

Aastha Kale Supply Chain Analyst / Business Analyst aasthakale94@gmail.com aasthakale94@gmail.com +1 (203) 675-3169 CT, USA. LinkedIn GitHub Portfolio	
Summary Supply Chain Professional with 3+ years of experience specializing in data-centric inventory planning and demand forecasting. I excel in orchestrating end-to-end operations, from raw material sourcing and procurement to production, logistics, and returns management. My expertise includes gathering requirements and implementing tailored solutions using Agile, Waterfall, and Six Sigma to enhance process efficiency. By applying historical sales data and market intelligence, I generate precise demand forecasts that guide strategic production and inventory investments. I leverage advanced Excel tools, including VBA and Macros, to automate reporting and maintain system integrity.	
Skills Methodologies: Lean Six Sigma Green Belt, Agile, Just-in-Time (JIT), 5S, Value Stream Mapping, Root Cause Analysis (5-Why, Fishbone Diagram), Failure Mode and Effects Analysis (DFMEA, PFMEA), Program/ Software: Advanced Excel (Pivot Tables, VLOOKUP, VBA/Macros), Power BI (DAX, Power Query), Tableau, SAP, Ariba, Looker, MS Project, MS Office, Anaplan, Kinaxis Rapid Response, Looker Studio Analysis of Project's: KPI Management & Reporting, Regression Analysis, Hypothesis Testing, Economic Order Quantity (EOQ), Safety Stock Calculation, S&OP (Sales & Operations Planning), OTIF, Cycle Time Analysis, ABC/XYZ Analysis Managing Skills: Project Management, Demand Forecasting, Inventory Management, Procurement & Supplier Management, Risk Control Management, Continuous Process Improvement, Warehouse & Supply Chain Optimization. Language & Database: Python, R, SQL, SQL Server, MySQL, PostgreSQL, NoSQL Supply Chain Tools: SAP ERP, SAP HANA, Ariba, Visio, Lucid chart Data & Tools: Data Validation, Data Reconciliation, Data Modeling, Data Dictionary, SSRS, FRD, BRD, Data Warehousing, Data Quality Analysis, System Integration Analyst, ERP Data, Vertex AI, BigQuery ML, Generative AI	
Work Experience	
UnitedHealth Group, USA Supply Chain Analyst (Business Analyst) - Consolidated disparate data sources (SAP, WMS, TMS) into a unified Power BI dashboard ecosystem, providing real-time visibility into medical supply inventories and 3PL distribution center performance which reduced manual data compilation by 20+ hours monthly. - Automated SAP ERP (MM) procurement and inventory reporting, compressing the month-end close cycle by 50%. This improved the integrity of financial and logistics data, ensuring accurate tracking of high-cost medical devices and pharmaceuticals. - Integrated fragmented data streams across the healthcare supply chain to create a single source of truth, unified view identified inefficiencies in freight and vendor routing, resulting in an 18% annual reduction in logistics spend. - Spearheaded a Lean Six Sigma project re-engineering warehouse slotting and pick-path logic within medical distribution centers which increased outbound throughput by 40% and drastically reduced mis-shipments, leading to a six-figure reduction in operational chargebacks. - Redesigned the procure-to-pay workflow within SAP MM, cutting average raw material and medical supply lead times which elevated production line fill rates, supporting an additional \$1.5M in revenue capacity by ensuring product availability for health system clients. - Built the end-to-end workflow by establishing clear SLAs between procurement, 3PL partners, and sales teams, this increased on-time, in-full (OTIF) delivery for providers and improved the Net Promoter Score (NPS) by 25% YOY, enhancing trust with hospital networks. - Refined demand planning models by integrating historical sales, promotional calendars, and supplier capacity constraints which lifted forecast accuracy for critical medical categories, while simultaneously mitigating the risk of stockouts for essential care items. - Established proactive contingency protocols that maintained 100% continuity for high-revenue and clinically essential SKUs during periods of peak market volatility and supplier disruptions.	September 2025 – Present
Side Quest (Fund Flow OS), USA Business Strategy Analyst - Built analytics pipelines using SQL, Power Query, and Tableau to analyze market trends and monetization data, identifying 18% higher ROI allocation opportunities across priority segments. - Developed AI-powered predictive models using Python (scikit-learn, TensorFlow) and Generative AI (GPT-4.5) to forecast retention, ARPU, and churn deployed Azure (Data Factory, AutoML) workflows for market analysis and A/B testing. - Gathered business requirements in Confluence, managed delivery via Jira in Agile/Scrum, mapped BPMN workflows in Lucidchart, and executed market analytics using Amplitude, Mixpanel, and Sensor Tower.	May 2025 – September 2025
Zensar Technologies, India. Supply Chain Analyst (Data Analyst) - Optimized supply chain system performance by identifying and resolving data processing bottlenecks, improving solution delivery timelines from 82% to 96% attainment, and presenting data-driven recommendations to senior operations leadership. - Automated recurring reporting processes using Excel VBA, reducing weekly manual effort by 12 hours (40% efficiency gain) and ensuring consistent data accuracy across all standard deliverables. - Managed contract renegotiations and terms optimization, resulting in \$420K in annual cost avoidance without impacting service levels. - Developed and maintained KPI dashboards in SAP Analytics Suite (SAP HANA) for a pharmaceutical client, enabling real-time visibility into inventory turnover, order fulfilment, and logistics performance to support executive decision-making. - Improved data retrieval and analysis efficiency by refining complex SQL queries, cutting extraction and transformation time by 30% and accelerating cycle times for operational reviews. - Collaborated with cross-functional teams (development, QA, and business stakeholders) to align reporting requirements and system enhancements, driving a 12% reduction in project costs (\$180K) and raising client satisfaction scores by 8 points. - Built and maintained end-to-end automated reporting pipelines using Tableau and Excel, delivering weekly performance summaries to over 25 internal and external stakeholders and saving 18+ hours of manual consolidation work per week.	August 2022 – July 2024
Education Masters of Science in Business Analytics with Global Supply Chain Analytics, University of New Haven – West Haven, CT, USA.	
Project Port Authority of NY & NJ – <u>AI & Auto ML Capstone</u> Built and optimized regression, forecasting, and classification models using Azure AutoML with hyperparameter tuning, applied Vertex AI (Gemini, BigQueryML) for predictive AI and RAG-based LLM grounding to deliver BI insights for Port Authority leadership.	
August 2025 – December 2025
