Objective

I'm a Software Developer with 5 years of experience in developing scalable and efficient software solutions, particularly in Healthcare, Oil and Gas, Real Estate and Finance sectors. Dedicated to high levels of customer satisfaction and meeting aggressive business goals. Proactive, organized and passionate coder excited to collaborate with a dynamic team and develop a better product for humankind.

Technical Skills

Programming Languages and Frameworks

Python, Django, React, C#, .Net Core, ASP .Net, VB .Net, Html, CSS, JavaScript, Nodejs, Typescript, Bootstrap, jQuery, JSP, Java, C, C++.

Databases Microsoft SQL Server, Oracle DB, Mongo DB, MySQL.

Methodologies Waterfall, Agile.

Development Tools and skills

Data Structures, Machine Learning, GIS & Remote Sensing, Object-Oriented Programming, .Net - MVC Controls, Maven, Web Services Api, Soap, Firebase, Rest WCF Services, FME, Auth, Git, Visual Studio, Eclipse IDE, Vs Code, Jira, SSMS, Swagger, Postman, Azure, AWS, ArcGIS WAB & Experience Builder, Jupyter, Google Earth Engine, Collab.

Professional Experience

Backend Developer Texas Tech University

Sep 2023 – May 2024

- Involved in analysis, design, and development of university web applications using C#, ASP .Net Core as the Development Framework, and JSP Maven for Application Development.
- Developed reusable Microservices / API's in .Net exposing data from the database.
- Designed in Object Oriented Analysis and Design (OOAD) programming and MVC5 patterns. Implemented REST/HTTP APIs, including JSON data formats and API versioning strategy.
- Designed and implemented Oracle and SQL Server database objects, including stored procedures, functions, triggers, sequences, indexes, and views to perform CRUD operations.
- Optimized ASP.NET applications using Entity Framework & MVC framework implementing lazy loading, connection pooling, and caching techniques resulting in a 50% reduction in page load times and deferred loading of non-essential resources.

Software Developer Tessellations Inc.

Dec 2021 – Jul 2023

- Design, develop and maintain solutions for clients like Cabot, Coterra, Capital Metro, SWN, Thermo Temp built using Python-Django, React, Asp.Net, Vb.Net.
- Created data-rich dashboards using React and Django Rest Framework.
- Developed web applications using Django, driving feature enhancements that increased user retention by 20%.
- Automation of GIS & Remote Sensing tools for Real Estate data processing using Python, JavaScript, ML.
- Enhanced user experience by 25% through developing a dynamic UI app with React, HTML/CSS, Bootstrap, and Redux, using hooks like useState and useEffect.
- Improved database query performance by 30% through strategic indexing, stored procedures, and caching, resulting in faster data retrieval and enhanced user experience.
- Enhanced user authentication efficiency and data protection measures by integrating JWT and OAuth into .NET Core applications for improved security.
- Introduced new enhancements and optimized code which boosted app performance by 45%.
- Earned highest customer satisfaction rating for all software solutions delivered.

.Net Developer

Infosys – Client: Walmart Pharmacy - Connexus

Sep 2019 – Nov 2021

- Worked for Walmart Pharmacy - Connexus Software Application as a Dot Net Developer and involved in SDLC of the project from requirements gathering to transition using Agile Methodology.
- Developed the application with N-tier architecture using Class Libraries, Data entities, Services, Data access layer, Business logic layer and stored procedures.
- Used .Net Core for dependency injection, decreased code complexity by 35%, and improved maintainability by decoupling components and enabling easier testing and extensibility.
- Implemented Singleton and Factory design patterns, utilized Git and Atlassian tools such as Confluence, Jira to facilitate collaboration, track project progress, and manage version control.
- Improved API reliability and debugging efficiency by managing status codes, error logs, and exceptions, utilizing Swagger and Postman for comprehensive testing.
- Enhanced database efficiency through the utilization of Entity Framework Core & LINQ queries, resulting in a 30% improvement in query execution time.
- Maximized team efficiency by coordinating cross-functional collaboration between development, QA, and product management teams, using Agile methodology to align sprint goals.
- Designed a tool “Jira Effort Log” which reduced time and effort by 40% and used to visualize team members hours logged and sprint details in charts using HTML, CSS, JavaScript, Bootstrap, CanvasJs.

Intern

Infosys

Dec 2018 – Apr 2019

- Skilled in Python, Asp.Net, Object oriented programming.
- Worked as Team Lead for a team of 7 members in Data Visualization Intern Project.

Education

Master of Science in Computer Science | 3.5 GPA
Texas Tech University

Aug 2023 – Dec 2024

Bachelor of Technology in Computer Science | 80 %
Jawaharlal Nehru Technological University

Aug 2015 – May 2019

Personal Projects

YouTube Transcript Summarizer – Python, Django, NLP, MySQL.

- This project is a search engine extension that works with YouTube to extract the key points where it will perform NLP and respond with the summarized version of the YouTube transcript.

Time Tracker - React, Firebase

- Time Tracker is a web-based multi-user time-tracking application. Works great for freelancers, companies, organizations as everyone can track their times, generate reports, create invoices and do so much more.

Cpu Scheduler - Html, CSS, JavaScript, CanvasJs

- A web-based tool to schedule jobs, calculate Turnaround time based on scheduling algorithms FCFS, SJF.

GitHub Profile - All my personal projects can be found here,
