## PROFESSIONAL SUMMARY

---

Inspired Python Developer with **5+** years of proficiency in Python Django, DRF, and Back-end Development. Exhibits strong problem-solving abilities, effective communication skills, and a can-do attitude.

## PROFESSIONAL SKILLS

---

**Programming Languages:** Python, C, JavaScript, SQL

**Web Frameworks:** Django, Flask, FastAPI, Django Rest Framework, Vue JS, Angular JS

**Web Technologies:** HTML, CSS, JavaScript, Ajax, JQuery, Bootstrap, REST-APIs

**Databases:** MYSQL, PostgreSQL, Elastic Search

**Testing:** Django-Unitest, Pytest, Jest, Mocha, Chai

**DevOps & Deployment:** AWS Services (S3, EC2, ECR, Lambda, IAM, DynamoDB, CloudWatch), Docker, Celery, Nginx

**Software Tools:** Terraform, GitHub, GitLab, Jira, Linux Platform, Agile Project Management.

## PROFESSIONAL EXPERIENCE

---

**Software Development Engineer, Amazon - AWS**, Seattle, Washington

**December 2022 - Present**

- Engineered BuilderToolBox, a CLI tool published to **AWS S3** bucket, which reduces manual workaround for streamlining campaigns, jobs, and other CLI operations for multiple users.
- Developed a library that efficiently invokes **AWS Lambda** functions to download **ECR** images for retrieving test configurations, expanding customer base by enabling multiple users to initiate campaigns and jobs seamlessly.
- Architected a groundbreaking **RESTful API** using **Python Django**, optimizing log file analysis by 40% in API performance, reducing daily human effort by two hours for efficient root cause identification in test cases.
- Designed a **JavaScript** dashboard for comprehensive test analysis and failure insights, offering centralized diagnostic information, enhancing customer experience through a centralized view of all pertinent information.

**Software Engineer, Meta Platforms, Inc.**, Seattle, Washington

**July 2022 - December 2022**

- Refactored and supported existing code bases, ensuring high-quality code meeting a 95% coverage requirement using **Django Unitest**, enhancing time and space efficiency and addressing issues.
- Developed and maintained a scalable web application, utilizing **AngularJS**, **Django**, and **DRF** which provides a user-friendly interface with diverse features for automated testing within the organisation.
- Automated tasks within the scheduler using **Celery** to perform device testing, generating detailed test execution reports for OS image promotions of network devices.
- Developed **RESTful APIs** enabling device testing with support for standard connection types such as SSH and telnet.

**Software Engineer, Inmar Intelligence**, Hyderabad, India

**May 2019 - July 2021**

- Automated scraping of **500,000+** products using **Python** Scripting, **BeautifulSoup**, **Terraform**, and **AWS services (EC2, S3, IAM)**, significantly boosting productivity and extending revenue through streamlined procedures.
- Expanded execution of a current **Python RESTful API** by 23% by adding celery occupations utilising Redis and RabbitMQ administrations to perform tasks over the backstairs of the application.
- Developed **RESTful APIs** with **Django Rest Framework**, **ORM**, and **Django Management Commands**, while also successfully transitioning a **Python 2** project to **Python 3**, enhancing performance and scalability.
- Proficient experience building web applications from scratch using cutting-edge technologies like **Vue JS**, and **Jest** Framework.

**Web Application Developer, Green Buds**, Vijayawada, India

**Oct 2017 - Dec 2018**

- Implemented API functionality using **Python Django Rest framework** and established programmatic communication for data sharing with third-party services like **SFTP**.
- Designed, developed, and tested HTML, CSS, JavaScript, jQuery, and Vue JS to meet accessibility and web browser standards.

## EDUCATION

---

**Master of Engineering in Computer Science | GPA - 3.8**

University of Cincinnati, Cincinnati, Ohio

**Related Courses:** Cloud Computing, Database Theory, Operating Systems, Advanced Algorithms, Web Technologies.
