OBJECTIVE

Highly skilled Full-Stack Python Developer with 3+ years of experience in designing, developing, and maintaining web applications. Proficient in Python, Django, Flask, React, Angular, JavaScript, HTML, CSS, RESTful API development, and database management. Adept at collaborating with cross-functional teams to achieve project goals and deliver exceptional user experiences.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, React Native, JAVA

Frameworks: React, Node.js, Flask, JUnit, Material-UI, Redis, MongoDB, FireBase, Docker

Platforms: Kafka, AWS (EC2, S3, Redshift), GCP, Azure, Jira, Firebase, IBM Bluemix

Soft Skills: Collaborative, Data-Driven, Problem Solver, Patient, Accountability

EXPERIENCE

Full Stack Developer

Jun 2022 - Jun 2023

Privacera

Fremont, CA

- Developed a machine learning product with NextJS, Flask, SQLite, and MongoDB to optimize customer usage analysis and product recommendations, resulting in a 20% reduction in support cases.
- Optimized backend infrastructure with advanced algorithms and data structures, enhancing performance and scalability.
- Deployed a chatbot using generative models, Langchain, and LLMs for various communication channels, resulting in a 20% higher first-time issue resolution rate and a 25% decrease in escalations.
- Collaborated with designers and product managers to deliver polished products with a seamless user experience, meeting customer requirements.
- Implemented efficient resource allocation strategies and optimized cloud-based services, achieving a 10% reduction in infrastructure costs.

Software Engineer

Jul 2019 – Jul 2021

Persistent Systems

Goa, India

- Led a team of junior developers, enhancing code quality by 30% and fostering professional growth through mentorship and support.
- Conducted thorough code reviews, enforcing best practices and standards, resulting in a 25% improvement in code quality and compliance with industry guidelines.
- Collaborated seamlessly with engineers, designers, and product managers to deliver innovative software solutions, surpassing customer expectations and boosting user satisfaction by 15%.
- Managed the successful implementation of a large-scale web application, meeting deadlines and budget constraints, and achieving 90% of project milestones.
- Implemented Agile and Test-Driven Development (TDD) methodologies, prioritizing user stories, conducting comprehensive testing, and optimizing development cycles, leading to increased customer satisfaction.

PROJECTS

YouDescribe (The Smith-Kettlewell Video Description Research) | ReactJS, TypeScript, Python

- Part of YouDescribe for universities, making educational materials accessible to blind students.
- As a key contributor to the ML-Assisted caption generation system, optimized GPU utilization to improve system performance by 30%, resulting in faster video description creation times.

LegalEaseBot | ReactJS, TypeScript, LangChain, RAG (Retrieval Augmented Generation)

- Streamlined user interaction with legal documents and terms of service, enhancing accessibility and comprehension through intuitive design and user-friendly features.
- Successfully drew over 300 unique visitors weekly for the website.

Material-UI Grouped Table (Open-Source NPMJS package) | ReactJS, TypeScript, MaterialUI

- A customizable NPM module for creating grouped tables using Material UI. Key features include sorting, filtering, pagination, and customizations.
- Peak usage of 600 downloads/week.

EDUCATION

San Francisco State University

Dec 2023

Master of Science, Computer Science (GPA: 3.85)

San Francisco, CA
