

KANFIDINI JACQUES OUALI

PROFESSIONAL SUMMARY

As a data scientist with a passion for extracting insights from complex datasets, I am seeking opportunities to leverage my analytical skills and domain knowledge to drive data-driven decision-making in a dynamic organization. Driven Data Science Intern ready to thrive in demanding digital intelligence processing environments. Well-informed on latest machine learning advancements. Ready to combine tireless hunger for new skills with desire to exploit cutting-edge data science technology. Precocious Data scientist ready to accept increasingly complex challenges associated with maintaining and exploiting growing data stores. Driven to expand experience through hands-on training and guided participation in effective data management tasks. Ready to immediately contribute beneficial input to employers. Meticulous Data Scientist accomplished in compiling, transforming and analyzing complex information through software. Expert in machine learning and large dataset management.

SKILLS

- Performance data synthesis
 - Sentiment analysis
 - Association rule learning
 - Time series analysis
 - Network analysis
 - Decision-making
 - Excellent communication
 - Teamwork and collaboration
 - Organizational skills
 - Written communication
 - Data aggregation processes
 - Attention to detail
 - Active listening
 - Teamwork
 - Team collaboration
 - Problem-solving
 - Relationship building
 - Data acquisitions
 - Critical thinking
 - Machine learning
 - Problem-solving
- Graph theory
 - Simulation modeling
 - Recurrent neural networks
 - Bayesian statistics
 - Deep learning
 - Statistical analysis
 - Time management
 - Analytical thinking
 - Interpersonal communication
 - Data governance
 - Problem-solving
 - Relationship building
 - Data acquisitions
 - Critical thinking
 - Data aggregation processes
 - Attention to detail
 - Active listening
 - Teamwork
 - Team collaboration
 - Data aggregation processes
 - Attention to detail

- Relationship building
- Data acquisitions
- Critical thinking
- Active listening
- Teamwork
- Team collaboration

WORK HISTORY

DATA ENTRY SPECIALIST 11/2018 to Current **New Cassel Retirement Center**, Omaha, NE

- Maintained strict confidentiality of sensitive information, adhering to established guidelines and protocols.
- Completed data entry tasks with accuracy and efficiency.
- Compiled data and reviewed information for accuracy prior to input.
- Contributed to team success by consistently meeting or exceeding performance targets in speed, accuracy, and output volume.
- Reduced errors in data records by conducting thorough quality checks and implementing corrective measures.
- Increased productivity through effective multitasking, prioritizing diverse workloads according to deadlines.
- Ensured timely and accurate delivery of reports by maintaining up-to-date databases and spreadsheets.
- Corrected data entry errors to prevent later issues such as duplication or data degradation.
- Scanned documents and saved in database to keep records of essential organizational information.
- Enhanced data accuracy by meticulously inputting and validating information from various sources.
- Expedited project completion timelines by efficiently managing high volumes of data entry tasks.
- Successfully managed fluctuating workloads due to seasonal variations or unexpected changes in staffing levels.
- Corrected data entry errors to prevent duplication or data degradation.
- Demonstrated versatility in handling multiple software platforms simultaneously, adapting quickly to new technologies as they emerged.
- Developed a system for organizing electronic files, improving overall document accessibility and retrieval times.
- Maintained files, records, and chronologies of entry activities.
- Verified data files prior to entry to maintain high data accuracy.
- Updated and maintained customer information, documents and records.
- Managed and organized documents for data entry tasks.
- Assisted with developing data entry processes.
- Managed documents by organizing forms, making photocopies, filing records, preparing correspondence, and creating reports.
- Checked for accuracy by verifying data and records.
- Used computer software to store and retrieve data.
- Created spreadsheets for more efficient recordkeeping.
- Followed data entry protocols, rules and regulations.
- Analyzed current data records to provide detailed reports.
- Developed and implemented data entry operations.
- Kept optimal quality levels to prevent critical errors and support team performance targets.
- Compiled, verified accuracy, and sorted information to prepare source data for computer entry.
- Compared transcribed data with source document to detect and correct errors.

DATA SCIENCE INTERN 03/2023 to 07/2023**Lewis and Clark Historic National Center, Omaha, United States**

- Mars 2023
- Worked collaboratively with cross-functional teams to gather requirements and define project objectives
- Cleaned and processed large-scale datasets using pandas and SQL to prepare them for analysis
- Developed and deployed machine learning models to address business challenges, such as customer churn prediction and demand forecasting
- Presented findings and recommendations to stakeholders through clear visualizations and reports.
- Optimized machine learning models for improved prediction accuracy and performance.
- Managed multiple projects simultaneously, demonstrating strong time management and prioritization skills under tight deadlines.
- Collaborated with cross-functional teams for better understanding of business requirements and objectives.
- Implemented data visualization techniques to effectively communicate insights to stakeholders.
- Evaluated model performance using various metrics, ensuring alignment with project goals and stakeholder expectations.
- Enhanced data processing efficiency by automating data collection and preprocessing tasks.
- Identified trends within large datasets, uncovering actionable insights for business growth opportunities.
- Developed custom algorithms to solve unique challenges in data analysis and modeling.
- Actively engaged in continuous learning opportunities – attending seminars, workshops, or webinars to acquire new skills and knowledge in the data science field.
- Participated in team brainstorming sessions to identify innovative solutions for complex problems facing the organization.
- Utilized programming languages such as Python or R extensively throughout the internship – applying relevant libraries and frameworks when appropriate.
- Applied statistical methods for robust analysis of complex datasets in various domains such as marketing, finance, or operations.
- Partnered closely with other departments – bridging gaps between technical nuances of Data Science and specific business needs.
- Conducted extensive research on cutting-edge techniques, staying current with industry advancements in data science.
- Streamlined data pipelines for seamless integration of new data sources into the existing system.
- Designed experiments to test hypotheses and validate model assumptions, refining analytical approaches as needed.
- Provided mentorship and guidance to fellow interns, fostering a collaborative work environment.
- Maintained detailed documentation of project progress, methodologies employed, and results obtained – facilitating knowledge transfer across teams.
- Presented findings and recommendations to senior leadership, influencing strategic decision-making processes.
- Assisted in curating high-quality datasets through rigorous cleaning and validation processes, ensuring reliable inputs for analysis.
- Translated cost and benefits of machine learning technology for non-technical audiences.
- Created data visualization graphics, translating complex data sets into comprehensive visual representations.

- Used SAS, SPSS and Python to manage and analyze large data sets.
- Used rapid application development tactics during programming phases.
- Took notes during meetings to better understand project initiatives and to distribute to stakeholders.
- Performed advanced data extraction and data manipulation.
- Assisted with creating and updating training materials for personnel use.
- Developed and established strong business relationships with both internal personnel and external solution providers.
- Collaborated with business partners to understand business objectives.
- Identified, analyzed and interpreted trends in complex data sets using supervised and unsupervised learning techniques.
- Shadowed database personnel to learn new methods to achieve job duties.
- Maintained schedules of client interactions and project delivery dates.
- Applied appropriate data science techniques to solve business problems.
- Developed and coded software programs, algorithms and automated processes to cleanse and evaluate large datasets from multiple disparate sources.
- Modeled predictions with feature selection algorithms.
- Applied loss functions and variance explanation techniques to compare performance metrics.
- Leveraged mathematical techniques to develop engineering and scientific solutions.
- Developed polished visualizations to share results of data analyses.
- Improved data collection methods by designing surveys, polls and other instruments.
- Helped develop database solutions using multiple SQL languages.
- Pinpointed meaningful insights from large data and metadata sources.
- Created data mining architectures and models to identify trends in large data sets.
- Brainstormed with data personnel to define data modeling standards for projects.
- Participated in workshops to advance skills.
- Performed data administration duties for databases.
- Devised and deployed predictive models using machine learning algorithms to drive business decisions.
- Analyzed large datasets to identify trends and patterns in customer behaviors.
- Compiled, cleaned and manipulated data for proper handling.
- Implemented randomized sampling techniques for optimized surveys.
- Ran statistical analyses within software to process large datasets.

EDUCATION

Maryland University Global Campus, Maryland
Bachelor of Science, Data Science, 01/2022

Metropolitan Community College, Omaha, NE
Associate of Science, General Studies, 05/2020

ACCOMPLISHMENTS

- Predictive Maintenance Model
- Developed a machine learning model to predict equipment failures in a manufacturing plant, resulting in a 20% reduction in downtime and maintenance costs
- Customer Segmentation Analysis
- Conducted exploratory data analysis on customer transaction data to identify patterns and segments
- Applied clustering algorithms such as K-means and hierarchical clustering to

- Utilized historical sensor data and maintenance logs to train the model using Python and scikit-learn
- Implemented the model in a production environment using Docker and Kubernetes for scalability
- group customers based on their purchasing behavior
- Presented actionable insights to the marketing team, leading to targeted promotional campaigns and a 15% increase in sales.

AFFILIATIONS

- New Generation Student (TRIO)

CERTIFICATIONS

- Oracle Database SQL Certified Associate Certification- Oracle Corporation.
- Machine Learning Engineer Nanodegree Program- Udacity.
- R Programming Language Certifications (various providers).
- Advanced Machine Learning Specialization- National Research University Higher School of Economics via Coursera.
- SAS Certified Advanced Analytics Professional Using SAS 9 - SAS Institute Inc.
- Tableau Desktop Qualified Associate Certification - Tableau Software.
- MongoDB Certified Developer, Associate Level – MongoDB Inc.
- Certified Analytics Professional (CAP) - INFORMS.
- Tableau Desktop Specialist Certification - Tableau Software.
- Excel to MySQL, Analytic Techniques for Business Specialization Certificate- Duke University via Coursera.
- Deep Learning Nanodegree Program- Udacity.
- AWS Certified Big Data – Specialty Certification - Amazon Web Services (AWS).
- CompTIA Certification
