

AJ ADEKOYA

DATA ENGINEER

Hoffman Estates, IL

(206)-330-8641

ajadekoya@gmail.com

<https://www.linkedin.com/in/ajadekoya/>

RELEVANT SKILLS

PROGRAMMING: *PYTHON (NUMPY, PANDAS), SQL, MATLAB, MACHINE LEARNING*

DATA ENGINEERING: *PREDICTIVE MODELING, EXCEL, ETL, SNOWFLAKE, AWS, REDSHIFT*

DATA VISUALIZATION: *EXCEL, POWER BI, GOOGLE LOOKER, TABLEAU, MATPLOTLIB*

EDUCATION

BACHELOR'S DEGREE - BIOPHYSICS
Loyola University Chicago
2013 – 2017

MASTER'S DEGREE - PHYSICS
DePaul University
2017 – 2019

- Illinois Space Grant Fellowship Recipient
- American Chemical Society Journal publication
- Quantitative research and data analysis of neutron and x-ray diffraction data presented at the Denver X-Ray Conference

SUMMARY

Budding data engineer with over 3 years of experience building and maintaining scalable ETL pipelines across healthcare, financial, and SaaS datasets. Skilled in SQL, Python, and AWS to develop automated data workflows with a strong focus data integrity, compliance, and confidentiality. Adept at collaborating with cross-functional teams and experience working with engineering teams to deliver clean, reliable datasets, and conveying data into tangible, business insights.

PROFESSIONAL EXPERIENCE

DATA ENGINEER

OCT 2024– PRESENT

ManTech International

- Develop and maintain ETL pipelines and data flows in Palantir using Python and SQL
- Utilizing GenAI to create detailed data lineages of EVAMOSC database objects
- Leverage AWS services including S3 and Redshift to store, transform, and manage database data lineage and tableau reports within a cloud-based data warehouse
- Improve pipeline performance and data reliability by optimizing legacy data models and implementing data validation through documentation

DATA ANALYST/ENGINEER

JAN 2024 – JULY 2024

CamoAg

- Built and maintained SQL-based ETL pipelines to clean and ingest 10,000+ rows of financial and Salesforce data within Snowflake, ensuring data integrity and validity.
- Developed data models and defined business metrics (attribution, conversion, ROI) to support performance analysis and reporting in Google Looker
- Delivered data-driven insights that contributed to a 50% increase in client engagement and improved reporting accuracy to 95%+.

ELECTROPHYSICS ENGINEER/SCIENTIST

AUG 2022 – NOV 2023

Boeing

- Led projects analyzing electromagnetic test data for aircraft components, developing predictive forecasting models in compliance with military standards, and presenting findings across multiple departments.
- Composed and presented analytical code in MATLAB and Python utilizing libraries such as NumPy and Pandas to create mathematical models and regression models for predicting component performance with 95%+ accuracy and confidence.
- Identified and performed risk analysis for customer contracts that did not meet military standard criteria

PROGRAM MANAGER

APR 2020 – JUN 2022

A Safe Haven Foundation/Rush Hospital

- Secured over \$100K in funding and guided public health program development by designing interactive Power BI dashboards and transforming patient data into actionable healthcare metrics for clinical and operational reporting
- Engineered ETL workflows in SQL and Power BI to transform and validate patient engagement data, ensuring HIPAA compliance and data accuracy for VA members and patients in underserved communities
