WORK EXPERIENCE

Security Officer/Analyst

Feb.2023 – Present

Contract | Fredericksburg, VA

- Monitored and supported physical security infrastructure through systems such as CCURE 3000 (access control) and ExacqVision (video surveillance), ensuring operational continuity and system integrity..
- Maintained structured logs and incident records using Excel for reporting, analysis, and audit compliance.
- Provided technical support for access control system users, assisting with badge configurations and credential updates

Front End Associate

Apr.2022-Nov.2022

Wegmans | Fredericksburg, VA

- Utilized digital order management systems to coordinate the "Cart to Curb" service, ensuring accurate and efficient fulfillment of customer orders.
- Operated handheld devices and in-store applications to update order statuses, track inventory, and manage customer interactions.
- Delivered excellent customer service by leveraging tools to resolve order issues and ensure satisfaction.

Fulfillment and Technology

Oct.2020 – Mar.2022

Target | Fairfax, VA

- Provided technical assistance to customers, including troubleshooting and setup of electronic devices, while educating them on product features and warranties.
- Operated handheld devices and fulfillment software to streamline order picking, packing, and shipment tracking in a fast-paced environment.
- Assisted with Point-of-Sale (POS) system troubleshooting and digital order management tools, supporting team workflow and daily productivity goals.
- Processed online orders for store pickup, shipping, and delivery with accuracy and efficiency, ensuring timely fulfillment and excellent customer satisfaction.

PROJECTS & PERSONAL DEVELOPMENT

Mastercard Cybersecurity program | Personal Project

Nov.2024

- Designed a phishing email simulation as part of a hands-on project, learning to identify, analyze, and create effective phishing awareness strategies to protect organizations from cyber threats.
- Gained practical experience in cybersecurity by simulating real-world security challenges, including threat mitigation techniques and designing security awareness training content for employees.

Custom PC Builds | Personal Project

Feb.2018 – Present

- Assembled Multiple PCs from scratch with carefully selected compatible components.
- Installed and configured operating systems and essential drivers.
- Performed BIOS setup and basic troubleshooting.
- Handled break/fix tasks, including upgrading systems from HDD to M.2 SSD and repurposing parts from older systems to build two functional PCs
