PROFESSIONAL SUMMARY

Experienced Business Data Analyst over 5 years with a Master's degree in Engineering Management. Skilled in Business Analytics, Data Analytics, Data Reporting, Data Visualization, Teamwork, C#, R, SQL, Python. Proficient in Tableau Visualizations and dashboard reporting using Tableau Desktop and Microsoft Power Bi. Proficient in writing MSSQL queries for investigative and report purposes with expertise in Agile SDLC methodologies. Knowledge of Database creation including multiple table creation with constraints, triggers, procedures in MSSQL. Background in business and technical requirement elicitation, documentation, and presentation. Proficient in MS Office suite, MS Visio, Jira, Confluence, Splunk, Trello. Ability to interact and collaborate with external/internal stakeholders at all levels.

EXPERIENCE

Business System Analyst | Hilton | Contract

Jan 2024-present

- Managed \$5.4M HSM budget for an enterprise Hilton Supply Management (HSM) Tableau analytics redesign project by calculating forecasts and monitoring expenditures.
- Responsible for developing reports in Business Objects to monitor production performance that are presented to upper management on a weekly basis. Gathered requirements from international regions to develop the appropriate reports for Invoice adjustment teams.
- Used SDLC and Agile with Scrum methodology throughout the project, involved in biweekly release managements.
- Carried API testing to compare the replacement of current Webservices in use for improved security.
- Monitoring existent metrics, analyzing data, and partnering with internal teams to identify process and system improvement opportunities.
- Performed User Acceptance Testing (UAT) and deployment for end-clients with step-by-step instructions.
- Prepared Business requirement document (BRD) and functional requirement document (FRD) for enhancements of existing services then translating it into functional specifications, user stories and test plans into Azure DevOps.
- Collaborated with QA for testing of products and solutions and created test cases for multiple applications.
- Created Epics, User stories and tasks in Jira for the team to track their work through completion.
- Utilize joins and subqueries to simplify complex queries involving multiple tables while optimizing procedures to be used in day-to-day operations.
- Proficient knowledge of project and software development programs such as Azure DevOps for backlog management.
- Customized Jira workflows, custom fields, and dashboards to align with cross-functional teams' unique requirements.

Environment: **Confluence, Jira, BRD, FRD, MySQL, SSRS, SSIS, Azure Cloud, User-story development.**

Technical Business Analyst | Versa Shore Inc | CA, USA. (Remote)

Feb 2023-Dec 2023

- Collected, cleaned, and analyzed large datasets from various banking systems, including transactional data, customer information, and financial statements.
- Assisted in developing and enhancing banking products and services based on customer behavior analysis and market trends.
- Specialized in creating, analyzing, validating business requirements, transforming them into detailed functional requirements and user stories. Translated requirements into detailed user stories, maintaining focus on end-user value.
- Used ETL tool (Snowflake) to ensure accurate, reliable, and high-quality data is available for analysis and decision-making purposes.
- Support the testing of global invoicing standard formats of EDI, XML, and flat files. Interpreting data and results based on the analysis of information and application of professional judgment.
- Supporting cross-functional teams on the day-to-day execution of the existent program implementation.
- Conducted rigorous analysis, including cost/benefit analysis, impact analysis, risk analysis, and SWOT analysis, to evaluate project feasibility, identify potential issues, and provide data-driven recommendations.
- Designed and prototyped user experiences using Figma resulting in initiative and visually appealing interfaces that enhanced user satisfaction.
- Conducted user acceptance testing (UAT) and facilitated end-user training sessions.
- Experience in writing Splunk queries, searching, monitoring, analyzing and visualizing Splunk logs for better understanding of application performance.

Environment: **Requirements gathering, Figma, Design documentation, User-story creation, Business story requirements, Splunk.**

Quality Specialist (Program Operations and People Management) | Amazon | India**Sept 2020-Nov 2021**

- Modified SOPs and automated MIS reports with Hubble, boosting efficiency and productivity.
- Single point of contact (SPOC) for multiple projects, handled end-to-end use cases in last mile and logistics and collaborated with 5+ cross-functional teams and 10+ stakeholders to improve QA standards.
- Worked with the SRM team for vendor negotiation/selection, and documentation of the processes. Experience with testing management tools: Visual Studio Test Pro, Jenkins.
- Created ETL packages using diverse data sources such as SQL Server, Flat Files, Excel, XML, etc., and loaded the data into Target tables.
- Developed a machine learning model to automate repetitive tasks using Excel, SQL, Jenkins, internal tolls, and Ad hoc, resolving address issues across 8+ countries, resulting in positive customer feedback.
- Strong experience in implementing ERP system for integration and alignment within a manufacturing process.
- Built platform features, user stories, and maintain the backlog with priorities using Jira platforms.
- Led requirements , gathering sessions and produced user stories resulting in a 20% increase in project efficiency.
- Used UML methodology in creating UML Diagrams such as Use Cases, Sequence Diagrams, State Diagrams, activity Diagrams and business process and workflows.
- Reviewed Functional Design Specification (FDS) documents to identify problems and solutions Collaborated with testers to ensure documents met DoD.

Environment: Trello, CRM, Excel, JSON, CSV files, Jenkins, Hubble, ERP, UML.**Business Operations Analyst, | Cognizant | India****June 2019-Sept 2020**

- Participated in Software Development Life Cycle (SDLC) utilizing various methodologies, such as Waterfall, to deliver high-quality software solutions.
- Designed custom Jira Dashboards using unique JQL to identify potential risks, track work against roadmap, and showcased team performance through metrics.
- Worked with 3 Product Owners in adopting Agile mindset by combining work from several sources into a unified Product Backlog supporting strategic business initiatives.
- Utilized Agile Software Methodology using Scrum framework and lead the planning and execution of agile teams and actively participate in creating the user stories and prioritizing user stories along with tracking of burn up, burn down charts to estimate sprint delivery.
- Involved in Sprint planning meetings to prioritize backlogs for design and development. Also, participated in Sprint review and retrospective meetings to identify gaps in project and address them in subsequent sprint cycles.
- Developed seven different user stories for new subscription products, leading to a more focused marketing copy that resulted in an ROI increase of 16%.
- Proficient in using SQL Server to extract, transform, and analyze complex datasets, providing valuable insights that support business strategies and decisions.
- Specialized in the development and maintenance of key performance indicator (KPI) dashboards, providing real-time visibility into critical metrics using Microsoft Power BI, Tableau, Qlik.
- Proficient in SAP implementation, successfully deploying SAP solutions for various modules to streamline business processes and improve operational efficiency.
- Utilized SSRS to generate comprehensive reports that displayed relevant organizational information and provided insights for data-driven decision-making.

Environment: Visual Basic, Software Development Life Cycle (SDLC), Scrum, Jira, Visio, BRD, FRD, IT Business Analysis, Agile Methodologies, SQL Server Reporting Services (SSRS), Microsoft Power BI, Tableau.**Business Data Analyst Intern, | SLRI Solutions | India****June 2018-June 2019**

- Created reusable ETL components, reducing data analysis time by one week, resulting in a 63% revenue increase and real-time visibility into 17 critical performance categories.
- Utilized Azure Data Factory pipeline to pull data from semi-structured data sources, including CSV and JSON files, both on-premises and in the cloud.
- Implemented Python and libraries such as NumPy, Pandas, and Matplotlib for efficient data analysis and visualization to inform data-driven decision-making.
- Visualized the model in Tableau to derive dependent variables and gain further insights on customer engagement, resulting in a 30 % increase in the digital platform traffic.
- Conducted in-depth requirements analysis for NextGen Health provider, utilizing tools like JIRA and Confluence and implemented data-driven solutions, leveraging SQL for database querying and reporting.
- Created, troubleshooted, managed, and deployed SSRS reports and created subscriptions for customers as required.
- Monitored SSIS packages validation, error handling, optimization, and deployment. Designed and developed complex SSIS packages to migrate data from multiple sources and Power BI to Azure Data Factory and Azure

SQL databases.

- Created reports using Power BI and had some experience using the Azure Cloud. Worked on data migration projects, moving data from SQL Server to the Azure Cloud.

Environment: **Data Analytics, Microsoft SQL Server, MySQL, SSRS, SSIS, Azure Cloud, User- story development.**

PROJECTS

- **Used Medical Student Database and Implementation:** Worked on a medical student database with student, program, task, and enrollment information. By combining attributes, I created a student management database. This project used an entity-relationship diagram (ERD) and Tableau to show data from certain tables.
- **Customer Churn Prediction in the Banking Industry using Azure Machine Learning:** The primary goal is to reduce customer churn, stabilize the banking business, and increase the profits in the banking industry. I have used a two-class support vector and two-class logistic regression models to predict the exited variable based on the available data set. By evaluating the model and analyzing the results, got the highest accuracy for the two-class logistic regression model.
- **Statistics of Detective Comics (DC) and Marvel Comics using Power BI:** Created visualizations on the trend of movies released by each franchise per year, worldwide box office collections, and percentage returns for a movie with a franchise. Created dashboards by considering different parameters in such a way that even a layman can understand the patterns and analysis by having a glimpse at the dashboards.

SKILLS

- **Data Integration Tools:** SSIS, Azure Data Factory
- **Reporting Tools:** SSRS, Power BI, Tableau, Excel, Jenkins.
- **Database Management:** Microsoft SQL Server, MySQL, Hubble, Datadog.
- **Programming Languages:** SQL, Python, Splunk.
- **Data Analysis:** Data Mining, Regression Analysis, ML models
- **Project Management:** Agile, JIRA, Scrum, Kanban, Agile Software Development.
Green Six Sigma certified, Certified Scrum Master

EDUCATION

Master's, Engineering Management
