EDUCATION

University of Utah, David Eccles School of Business

Master of Science in Business Analytics (BI and Data Analytics)

Salt Lake City, Utah

Aug 2019

- **Related Coursework:** Marketing analytics, Data Mining, Statistics and Predictive Analytics, Digital Marketing analytics, Machine Learning with Large Datasets (Scalable ML), Data Visualization, Database Design, Datawarehouse

Jawaharlal Nehru Technological University Hyderabad

Bachelor of Technology in Information Technology

Hyderabad, India

May 2016

TECHNICAL SKILLS

- **Data mining tools:** Python (NumPy, Pandas, Matplotlib, Seaborn), Jupyter Notebooks, R programming
- **Databases/Big data:** Snowflake, MySQL, HeidiSQL
- **Statistical analysis:** Linear/ Logistic Regression analysis, Hypothesis testing, A/B testing, Forecasting
- **Business Intelligence:** Tableau, Visualization & Story Telling, Google Analytics, Tag Manager

PROFESSIONAL EXPERIENCE

Senior Data Analyst (Product Analytics) | Constant Contact Remote

October 2022 – Present

- Identified and harvested data sources from Snowflake, My SQL Databases and Google Analytics.
- Wrote complex scripts in SQL to pull, clean and aggregate the data.
- Built statistical models using R or Python to help identify relationships between customer attributes and feature usage.
- Collaborated with Product Managers to recommend and establish KPIs to be used to assess product feature adoption.
- Provided ad-hoc and ongoing reports using Tableau on customer behaviors and product usage during the entire customer lifecycle.
- Worked with the User Experience teams to get a better understanding of our customers by combining their qualitative data (obtained from surveys, interviews, test panels) with our quantitative data.
- Participated in Customer Panels and one on one customer (virtual) visits to get a personal understanding of our customers, their businesses, their needs and how they use our products to be successful.
- Measured the success of product marketing communications, webinars, A/B tests using product data to determine if customers have been influenced to try different features.

Senior Data Analyst | ThomasArts Holding Salt Lake City, Utah

September 2019 – Sept 2022

- Combined statistics, data analysis, and machine learning to drive innovative marketing strategies, improve consumer experience, and transform the way clients and account teams interact with data.
- Analyzed online and offline consumer behavior, preprocessed structured and unstructured data, built predictive models and machine-learning algorithms to find a story in the data. Developed visualizations for client presentations in Tableau.
- Build and/or maintain internal tools for advanced analytics including attribution modeling, regression analysis, and NLP.
- Worked with data management team to structure raw data into transactional database tables to be used with visualization software (Tableau) and other analysis tools (R, Python, IBM Watson).
-

Data Analyst Intern| USANA Health Sciences Salt Lake City, Utah

May 2019 – Aug 2019

- Designed and developed an estimator for Marketing team to forecast web-page views and track ROI.
- Developed an interactive dashboard (Bokeh web app) to monitor web traffic KPI's (CPC, CPA, CPM) from Google Analytics.
- Built an innovative model to predict the probability of purchase across Product categories. Derived business insights for SEO.

PROJECTS

Customer Journey Analytics

- Involved in end-to-end life cycle of marketing and A/B testing campaigns to market customer products.
- Determined the effectiveness of product category sites and recommended bundled pricing to improve customer conversion rate.
- Implemented a text classification algorithm for Customer demographic data using Naïve Bayes with an accuracy of 84.7 %.

T:P Softness-

- Developed trailer activity dashboards with KPI's that are compliant with the Data visualization Review Framework to investigate the drop in conversions YoY.
- Prepared complex SQL queries to extract underlying data which feeds the dashboard.

Vision Service Plan- Prospect Intent Model

- Involved in a five phase Machine Learning project which drove the highest revenue of the agency in 2020-2021.
- Developed a predictive model to examine the performance of audiences and identify user context and intent with 82% accuracy.
