Education

2022 – 2026	B.E. at Nitte Meenakshi Institute of Technology, Bangalore	CGPA: 8.83
2020 – 2022	Class 12th, Sri Chaitanya Girls PU College	Percentage: 94.83%
2018 – 2020	Class 10th, B V R English Medium High School	Percentage: 92.8%

Projects

Multi-Task Deep Learning for Age, Gender & Diabetes from Retinal Images [Link](#)

Built a multi-task CNN using the ODIR-5K retinal image dataset to simultaneously predict age, gender, and diabetes. Applied image preprocessing, augmentation, and feature engineering techniques to improve model robustness and evaluated performance using Precision, Recall, and F1-score metrics.

Customer Trends Data Analysis & Business Insights Dashboard [Link](#)

Analyzed customer purchase behavior and sales trends using SQL and Python to identify actionable business insights. Performed data cleaning, exploratory data analysis, and KPI evaluation, and produced an interactive Power BI dashboard for customer segmentation and sales performance monitoring.

Analysis of Octane Rating [Link](#)

Developed a Multiple Linear Regression model to predict petrol octane ratings. Performed data cleaning, validated regression assumptions, applied corrective measures where necessary, and evaluated model performance through goodness-of-fit analysis and significance testing of model parameters.

Credit Card Fraud Detection using Logistic Regression & Risk Analytics [Link](#)

Built a Logistic Regression model to detect fraudulent credit card transactions using transaction-level data. Applied data normalization and SMOTE oversampling to address class imbalance and optimized model performance through Precision, Recall, and F1-score evaluation metrics.

Technical Skills

Languages & Tools	Python, SQL, Pandas, NumPy, Matplotlib, Jupyter Notebook, Word, PowerPoint, Canva
Data & Analytics	Exploratory Data Analysis, Statistical Analysis, A/B Testing, Hypothesis Testing, KPI Tracking, ETL, Data Modeling, Data Cleaning, Data Validation
Machine Learning	Logistic Regression, Linear Regression, CNN, Model Validation, SMOTE, Precision, Recall, F1-score
BI & Reporting	Power BI, Excel, Power BI Dashboards, KPI Reporting, Data Visualization, Excel Pivot Tables
Concepts	Root Cause Analysis, Business Intelligence, SDLC (Agile, Waterfall)
Languages	English, Kannada, Telugu, Hindi

Certifications

Jan 2024	Python Certification – NxtWave
Jun 2025	SQL Certification – HackerRank
Aug 2026	Data Visualization with Power BI – Infosys Springboard

Positions of Responsibility

2023–2024	Co-Head, Design Team – Solvify NMIT Led creative strategy, visual branding, and UI/UX design for events and hackathons.
-----------	---

Extra-Curricular Activities

2024	Semi-Finalist – HackerEarth Sustainable MedTech Hackathon Designed an innovative healthcare solution with a sustainability focus.
2025	Samsung Solve for Tomorrow Proposed a technology-driven public safety solution addressing real-world community challenges.
