

PROFESSIONAL SUMMARY

- Proficient in full-stack development with extensive experience in Java, Python, .NET, Angular, and ReactJS, focusing on creating interactive and dynamic web applications.
- Skilled in cloud infrastructure management on AWS, Azure and GCP, optimizing data processing, storage solutions, and application deployment to enhance system performance and scalability.
- Expertise in utilizing advanced frameworks such as Spring Boot and Hibernate for developing robust backend systems and efficient APIs, incorporating best practices in microservices architecture.
- Strong background in security implementation using Spring Security and JWT to fortify web applications and ensure data protection.
- Experienced with DevOps tools and methodologies, adept at automating CI/CD pipelines using Jenkins and Docker for streamlined development and deployment cycles.

TECHNICAL SKILLS

- **Languages:** Java, C, C#, Python, SQL.
- **Web Services & Technologies:** REST API, HTML5, CSS3, JavaScript, XML, JSON, jQuery, Bootstrap.
- **Frameworks & Libraries:** Spring boot, Hibernate, React, Node.js, Java EE, Flask, Django, AngularJS, Angular 13, .NET, Vue.JS.
- **Databases:** MySQL, PostgreSQL, SQL Server, IBM DB2, MongoDB, Oracle SQL Developer.
- **Cloud Technologies:** Azure (DevOps, Functions, AKS, SQL Database), AWS (S3, EC2, Lambda, Redshift, Aurora, Glue), GCP.
- **Application Servers:** Apache Tomcat, IBM WebSphere.
- **Development Tools:** Eclipse, IntelliJ IDEA, Visual Studio Code, Gradle, Postgres, Maven, Jenkins.
- **Version Control and Testing:** Git, JUnit, Mockito.
- **Testing:** Junit, Integration testing, Regression Testing, Mockito.
- **Software Development Practices:** Docker, Kubernetes, Microservices, CI/CD, SDLC, Agile, Scrum.
- **Security & Integration:** OAuth 2.0, Spring Security, Apache Kafka, SOAPWORK

EXPERIENCE

Software Engineer | Elevance Health, USA (contract)

July 2024 – Present

- Developed dynamic front-end features using **Angular** and **ReactJS**, integrating **JavaScript** for enhanced interactivity. Back-end services were built with **Java Spring Boot**, deployed on **Azure Kubernetes Service (AKS)** to ensure high scalability and effective management.

- Designed and implemented **RESTful APIs** and microservices using **Java** and **Python**, enhancing system communication and robustness.
- Developed, reviewed, and updated internal, external, and post-implementation documentation including process flows, procedures, system flows, and change logs ensuring thorough and accurate information for organizational benefits.
- Experienced in relational Databases like **SQL Server**, data modeling, design, and creating a highly performant stored procedure.
- Worked on DevOps tools like **Jenkins**, **Kubernetes** and other **dockers** for containerization of the applications and also for Continuous deployment and development.

Software Engineer | BCBS, USA (contract)

Jun 2023 – Mar 2024

- Implemented **RESTful** and **SOAP** APIs using **Apache Kafka** for efficient message processing within **Azure infrastructure**.
- Enhanced the member portal with **Java** and **Spring Boot**, reducing API response times by 30%.
- Led the migration of legacy systems to Azure Cloud, using **Azure Data Factory** to enable the processing of an additional 2TB of data daily.
- Transitioned applications from **WebSphere** Application Server to **Apache Tomcat** and upgraded from **JDK8** to **JDK11**, significantly cutting operational costs and boosting performance.
- Optimized **Oracle** and **PostgreSQL** database interactions, improving query performance by 50% and supporting complex business logic for advanced functionalities.
- Developed **UNIX shell scripts** to automate batch jobs in production, enhancing operational efficiency.
- Streamlined development and deployment processes by integrating **Agile SDLC methodologies** and **DevOps** practices, utilizing **Hibernate** and **JPA** for data persistence.
- Architected robust back-end services to facilitate report generation, document retrieval, and batch processing, ensuring high-quality software releases.

Software Developer I | Amazon, India (Supply Chain)

Jun 2019 – Jul 2022

- Developed customer-facing features using the **Spring MVC framework**, enhancing user engagement by integrating advanced functionalities into the web application.
- Implemented robust security mechanisms using **Spring Security**, leveraging **JWT** and refresh tokens to enhance system security by 23.5%.
- Gained hands-on experience developing enterprise-grade **API integration** layers and web applications using .NET technologies with **C#**, **ASP.NET**.
- Utilized Web API as a platform for building **RESTful** applications on the **.NET Framework**, employing **SQL Server** databases with the Entity Framework as the backend and **LINQ** (LINQ to SQL and LINQ to XML) for database access.

- Engineered a sophisticated data rollback mechanism, reducing rollback time for 1 TB of customer data across India from 9 hours to just 2 hours, minimizing disruption and boosting system efficiency.
- Built and maintained a microservice using **Spring Boot**, integrating a **MySQL database** with **JPA** (Hibernate) to handle backend data processes efficiently.
- Designed and connected a user-friendly interface using **ReactJS and Bootstrap**, providing seamless integration with the Spring Boot backend and enhancing user interaction and functionality.
- Utilized **AWS Glue** for ETL processes and managed AWS infrastructure with **CloudFormation**, ensuring efficient data transformations and resource allocation.

Junior Software Developer| Eclerx, India

Mar 2018 – May 2019

- Engaged in full lifecycle software development using **Java, Spring, and Hibernate**, focusing on both backend and frontend functionalities with **HTML, CSS, and JavaScript**.
- Configured **Spring** and **Hibernate** DAOs for data retrieval from a **MySQL** database, and built **RESTful web services** with Spring for efficient API management.
- Implemented **JIRA** for project management and **Log4J** for application logging, enhancing debugging and reducing issue resolution time by 25%.
- Developed dynamic web content using **JSP** and validated user inputs using **JavaScript**, ensuring robust user interaction and data integrity.
- Conducted comprehensive testing, debugging, and documentation, and led code reviews to maintain high code quality and system reliability.

EDUCATION

Masters in Big Data Analytics & Information Systems

Aug 2022 to May 2024

University of Central Missouri, Missouri, USA

Bachelor of Technology in Computer Science

Sep 2013 to May 2017

Jawaharlal Nehru Technological University, Hyderabad, India
