

Yaswnth Eranyakula

HEALTHCARE DATA ANALYST

Celina, TX | (940)-440-3434 | yaswnth.eranyakula@hotmail.com

PROFESSIONAL SUMMARY

Healthcare Data Analyst with 5+ years of experience driving actionable insights from complex healthcare datasets. Expert in SQL, Python, Power BI, and Tableau, with hands-on knowledge of EHR/EMR, claims, population health, and cost optimization. Adept at building ETL pipelines, predictive models, and automated dashboards to support HIPAA-compliant, data-driven decision-making. Proven ability to collaborate with clinical, operational, and IT teams to improve patient outcomes, reduce operational costs, and optimize healthcare programs.

TECHNICAL SKILLS

Data Management & Analytics: ETL Pipeline Development, SQL (Joins, CTEs, Window Functions), Python (Pandas, NumPy, Seaborn), R, Data Cleaning & Transformation, Predictive Modeling, Cohort Analysis, Regression & Time Series

Healthcare Expertise: EHR/EMR Data Analysis, Claims & Utilization Metrics, Patient Outcomes, Population Health, Cost & Revenue Optimization, Quality Reporting

Visualization & BI Tools: Power BI (DAX, Power Query), Tableau, Excel (Pivot Tables, Power Query), Google Data Studio

Databases & Cloud Platforms: Azure SQL, MySQL, PostgreSQL, Oracle, Google BigQuery

Compliance & Governance: HIPAA, Healthcare Reporting Standards, Data Security, Privacy Management

Collaboration & Project Tools: JIRA, Confluence, MS Teams, Azure DevOps, SharePoint

PROFESSIONAL EXPERIENCE

Healthcare Data Analyst | UnitedHealth Group, Colorado Springs, CO

Jul 2024 - Current

- Designed and optimized ETL pipelines to consolidate claims and EHR datasets, improving report accuracy and reducing processing time by 30%, enhancing operational efficiency.
- Built interactive Power BI and Tableau dashboards to monitor patient outcomes, utilization metrics, and cost trends, enabling leadership to make actionable, data-driven decisions.
- Conducted cohort analysis, regression modeling, and predictive analytics to identify high-risk patient populations and recommend preventive care interventions, reducing avoidable readmissions.
- Automated reporting and KPI dashboards using SQL and Python, eliminating repetitive manual tasks, saving 30% of team hours, and accelerating strategic decision-making.
- Collaborated with clinical, operational, and IT teams to validate, standardize, and maintain HIPAA-compliant datasets, ensuring accurate and secure data governance.
- Developed performance metrics and executive dashboards to track healthcare program effectiveness, supporting cost optimization, patient outcome improvement, and long-term strategic planning.
- Supported ad-hoc analytics requests by creating reusable Python and R scripts, providing rapid insights for operational and clinical teams across multiple departments.

Junior Healthcare Data Analyst | HealthMinds Consulting, India

Oct 2018 - Dec 2022

- Assisted in the development of ETL pipelines and validation of claims and patient datasets, improving reporting accuracy by 25% and streamlining healthcare operations.
- Developed Power BI dashboards to visualize population health, utilization metrics, and cost trends, enabling client teams to make informed operational and strategic decisions.
- Performed cohort analysis, regression, and time series modeling to guide healthcare cost optimization, resource allocation, and preventive care initiatives for multiple clients.
- Conducted rigorous data cleansing, transformation, and quality assurance checks to maintain HIPAA compliance and ensure integrity of sensitive healthcare datasets.
- Collaborated with clinical and operational teams to define KPIs, streamline reporting workflows, and implement data-driven strategies for improved program effectiveness.
- Automated repetitive analytics tasks using SQL and Python scripts, improving efficiency and reducing manual effort while maintaining high data accuracy.

PROJECTS

Healthcare Data Analytics & Insights Project | i-HiddenTalent

- Built ETL pipelines consolidating EHR and claims data, ensuring HIPAA compliance and high data accuracy.
- Developed Power BI and Tableau dashboards to track patient outcomes, utilization trends, and cost metrics, providing actionable insights for leadership.
- Conducted cohort analysis and predictive modelling to identify high-risk patient groups, supporting preventive care and population health initiatives.
- Automated reporting using SQL and Python, reducing manual effort by 30% and improving decision-making speed.

EDUCATION

Master of Sciences in Advanced Data Analytics | University of North Texas, Denton, TX
