

YASWANTH POTNURU

SOFTWARE ENGINEER

+1 513-888-2668 | yaswanth9399@gmail.com | [LinkedIn](#) | [yaswanth9399](#) | [OpenToRelocate](#)

PROFESSIONAL SUMMARY

- **Full-stack .NET Developer** with **5 years** of experience building scalable web applications using **.NET Core (3.1/6/7/8), .NET Framework (4.5+), C#, Angular, and React**.
- Proficient in backend **API development, microservices architecture**, and integrating RESTful and legacy SOAP/WCF services.
- Strong database skills with **SQL Server, PostgreSQL, and MySQL** expert in query optimization, **T-SQL, stored procedures**, and indexing.
- Skilled in front-end technologies: **ASP.NET MVC/Web Forms, Angular, React, Bootstrap, JS, jQuery, HTML5, CSS3**.
- Hands-on with **CI/CD** pipeline automation using **Azure DevOps, Jenkins, TFS, Git** for smooth, secure deployments.
- Solid knowledge of **OOP principles** (Inheritance, Polymorphism, Abstraction) and design patterns like Singleton, Factory, Repository.
- Strong in application security, with **JWT integration, role-based access control**, and experience in writing comprehensive unit tests (**NUnit, xUnit**).
- Agile team member with experience in **sprints, code reviews**, and **stakeholder collaboration**.
- Adept at debugging, troubleshooting, and supporting enterprise applications across cloud platforms (**Azure, AWS, GCP**).
- Proficient in development tools and environments: **Visual Studio (2017–2022), SQL Server Management Studio, VS Code, JIRA, and Postman**.

TECHNICAL SKILLS

- **Programming Languages:** C#, TypeScript, JavaScript, Python, Java, C/C++
- **Web & Front-End Frameworks:** ASP.NET Core, .NET Framework (MVC, Web API, Razor Pages, Blazor), Angular, React, HTML5, CSS3, Bootstrap, SASS/SCSS, jQuery, AJAX
- **Desktop Applications:** WinForms, WPF
- **Databases & ORM:** SQL Server, T-SQL, PostgreSQL, MySQL, Oracle, ADO.NET, Entity Framework, Stored Procedures, TOAD
- **Cloud & DevOps:** Azure (App Services, Functions, SQL), AWS (EC2, S3, RDS, Lambda, IAM), GCP (Cloud Run, GKE), Docker, Kubernetes, Jenkins, Azure DevOps, GitHub Actions, CI/CD Pipelines
- **Tools & IDEs:** Visual Studio (2017–2022), VS Code, Postman, JIRA, Power BI, Jupyter Notebook
- **Version Control:** Git, GitHub, Bitbucket, TFS, SVN
- **Testing & Debugging:** NUnit, xUnit, Selenium, Postman, JMeter
- **Architecture & Methodologies:** Agile (Scrum, Kanban), Microservices Architecture, Test-Driven Development (TDD), Behavior-Driven Development (BDD)
- **API & Protocols:** RESTful APIs, SOAP, gRPC, OpenAPI (Swagger)
- **Other:** Microsoft Excel, PowerPoint, API Monitoring Tools, Visual Studio Extensions

WORK EXPERIENCE

Software Engineer – Uber, USA **March 2025 – Current**

- Engineered **.NET Core microservices** integrated with RESTful APIs, improving system scalability and reducing backend latency by **25%**.
- Optimized **SQL Server queries** and **Entity Framework workflows**, cutting API response time by **200ms**.
- Built **React.js internal tools** to monitor microservices in real-time, visualizing deployment health, API metrics, and logs via integrated .NET Core APIs.
- Managed CI/CD pipelines, sprint planning, and version control using **Azure DevOps** and **TFS**, ensuring reliable releases and traceable task tracking.
- Maintained **SSRS reports** for operational insights, enhancing decision-making through clear business data visualization.
- Implemented **async/await** in **C#** to enable non-blocking I/O, improving application responsiveness under high load.
- Ensured high code quality and test coverage by integrating **static analysis tools** and following **SOLID principles**, reducing post-deployment bugs by **30%**.
- Participated in Agile ceremonies including **sprint planning, backlog grooming**, and **retrospectives**, ensuring technical delivery aligned with business expectations.
- **Communicated effectively** with cross-functional teams and stakeholders, translating technical solutions into clear business terms and ensuring alignment on deliverables.

Software Engineer - PPC, Kentucky, USA **May 2024 - Dec 2024**

- Developed a scalable **financial tracking system** using **ASP.NET WebForms, Angular (TypeScript)**, and **SQL Server**, improving data accuracy by 70% and applying SOLID principles for maintainable architecture.
- Refactored legacy **.NET Framework 4.8 applications** to **.NET 6**, enhancing performance, security, and long-term maintainability across enterprise modules.
- Deployed applications to **AWS EC2** and merged Amazon **S3** for secure cloud storage, ensuring 90% uptime and scalable infrastructure.
- Constructed a real-time auction platform using **SignalR, WebSockets**, and **payment gateway APIs**, enabling secure live bidding and transactional reliability.
- Modeled secure claims forms using **ASP.NET WebForms (.aspx)** and **ADO.NET** for the **FIRST (Financial Institutional**

- **Regulatory System Tracking**) project, ensuring transactional integrity with SQL Server.
- Contributed to the ABC project by building **Form Services**, **Event Services**, and generating **SSRS** reports using **ASP.NET MVC**, enhancing compliance visibility.
- Optimized SQL data processing by creating stored procedures in **SQL Server Management Studio (SSMS)** and **TOAD**, reducing manual intervention.
- Built **WCF** services with **Entity Framework** and **LINQ**, improving response time by 35%.
- Used **TFS** for version control, coordinated with stakeholders in **Agile sprints**, and authored internal technical documentation and developer onboarding guides.

Software Engineer - TATA Consultancy Services, India

Jun 2021 – Aug 2023

- Designed and developed enterprise web applications using **ASP.NET Core**, **C#**, and **ADO.NET**, improving data processing efficiency by 40%.
- Resolved production issues using **Azure Application Insights**, improving reliability by implementing preventive root-cause fixes.
- Built event-driven workflows with **Azure Functions**, enabling serverless execution and reducing response time by 40%.
- Developed a health insurance web app using **ASP.NET MVC** and **Angular**, increasing usability by 25% based on stakeholder feedback.
- Applied dependency injection and modular routing in **Angular**, boosting maintainability and reducing UI bugs by 15%.
- Created and consumed **RESTful APIs** using **ASP.NET Web API**, enabling real-time communication between frontend and backend systems.
- Designed and optimized **stored procedures**, **triggers**, and **views** in **SQL Server** for complex reporting and transaction processing.
- Refactored **legacy desktop modules** into modern **WPF** architecture, enhancing UI responsiveness by 30%.
- Automated CI/CD using **Azure DevOps** and **Jenkins**, reducing deployment time from 2 hours to 30 minutes.
- Deployed **.NET Core microservices** to **Google Cloud Platform (GCP)** using GKE, Cloud Run, and Cloud Storage, improving scalability by 35%.
- Implemented **JWT** authentication and role-based access control (RBAC), securing over 95% of user sessions.
- Led code reviews and enforced clean architecture guidelines, reducing technical debt by 25%.
- Collaborated with QA and DevOps teams to build test plans, execute regression testing, and implement automated deployments via Azure DevOps.

Software Engineer - Keka HR (Start-up), India

Oct 2020 - Jun 2021

- Architected and developed web applications using **ASP.NET Core**, **C#**, and **React** for HR and healthcare clients, supporting modules like **employee onboarding**, **health claims**, and **payroll**.
- Connected RESTful APIs using **ASP.NET Web API** to enable real-time data exchange between front-end systems and backend services, improving system responsiveness and interoperability.
- Improved database performance by **optimizing 80+ SQL Server queries** and **stored procedures**, reducing data load times by up to 40% in reports and dashboards.
- Automated key workflows such as benefits enrollment and claim processing using **Azure Functions**, cutting manual operations, and **processing time by 50%**.
- Refactored legacy desktop systems into modern **WPF-based** applications, improving UI performance and maintaining continuity for 10+ internal tools.
- Crafted reusable front-end components using **Angular (v6+)** and **React** with modular routing, reducing UI bugs and enhancing maintainability.
- Implemented **JWT-based authentication** and **role-based access control** to ensure secure data access in compliance with HIPAA and enterprise standards.

EDUCATION

University of Cincinnati

Master of Engineering, Computer Science

GPA – 3.96/4

Aug 2023 - Dec 2024

Coursework: Operating Systems, Cloud Computing, Adv. Methods in Machine Learning, Requirements Engineering, Data structures & algorithms, Artificial Intelligence.

Vignan’s University

Bachelor's, Computer science

GPA: 3.67/4.00

Aug 2017 - May 2021

Coursework: Object-Oriented Programming System, Operating System, Probability and Statistics, C Programming, Data Structures, Web Technology, Linux Programming

CERTIFICATIONS

- Azure Administrator Associate (AZ-900)
- AWS Solutions Architect [\[Certification\]](#)
- Agile Scrum Master [\[Certification\]](#)
- B2C Commerce Developer
