrams, Process Flows, RTM, UAT, GAP Analysis, Cost-Benefit Analysis, Risk Analysis, Change Management, Stakeholder Management

Project Management & Methodologies: Agile (Scrum, Kanban), Waterfall, SDLC

Project Management Tools: Jira, Confluence, MS Project, Trello, Sprint Planning, Backlog Grooming, Retrospectives

Data Analysis & Visualization: SQL (Advanced Joins, Subqueries, Window Functions), Data Visualization (Tableau, Power BI, Google Data Studio), Advanced Excel (Pivot Tables, VLOOKUP, Macros), Predictive Analytics, Trend Analysis, Statistical Analysis

Cloud Technologies & Platforms: AWS (S3, RDS, Athena), Microsoft Azure, Google Cloud Platform (GCP), Data Warehousing (Snowflake, BigQuery)

Analysis Techniques & Tools: Root Cause Analysis, Process Improvement, Data Cleansing & Transformation (ETL Processes, Alteryx, DataBricks), Financial and Operational Analysis, Performance Metrics

Version Control & Collaboration Tools: Git, GitHub, GitLab, Collaboration Tools (Slack, Zoom, Microsoft Teams), Documentation Tools (SharePoint, Google Docs)

Soft Skills: Effective Communication & Presentation, Critical Thinking & Problem-Solving, Cross-functional Collaboration & Stakeholder Engagement, Time Management & Task Prioritization

EXPERIENCE

Metlife	Jan 2024 - Present
Business Analyst	USA
• Spearheaded the implementation of Agile methodologies, delivering over 15 comprehensive Business Requirements Documents (BRDs) that facilitated alignment between business and technical teams. • Led GAP analysis on 20+ project requirements, providing actionable insights to enhance project alignment with business objectives and improve workflow efficiency. • Collaborated with stakeholders to create and present detailed project roadmaps and scope documents using MS Project, ensuring effective communication and understanding of project milestones. • Managed and tracked requirements using Jira, ensuring accurate documentation and timely delivery of business solutions throughout the project lifecycle. • Actively participated in Agile ceremonies such as Sprint Planning, Daily Standups, and Sprint Retrospectives, contributing to the continuous improvement of team performance.	
FIS Global	Nov 2020 - May 2022
Business Analyst	India
• Authored and documented 10+ Business Requirements Documents (BRDs), transforming business needs into functional specifications and ensuring alignment with project goals. • Designed and maintained SQL-powered dynamic reports, providing key insights into trading activities, enhancing business decision-making. • Conducted detailed GAP analysis and cost-benefit evaluations to identify process inefficiencies and streamline business operations, improving project delivery time.	

- Collaborated in Agile Sprint Planning and Retrospective meetings, offering valuable insights that led to a 15% improvement in project timelines.
- Managed defect tracking and issue prioritization using HP Quality Center, ensuring quick issue resolution and minimizing project delays.
- Delivered regular presentations to senior leadership, summarizing project status, risks, and key performance metrics to aid strategic decision-making.

Praxis Info Solutions Pvt Ltd

Jan 2020 - Aug 2020

Business Analyst

India

- Organized and documented project requirements through MS SharePoint, ensuring smooth traceability and clear communication across teams.
- Developed interactive Power BI dashboards and Excel visualizations to track business KPIs, providing leadership with actionable insights to support decision-making.
- Conducted cost-benefit analysis for 5+ consolidation projects, driving strategic decision-making and contributing to a reduction in operational costs.
- Utilized DataBricks for data modeling and process optimization, significantly improving the processing time of large datasets.
- Designed and documented process flows using Lucidchart and Rational Rose, ensuring clear communication of business requirements to technical teams.

EDUCATION

Northeastern University

Sep 2022 - May 2024

Master of Science in Information Systems

Boston, MA

Savitribai Phule Pune University

Jun 2016 - May 2020

Bachelor of Engineering in Information Technology

Pune, India

PROJECTS

Ecommerce Database Management Systems | GitHub Project link: [Ecommerce DBMS](#)

- Developed a data management solution for ecommerce using MySQL, optimizing data storage and retrieval for large product catalogs.
- Designed an efficient ERD and implemented schema to ensure scalability and optimal performance of the ecommerce database system.
- Employed DDL and DML techniques to streamline data manipulation, improving system efficiency and data integrity.

Real Estate Prediction

- Built a machine learning model using Python, sklearn, and linear regression to predict real estate prices based on various features such as square footage and number of bedrooms.
- Applied data preprocessing, outlier detection, and feature engineering techniques to enhance model accuracy and robustness.
- Implemented grid search and k-fold cross-validation for hyperparameter tuning and model evaluation.

IMDB Integration for Advanced Analytics | GitHub Project link: [IMDB Analytics](#)

- Designed and implemented ETL processes using Talend to integrate movie data from various sources like MySQL, TSV, and JSON.
- Created a Type 2 Movie Titles Dimension table using Slowly Changing Dimension (SCD2) methodology for historical data tracking.
- Utilized SQL and Tableau to ensure data alignment and visual representation, providing actionable insights for business intelligence.

The Economics of Happiness | GitHub Project link: [Economics of Happiness](#)

- Analyzed happiness index data from 2015-2019 using statistical modeling and automated machine learning to predict future happiness scores with 90% accuracy.
- Applied SHAP (Shapley Additive Explanations) for feature importance analysis, identifying key indicators influencing happiness trends across different regions.
- Developed predictive models that can be used for social research and policy planning.

Web Scraping on Covid Data | GitHub Project link: [Web Scraping](#)

- Utilized Python, BeautifulSoup, and Selenium to scrape real-time COVID-19 data from worldmeters.info, ensuring accurate and comprehensive data extraction.
- Applied data visualization techniques in Jupyter Notebook to present the cleaned data, facilitating trend analysis and informed decision-making.
- Developed a continuously updated dataset that can support further analysis and research on global COVID-19 trends.
