+1 202 517 5603

Detail-oriented Database Administrator with 5 years experience in Oracle database 18c and 19c on Windows and Linux. Proven expertise in relational data management, cloud infrastructure, and administration. Adept at enforcing standards, optimizing performance, and calculating disk space requirements. Seeking a dynamic role to apply my skills in a forward-thinking environment.

Authorized to work in the US for any employer

Work Experience

Database Administrator

Sholla Corporation - Silver Spring, MD

December 2019 to Present

- Led Oracle database management efforts, addressing issues, implementing patches, upgrades, and performing maintenance tasks, resulting in a significant reduction in database downtime.
- Maintained and administered database structures, content, software instances, and schemas to ensure seamless support for application functions.
- Executed routine configuration and maintenance tasks, including database tuning, to uphold efficient and optimal database performance.
- Ensured robust data security, disaster recovery, and high availability measures, safeguarding critical data assets.
- Produced data extract files, including software development, testing, and execution, meeting specific data extraction requirements.
- Identified and resolved database problems through troubleshooting, conducting analyses, and implementing configuration enhancements to optimize performance.
- Monitored and recommended efficiency improvements for database performance.
- Upheld database access and update procedures to ensure data integrity and reliability.
- Determined and managed database storage requirements, optimizing resource utilization.
- Performed database-related tasks as needed, contributing to overall system reliability and efficiency.
