EXPERIENCE

Software Engineer

January 2025 – Present

Paychex

Rochester, NY

- Architected and developed an internal application to replace legacy PowerBuilder workflows, using **Java**, **Spring Boot**, **Spring Data JPA**, **Angular** and **RESTful APIs** to streamline and modernize processes across internal teams
- Enhanced enterprise tax form generation using **Java**, **MongoDB**, **Apache Kafka** and **RabbitMQ**, increasing throughput by **40%** and supporting over **1M** annual forms
- Automated regression validation using **Robot Framework**, reducing tax form verification effort by around **85%**.
- Debugged production workloads using **IntelliJ Profiler**, identifying and resolving memory and performance bottlenecks
- Collaborated in an **Agile** team, adeptly using **Git** for version control, **Bitbucket** for source code management and **Jenkins** for continuous integration, with deployment managed through **Openshift**

Software Engineer I

August 2021 – August 2023

Honeywell Technology Solutions

Hyderabad, India

- Refactored a monolithic application into **microservices** using **Java**, **Spring Boot**, integrating **Spring Security**, **OAuth2**, and **JWT** for authentication and authorization across distributed systems
- Led the modernization of enterprise applications from **Java 8 to 17**, improving compatibility, performance and security
- Designed and developed **RESTful** and **SOAP APIs** using **Spring Boot** and **JAX-WS**, and integrated them with **React-based front-end components** to enable secure data exchange between internal and external systems
- Built CI/CD pipelines using **Bamboo**, **Docker**, and **Kubernetes** to automate builds, security scans, and deployments
- Leveraged **Microsoft Azure services** for cloud-native deployments, ensuring high availability and automated scaling
- Automated the build and deployment process with **Python**, **Ruby** and **Shell** scripts, reducing release cycles by **20%**
- Resolved production issues, optimized **SQL** queries, improving application responsiveness by around **80%**
- **Received Honeywell Silver Bravo and Bronze Bravo Awards for demonstrating urgency and passion**

Software Intern

January 2021 – July 2021

Honeywell Technology Solutions

Hyderabad, India

- Engineered Automation Framework using **Selenium**, and **TestNG** leading to **70%** reduction in test execution time
- Automated over **500** manual test cases, streamlining testing processes and reducing manual effort by **45%**

TECHNICAL SKILLS

Languages: Java, Python, C, C++, Ruby, JavaScript, TypeScript, HTML5, CSS, Perl, Bash, PL/SQL

Frameworks: Spring Boot, Spring Data JPA, Spring MVC, React, Angular, Hibernate, TestNG, JUnit, Robot Framework

Tools: Git, Microsoft Azure, AWS, Apache Kafka, RabbitMQ, Splunk, Postman, SoapUI, Maven, Gradle, Jira

CI/CD: Docker, Kubernetes, Ansible, Terraform, Jenkins, Bamboo, GitHub Actions, Bitbucket, Openshift

Databases: MongoDB, PostgreSQL, MySQL, Oracle, Redis, Neo4j

PROJECTS

UniHub – University Marketplace — *Java, Spring Boot, Angular, AWS, PostgreSQL*

- Built a production-grade marketplace SPA for students using **Angular** and **Spring Boot microservices**
- Implemented authentication and authorization using **Spring Security**, **OAuth2**, **JWT**, enforcing .edu-domain access
- Deployed microservices on **AWS EC2**, used **S3** for storage, implemented secure **IAM policies** for cloud operations

Online Food Ordering and Delivery Platform — *Java, Spring Boot, React, MongoDB, Kafka, Docker, Kubernetes*

- Developed a full-stack food ordering platform with a **Spring Boot** backend and a **React** frontend
- Implemented real-time order tracking using **Kafka**, improving user responsiveness and system scalability
- Implemented containerization with **Docker** and orchestration with **Kubernetes** to deliver a scalable and reliable platform, leveraged **MongoDB** for efficient and flexible data storage, enabling seamless data retrieval and management.

AI-Powered HR Assistant — *Python, FastAPI, LangChain, Streamlit, ChromaDB, OpenAI, Sentence-Transformers*

- Built an HR assistant using an **LLM + Tools** architecture to handle PTO scheduling, payroll, and policy queries
- Implemented a **RAG** pipeline with **document chunking**, **embeddings**, and **ChromaDB** to deliver grounded policy answers across multiple locations with citation-backed responses
- Developed **FastAPI** endpoints for intent classification, tools, and multi-turn dialog flows, with Streamlit-based chat UI

EDUCATION

Rochester Institute of Technology

August 2023 – December 2025

Master of Science in Computer Science | GPA: 3.85/4

Rochester, NY

Jawaharlal Nehru Technological University Hyderabad, College of Engineering

July 2017 – July 2021

Bachelor of Technology in Electronics and Communication Engineering | GPA: 3.42/4

Hyderabad, India
