Dedicated, results-driven and self-taught with a strong passion for Python programming. Possessing a solid foundation in Python, along with hands on experience working with database management and web development. Adept at collaborating in team environments, demonstrating excellent problem-solving skills, and continuously seeking opportunities for skill enhancement. Eager to leverage my technical expertise and enthusiasm for software development to contribute effectively as an entry-level Python developer.

Experience

Certifications in Python

Skills

Python 3

TKinter

Object Oriented Programming

Pandas

DataBases

Context Managers

Turtle

Numpy

SQLite

HTML, CSS, Javascript

UnitTests

GitHub

Tic-Tack-Toe Game:

- Demonstrated strong problem-solving skills by addressing edge cases and ensuring smooth gameplay throughout.
- Contributed to the development of fundamental programming skills and understanding of game development principles.
- Highlighted proficiency in Python programming and software development through the creation of an enjoyable and functional game application.

Password Manager App with TKinter:

- Designed and implemented a password generator that created strong randomized passwords with a mix of letters, numbers and symbols.
- Implemented data storage and retrieval functionality using JSON files, allowing users to save and retrieve login information securely.
- Demonstrated problem-solving skills efficiently handling exceptions.
- Conducted testing and debugging to guarantee the apps stability.

Turtle Pong Game:

- Utilized OOP principles to create organized and maintainable code by encapsulating game elements in separate classes.
- Achieved code modularity, making it easy to expand and modify the games features, and enhancing code readability and maintainability
- Incorporated realistic ball physics and collision detection, creating challenging gameplay that requires strategic paddle control and improving overall user satisfaction.

Education

Online Resources -

Coursera

Udemy

Codecademy

Sololearn

DataCamp

Student / Certifications

May 2022 - Current, San Diego, CA

I have cultivated my Python programming skills through a self-directed and proactive approach to education. Being self-taught, I am a firm believer in the power of online resources and have been consistently advancing my skills through online courses, tutorials and hands-on projects to master the language. Using platforms such as Coursera, Udemy, Codecademy, Sololearn, and DataCamp.

Southwestern Illinois College / AS
