+1 972-833-1504

PROFESSIONAL SUMMARY:

- Over 5 years of comprehensive IT experience in analyzing, designing, developing, and deploying enterprise web applications with strong expertise in **Java 8, SpringBoot, Microservices, MongoDB, REST APIs, Docker, AWS, NoSQL, Jenkins, J2EE, SQL, Spring, APIs, Reactjs, Object-Oriented Programming** with Java 8, and client-server technologies.
- Proficient in core technologies including **Java, Servlets, JSP, EJB, JDBC, XML, Web services, Spring, Hibernate, JMS, MQ-Series, SOAP, JAX-WS.**
- Skilled in creating web pages utilizing **HTML/HTML5, XML, DHTML, CSS/CSS3, SASS, LESS JavaScript, ReactJS, Redux, Flex, TypeScript, jQuery, JSON, Node.js, AJAX, and Bootstrap.**
- Hands-on experience with **Spring** modules such as **Spring MVC, DAO, and AOP**, utilizing **Hibernate** as the **ORM** tool for persistence layer implementation and **POJO** mapping.
- Expertise in working with presentation layer frameworks like **JSP, HTML, XHTML, CSS, JSTL, and JavaScript.**
- Experienced in latest Java versions and Object-Oriented Programming (**OOP**) principles, including inheritance, polymorphism, abstraction, and encapsulation.
- Comprehensive understanding of J2EE **design patterns** like Session Facade, Singleton, Front Controller, Business Delegate, Service Locator, DTO, and DAO.
- Well-versed in Service-Oriented Architecture (SOA) with experience in web services, including **SOAP** and **REST**, as well as tools like **ANT** and **JUnit.**
- Skilled in J2EE application development across various **IDEs**, including Eclipse, NetBeans, IntelliJ, IIBM WebSphere Studio Application Developer (WSAD), Rational Application Developer (RAD), and JBuilder.
- Proficient in implementing the **MVC** framework within J2EE architecture.
- Strong knowledge of configuring and deploying web applications on **Tomcat** web servers and application servers like **WildFly.**
- Directed the development of high-performance **RESTful APIs** and utilized web services like SOAP and REST to achieve a 40% improvement in data retrieval and integration speed.
- Developed and deployed cloud-based applications on **AWS and Azure**, leveraging services such as EC2, S3, Lambda, DynamoDB, and CloudWatch, resulting in a 40% increase in scalability for handling peak loads.
- Expertise in **Azure DevOps**, Docker, and Kubernetes for efficient CI/CD and containerization.
- Skilled in managing **Azure** cloud resources, implementing security best practices, and automating deployments with Harness.
- Developed and maintained real-time data streaming solutions using **Kafka** and **Flink.**
- Hands in Transferring, Integrating and Deployment of data and java web applications from cloud offered by AWS cloud.
- Proficient in version control systems like **Git** for source code management and team collaboration.
- Extensive experience debugging applications using logging frameworks like **Apache Log4J.**
- Solid understanding of relational database concepts and skilled in constructing SQL queries.

- Experienced in **RDBMS** concepts, with hands-on work in **Oracle** and **DB2**, including writing stored procedures, functions, and triggers using PL/SQL and **NoSQL** databases such as **MongoDB, Cassandra, DynamoDB**.
- Experienced in writing unit test cases using **Junit, Mockito**.
- Knowledgeable in software development, lifecycle methodologies, including **Agile** and **Scrum**, with experience in collaborative team environments.
- Familiar with **DevOps** practices and experienced in implementing continuous integration and continuous deployment (**CI/CD**) pipelines.
- Knowledgeable in security best practices, with experience in implementing authentication and authorization in web applications.
- Excellent communication skills for collaborating with cross-functional teams, understanding project requirements, and presenting technical solutions effectively.

TECHNICAL SUMMARY:

- **Web Technologies & Services:** HTML, JavaScript, AJAX, jQuery, JSON, React.js, Angular, Redux, Flux, Bootstrap, Servlets, JSP, JAX-RS, JAX-WS, SOAP, WSDL, XML, Apache Kafka, Microservices, Spring Cloud, OAuth, JWT, Spring Security.
- **IDE Tools:** IntelliJ IDEA, Visual Studio, Eclipse
- **Databases/ORM Tools:** RDBMS (PostgreSQL, MySQL, Oracle, SQL Server), NoSQL (MongoDB, Cassandra, Redis), JDBC, Hibernate
- **Cloud:** AWS (EC2, Lambda, S3, DynamoDB, CloudWatch, RDS, CodeCommit, CodePipeline, CodeBuild, CodeDeploy), Pivotal Cloud Foundry (PCF), Azure (App Services, Functions, SQL Database)
- **Frameworks:** Spring Boot, Spring MVC, JPA, React, Angular (2/4/6/8), Bootstrap
- **Languages:** Java (8/11), JavaScript, TypeScript, HTML5, CSS3, SQL
- **Build Tools:** Maven, Gradle
- **Debugging Tools:** React Developer Tools, Chrome DevTools, Postman, Fiddler, Splunk
- **Testing Tools:** JUnit, TestNG, Mockito, Selenium
- **DevOps/CI/CD Tools:** Jenkins, Docker, Kubernetes, GitHub Actions, GitLab CI/CD
- **Methodologies:** Agile (Scrum), Waterfall
- **Version Control Tools:** SVN, Git, Bitbucket Other Tools Jira, Confluence, Splunk, AppDynamics, Grafana
- **Operating Systems:** Windows, Linux, macOS

PROFESSIONAL EXPERIENCE:

Client: JP Morgan Chase

Oct 2023 -Present

Role: Full Stack Java Developer

Responsibilities:

- Participated in the analysis, design, and implementation of APIs and software applications using **Java 8, Spring Boot, REST APIs, Docker, AWS, NoSQL, Jenkins, Microservices, Spring MVC, JPA, JSF**, and **web services like SOAP and REST**.
- Developed front-end modules with **React JS** and **JavaScript**, integrating them with a microservices-based, Spring Boot-driven middleware layer.

- Strong expertise in **Microservices** architecture, design patterns, and hands-on experience building microservices applications using **Spring Boot, Docker, Kubernetes, and Apache Kafka**.
- Deployed and managed Java applications and services on **AWS** Cloud Infrastructure.
- Developed **DAOs** (Data Access Objects) with Hibernate **ORM** for database interaction, specifically with Oracle DBMS.
- Integrated AWS **PaaS** services for scheduling tasks and running serverless applications.
- Utilized **REST** and **SOAP** web services to receive real-time updates from third-party systems.
- Collaborated in the design, development, and deployment of services on AWS **EC2**, optimized file storage with **S3**, and implemented serverless functions with AWS **Lambda**.
- Integrated **DynamoDB** for effective data management and set up **CloudWatch** alarms for robust system monitoring.
- Developed middle-tier applications in J2EE using **Servlets, EJB, JavaBeans**, and web services (SOAP and REST).
- Designed secure authentication and authorization protocols using **JWT** tokens and **OAuth 2.0**.
- Contributed in migrating data from **Oracle DB** to **PostgreSQL**, utilizing PL/SQL and T-SQL for transformation.
- Used **React** Router to create a Single Page Application (SPA) which can bind data to specific views and synchronize data with server.
- Implemented **flux** pattern by using redux framework as a core dependency.
- Developed stored procedures and optimized **SQL** queries for data retrieval and storage using PostgreSQL.
- Pleasant Experience in **React.js** for creating interactive UIs using One-way data flow, Virtual **DOM, JSX**, React Native concepts.
- Developed client interfaces with React.js to deliver responsive, interactive user experiences.
- Implemented **React** and worked with React Flux architecture to develop UI for application.
- Engaged in UI design using React Components with Spring MVC and enhanced layouts with **HTML5, Bootstrap, and CSS3**.
- Implemented the Model-View-View-Model (**MVVM**) pattern and utilized **TypeScript** to develop view-models for enhanced data management and interaction within the application.
- Designed unit testing frameworks using **JUnit** and **Mockito** to validate application functionality and reliability.
- Actively participated in code reviews and managed version control using **Git**, with continuous integration through **Jenkins**.
- Utilized **OpenShift** for **Kubernetes** container orchestration, managing deployment workflows and scaling applications efficiently.
- Collaborated within an **Agile** Scrum framework, consistently delivering features and enhancements in each sprint cycle, and refining code for optimized application performance.
- Knowledge sharing within the team through documentation and mentoring.
- Led a team of 5 developers in Agile sprints, coordinating tasks, conducting code reviews, and ensuring adherence to coding standards.

Environment: Java 11, Spring Boot, Spring MVC, React.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, AWS Cloud Infrastructure EC2, S3, Oracle Database, PostgreSQL, MySQL, Hibernate, Spring Data JPA, Jenkins, Git, Maven, JSON Web Tokens (JWT), OAuth, JUnit, Mockito, Agile Scrum methodology.

Client: Mphasis Ltd

Sep 2019 – Dec 2022

1. Banking Project

June 2020 – Dec 2022

Role: Full Stack Java Developer

Responsibilities:

- Developed the business logic layer utilizing Java 8 to implement classes and methods supporting core application functionalities.
- Developed microservices architecture leveraging Spring Boot and integrated Angular 4.0 to create modular, scalable applications with a focus on efficiency and high code quality.
- Enhanced application structure and performance by designing and refining the architecture with Spring Boot and Spring MVC for better modularity.
- Built dynamic web pages using **JSP**, implementing strongly typed models, custom tags, and partial views for displaying relevant content seamlessly.
- Built scalable enterprise application using **Spring** Framework along with Spring Boot and Spring MVC.
- Implement **Angular 4.0** directives, expressions, routing capabilities for bookmarking, filters, validations and Angular UI components, Components, ng-Modules, Providers, Services, and Classes for navigation respectively.
- Used **Angular** CLI to generate components, services, filters and compiled in different environments.
- Optimized performance is achieved by **Angular 4 Lazy Loading**.
- Migrated legacy web applications to Spring-based frameworks, ensuring cloud compatibility on **AWS**.
- Implemented **Kafka** Producer and Consumer in Microservices to ensure real time data flow.
- Spearheaded frontend component development with **JavaScript**, **TypeScript**, to build intuitive and dynamic user interfaces.
- Adopted **Redux/Flux** for efficient state management, ensuring predictable and consistent application behavior.
- Created reusable **UI** components using **Material-UI** (MUI) and other libraries to standardize the UI and expedite development.
- Built rich, user-friendly web pages with **HTML5**, **CSS3**, and **Bootstrap**, emphasizing interactive UI design.
- Developed **RESTful** and **SOAP**-based web services to facilitate seamless communication between frontend and backend layers.
- Consumed RESTful Web **APIs**, contributing to a service-oriented architecture deployed on Apache **Tomcat**.
- Developed SOAP-based web services using **JAX-WS**, enabling integration with other systems for increased interoperability.
- Managed data layers with **MySQL**, leveraging JPA and Hibernate for **ORM**, and implemented stored procedures, triggers, and views for efficient data management.
- Utilized Pivotal Cloud Foundry (**PCF**) and AWS for service deployment, ensuring cloud compatibility and secure data handling.
- Employed **JUnit** and **Mockito** for Test-Driven Development, ensuring high code quality and reliability.
- Collaborated on **Agile** teams to streamline project workflows, improving collaboration and project management.
- Effectively utilized **Git** for version control, managing code changes across development teams.

Environment: Java, Spring Boot, Spring MVC, Spring Cloud, JSP, Spring Security, RESTful APIs, Angular4, TypeScript, HTML5, CSS3, Bootstrap, JavaScript, MySQL, PostgreSQL, Hibernate, JUnit, Maven, Jenkins, Selenium, OpenShift, Docker, Kubernetes, Fetch API, Log4j, GitHub, AWS AMIs, Test-Driven Development (TDD).

2. Project

Sep 2019 – June 2020

Role: Associate Software Engineer

Responsibilities:

- Developed UI screens using **JSP, HTML, CSS, JavaScript**.
- Worked on **JSP, Servlets, Struts** framework, and production support issues of the existing applications.
- Development of Action Forms, Action Servlets, Action and Validating Action Forms in Struts framework.
- Implemented **Struts** Dispatch Action class and form bean classes using Struts framework.
- Client & server validations were handled using JavaScript & Struts validate plug-in.
- Worked on the JAVA Collections **API** for handling the data objects between the business layers and the front end.
- Hands-on experience in **Azure** cloud services (**Paas & IaaS**), storage, Web Apps, Active directory, Application insights and Logic apps.
- Deploy application code using CI/CD pipeline with **Azure DevOps** in Azure cloud scale VM build automation using DevOps in azure VM agent plug-ins.
- Experience with Container orchestration using **Docker** and **Kubernetes**.
- Implemented **Multithreading** for handling multiple requests and for high performance.
- Created many Stored Procedures and scheduled jobs to support our applications for or to create reports for customers.
- Build and maintain **SQL** scripts, indexes, and complex queries for data analysis and extraction.
- Develop a business continuity plan for the SQL Server Databases using **JDBC** drivers.
- Used spring for Dependency Injection for plugging in the **Hibernate DAO** objects for the business layer.
- Created an **XML** configuration file for Hibernate to map to SQL DB.
- Developed web services for sending and getting data from different applications.
- Used **JDBC** to access Oracle database for accessing customer information.
- Used **ANT** built tool for compiling and generating war file.

Environment: Core Java, HTML, CSS, J2EE, JSP, HTML, JavaScript, Azure, Servlets, JMS, Hibernate, JDBC, SQL, DAO, Web Services, Oracle, ANT.

Education:

- **Masters in Applied Computer Science** - Northwest Missouri State University – Maryville, Missouri
- **Bachelors in Electronics and Communication Engineering** - Jawaharlal Nehru Technological University - Hyderabad, India.
