

JASMIN LEE

BUSINESS/DATA OPERATIONAL ANALYST

PROFESSIONAL OVERVIEW

Detail-oriented and results-driven Data Operations Analyst with a strong background in data management, process optimization, and system support. Skilled in analyzing complex datasets, ensuring data integrity, and streamlining workflows to enhance operational efficiency. Proven ability to collaborate across teams, support UAT testing, and implement scalable solutions that align with business goals.

WORK EXPERIENCE

Data Operational Analyst

Ansys – Insight Global Contract, Remote | 2025 – present

- Support UAT testing and bug tracking by analyzing test data and documenting findings for system enhancements.
- Maintain and troubleshoot databases and data pipelines, ensuring consistent data flow and system performance.
- Ensure compliance with data privacy regulations and internal governance policies
- Collect, clean, and interpret data from multiple internal and external sources to support business and technical decision-making.
- Collaborate with cross-functional teams including engineering, IT, and marketing to ensure effective data usage and alignment with strategic goals.
- Develop and implement data collection and validation processes to improve data quality and operational efficiency.

CSR/Documentation Analyst

J&B Medical, Remote | 2024 – 2025

- Document customer interactions, feedback, and resolutions accurately in CRM systems to ensure data consistency and traceability.
- Collaborate with internal teams to resolve customer issues and escalate complex cases as needed.
- Maintain and update internal documentation, including process guides, FAQs, and training materials.
- Analyze customer service data to identify trends, improve response times, and enhance overall service quality.
