

VINAY SAKE

Chicago, IL - 60616 | (312) 479-1675 | sakevinay007@gmail.com | <https://www.linkedin.com/in/sakevinay/>

SUMMARY

Full Stack Java Developer with 2.5 years of experience in building scalable, distributed web applications. Proficient in Java, Spring, Hibernate, Microservices, RESTful APIs, React, Node.js, SQL/NoSQL, Agile methodologies, DevOps practices, and AWS. Skilled in optimizing workflows and enhancing system performance. Committed to continuous learning and adopting emerging technologies while adhering to modern design principles.

WORK EXPERIENCE

Software Development Engineer

Illinois Institute of Technology, Chicago, IL

September 2024 – May 2025

- Engineered a real-time admissions portal for 10,000+ users using Java, Spring Boot, REST APIs, and MySQL, maintaining 99.9% uptime and increasing throughput by 25% during high-volume application periods.
- Automated applicant tracking, document upload, and decision evaluation workflows with Spring Boot microservices on AWS Lambda, reducing manual processing by 30% and workflow duration by 15%.
- Resolved 20+ production-critical issues using Postman, centralized logging, and exception tracing, ensuring uninterrupted applicant access and system reliability during peak admissions traffic.

Application Development Associate

Accenture, Bengaluru, India

August 2022 – May 2023

- Managed the full Software Development Life Cycle (SDLC), including requirements gathering, design, development, testing, deployment, and L2 operational support, ensuring the successful delivery of a critical application.
- Boosted sprint efficiency by reducing development time by 20 hours through backend API optimizations and frontend workflow improvements, delivering 4 high-impact features ahead of schedule.
- Refactored legacy monolithic applications into event-driven microservices using Java, REST APIs, and Hibernate, increasing API reusability by 30% and reducing deployment time by 35% through streamlined CI/CD pipelines.
- Led collaboration among QA, DevOps, and business teams to resolve integration blockers, align sprint goals, and maintain consistent Agile velocity, resulting in on-time delivery of multiple releases.
- Minimized production incident risk by 55% by designing and implementing blue-green deployment strategies with Jenkins, improving system stability and rollback capabilities.

Software Engineer

Ragi Media, Bengaluru, India

August 2020 – September 2021

- Achieved 30% faster response times and increased throughput by 20% through the development of robust back-end logic in Java/J2EE, utilizing advanced techniques like the Collection Framework and Multi-Threading.
- Automated batch data processing workflows with SQL stored procedures and Java cron jobs, eliminating 90% of manual effort and ensuring consistent data integrity across high-volume jobs.
- Optimized database schemas and SQL queries for a legacy application, resulting in a 60% reduction in query time, faster data retrieval, and improved system performance.
- Streamlined code quality by implementing continuous analysis in SonarQube, lowering vulnerabilities by 40% and accelerating deployment cycles by 50% through early issue detection and proactive resolution.
- Designed and executed comprehensive test plans using JUnit, Mockito, and Selenium, resulting in a 50% reduction in post-release defects, enhanced test coverage, and more consistent application performance.
- Leveraged Agile methodologies and DevOps tools (JIRA, Git, Jenkins) for efficient delivery.

EDUCATION

Master of Science, Information Technology and Management

Illinois Institute of Technology, Chicago, IL

August 2023 – May 2025

SKILLS

Programming: Java, JavaScript, SQL, HTML, CSS, Python

Frameworks & Libraries: Spring Boot, Hibernate, React.js, Angular.js, Node.js, Bootstrap, J2EE, JDBC

Databases: MySQL, PostgreSQL, Oracle, MongoDB, SQL Server

Cloud & DevOps: AWS (EC2, S3, Lambda), Microsoft Azure, Docker, Kubernetes, Terraform

Tools & Practices: Git, JIRA, CI/CD (Jenkins), Agile (Scrum, TDD), REST APIs, Microservices, Maven, Gradle, Postman, Splunk, SonarQube, Kafka, Unit Testing (JUnit, Mockito)
