

Kiria A. González Rivera

Houston, TX • (787) 669-2189 • kiriagonzalezrivera@gmail.com

Profile

Results-driven Industrial Engineer with a strong background in data analysis, quality control, and project management. Proven ability to lead cross-functional teams, implement process improvements, and drive business growth. Passionate about leveraging expertise in manufacturing and aerospace industries to deliver impactful results. Certified PMP, PSMI, CKM, Six Sigma Green Belt, and OSHA safety regulations professional.

Education

Rensselaer Polytechnic Institute (RPI) Troy, NY (Grad Date: Spring 2024)

- M. Eng. Systems Engineering and Technology Management (GPA: 4.0)
- Graduate Certificates in:
 - Business Intelligence (Completed Spring 2023)
 - Machine Learning & Artificial Intelligence (Spring 2024)

University of Puerto Rico, Mayaguez (Grad Date: Fall 2021)

- B.Sc. Industrial Engineering (GPA: 3.4)

Employment Experience

Pratt and Whitney

Position: Product Recall Analyst - QE

Remote • Mar 2024 – Present

- Prepare and submit documentation to regulatory agencies such as the Federal Aviation Administration (FAA) or military oversight bodies. Ensure all recall activities comply with applicable regulations and standards.
- Analyze data to identify root causes of defects or failures & collaborate with quality assurance and engineering teams for detailed analysis.
- Manage the intake of Product Resolution Team packages, ensuring all documentation and materials are included & conduct their initial assessments to determine the nature and extent of issues.
- Develop and implement corrective and preventive actions to address identified issues. Monitor the effectiveness of these actions and make necessary adjustments.

Pratt and Whitney • Quality Engineer Development Program •

3rd Rotation Position: Engine Assembly Center Shop Floor Quality Engineer

West Palm Beach, FL • Jul 2023 – Feb 2024

- Led A3 effectiveness reviews and provided quality oversight for APU and F-135 engines, ensuring compliance with commercial and military standards.
- Implemented countermeasure initiatives, promptly identifying, and addressing quality issues to enhance the engine assembly process.
- Spearheaded a project introducing a new charging code and QN writing system, streamlining Failure mode categorization and reporting procedures.
- Applied Statistical Process Control (SPC) techniques to monitor and improve key assembly techniques, resulting in a 30% reduction in defects and charged hours to the engine assembly process.

2nd Rotation Position: Non-Destructive Testing Quality Engineer

East Hartford, CT • Nov 2022 – Jun 2023

- Developed a standardized business process for reviewing and categorizing the Ultrasonic system QNs, created standard work for the system business process, and implemented preventative measures to enable effective issue prioritization.
- Completed a Greenbelt project focused on setting priorities for the Ultrasonic system, resulting in a 20% reduction in QN disposition time and a 10% improvement in first-pass yield, while optimizing quality hours by 75% and reducing processing costs.
- Performed supplier audits and Gage R&Rs to ensure the accuracy and reliability of supplier processes.
- Audited major East Hartford module centers' evacuation maps and sweeper zones and submitted PMRs to F&S Carpenters in accordance with the EH&S standards.

1st Rotation Position: Model-Based Definition Quality Engineer

East Hartford, CT • Jan 2022 – Oct 2022

- Improved product quality and reduced inspection cycle time by automating workflow for the inspection process and facilitating the transition from technical data package usage into digital inspection using software interoperability.
- Executed routine testing with software suppliers to validate performance and incorporate Model-Based Definition (MBD) software interoperability to ensure alignment with business needs and customer expectations.
- Supported development of automated manufacturing and inspection processes using MBDMI enterprise interoperability.

Trane Technologies

Position: Process Change Control Specialist

Arecibo, PR • Aug 2021 – Dec 2021

- Successfully managed a high visibility documentation update initiative, which involved verifying and adapting all existing SOPs, JBS, PFMEAs, and process flowcharts to accurately reflect current processes for the improvement of documentation accuracy and reduction of discrepancies.
- Oversaw a cross-functional team and monitored progress tracking methods, presenting monthly data to upper management.

Skills

- Quality Control and Assurance
- Project Management
- Design: SketchUp and AutoCAD
- Programming: VBA, Excel, MATLAB, PowerBI & Python

Demonstrated Strengths

- Interpersonal communication skills
- Leadership, Problem Solving & Decision Making abilities
- Fluent in both Spanish and English

Certifications

- **PMP:** Certified Project Management Professional
- **PSMI:** Certified Professional Scrum and Agile Master I
- **CKM:** Certified Knowledge Manager
- **Six Sigma Green Belt Certified**
- DOL/OSHA 40-hours Occupational Safety and Health
- DOL/OSHA 30-hours General Industry & Construction Courses
