PROFILE

A seasoned Full Stack Java Developer with a Master's degree and over 4+ years of experience in designing and implementing scalable and robust software solutions. Proficient in both frontend and backend development, I excel in creating seamless and dynamic web applications.

PROFESSIONAL EXPERIENCE

Amazon, Seattle | Software Developer Engineer

Oct 2022 - present

- Developed and implemented a critical API, boosting seller engagement on pricing updates through enhanced notification mechanisms.
- Spearheaded the creation of dynamic, user-friendly interfaces using React JS, focusing on optimal performance and engaging user experiences through innovative UI practices.
- Orchestrated collaborations with multiple teams to define, analyze, and execute project requirements, ensuring successful delivery of batch processing systems, database designs, and backend API functionalities.
- Managed the deployment of Lambda infrastructure across four AWS regions to support critical services (Amazon MQ and MSK), incorporating automation to reduce dependencies and streamline deployment processes.
- Leveraged AWS Lambda for serverless function execution to address event-driven tasks, improving system efficiency and reducing operational costs, complemented by proactive system monitoring via Amazon CloudWatch.

Perfexion Information Technologies, Hyderabad | Software Engineer

June 2019 – April 2021

- Spearheaded the BCDR Migration Project, upgrading from Java 8 with Maven to Spring Boot 3, incorporating Spring Cloud, Gradle, and Java 17 to modernize and enhance application performance. Analyzed and migrated 4 repos to newly k8s deployable applications.
- Designed and implemented comprehensive testing strategies, utilizing tools like JUnit and Mockito to ensure the reliability and stability of the new feature.
- Implemented AWS S3 for secure and efficient storage of 3D models and user-generated content, facilitating quick data retrieval and optimal performance.
- Utilized AWS Lambda and API Gateway to create serverless APIs, enhancing the application's scalability and reducing operational overhead.

Tejoma Technologies PVT LTD, Hyderabad | Software Developer Intern

October 2018 – April 2019

- Led the development and enhancement of web applications, specializing in UI/UX design using JavaScript and Angular.js, as well as crafting time management software with React.
 - Played a pivotal role in the entire Software Development Life Cycle (SDLC), implementing automated test cases using Cypress to streamline and bolster the testing process.
 - Represented the team during Site Acceptance Testing (SAT) at client locations, ensuring product alignment with client expectations and fostering strong client relationships.
- Led the migration of outdated library web programming apps to the modern Angular Framework, delivering an enhanced user experience and optimized operational efficiency.

Technical Skills

Languages & Frameworks: Java, JavaScript, SQL, Node.js, Spring Boot, Hibernate, ReactJS

Databases & Cloud: MySQL, MongoDB, PostgreSQL, Oracle, Amazon Redshift, AWS (EC2, S3, Lambda, RDS, CloudWatch)

Tools & Technologies: HTML5, CSS3, JQuery, Redux, Tomcat 9.0, JBoss, Apache 2.4.x, GitHub, Jenkins, Junit, Mockito, Selenium, Agile, Scrum, JIRA, Docker, Kubernetes, OAuth, Maven, Kafka

EDUCATION

Master of Science - Computer Science

May 2021 - Aug 2022

University of Central Missouri, Warrensburg, MO, USA

Bachelor of Technology, Electronics Communication & Engineering

July 2015 - May 2019

JNTU, Hyderabad, India
