Boston, MA (willing to relocate) | 857-376-1902 | raj.adi@northeastern.edu | linkedin.com/in/adityaraj2703 | Github | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience in full-stack development, cloud computing, and DevOps. Proficient in Java, React, Spring Boot, AWS, GCP, and microservices with a strong track record of delivering scalable, high-performance systems at Airbnb, Infosys, and Ipssoft. Proven ability to optimize infrastructure, lead CI/CD automation, and improve system efficiency.

EDUCATION

Northeastern University

Boston, MA

Master of Science in Computer Software Engineering; **GPA: 3.5/4.0**

September 2022 – December 2024

Kalinga Institute of Industrial Technology

Bhubaneswar, India

Bachelor of Technology in Computer Science

June 2013 – July 2017

WORK EXPERIENCE

Ipssoft

Remote, United States

Software Engineer

April 2025 – Present

- Engineered and launched public health web app using Java and Spring Boot, supporting **10K+** daily active users
- Built an accessible quiz app with **ARIA** support, serving **1.5K** weekly users, achieving **90%** test coverage using Jest

Airbnb (via Altimetrik)

Bengaluru, India

Senior Software Engineer - Product and Platform Engineering

February 2022 – August 2022

- Spearheaded development of Airbnb's **Payments Page**, handling over **1.5M** daily transactions
- Integrated **NoSQL (Redis)** into the architecture, achieving a **7x** faster response time and enhancing system efficiency
- Optimized search functionality using **Elasticsearch**, reducing query time from **2s** to **650ms** and improving user experience
- Revamped **React**-based validation UI with **Java** and **AWS Lambda**, boosting efficiency by **25%**
- Designed automated **CI/CD** pipelines, accelerating deployment cycles and simplifying team collaboration
- Migrated **3** Airbnb projects to Spinnaker using **Docker** and **Kubernetes** on **AWS**, streamlining orchestration workflows
- Achieved a **15%** reduction in deployment time for Spinnaker, accelerating delivery pipelines and improving scalability

Infosys Limited

Pune, India

Senior Software Engineer

January 2019 – February 2022

- Orchestrated web apps with **Spring Boot** and **REST APIs**, streamlining workflows and reducing purchase time by **9s**
- Implemented **Swagger**, **Selenium**, and **JUnit** for API and testing, boosting test coverage by **30%**
- Deployed a **microservice** architecture for client-facing analytics application, adding active users by **20k**
- Built scalable framework using **Apache Kafka**, enabling a **3x** increase in daily transactions for accounting operations
- Streamlined **Spring Batch** data workflows and **JMS**-based async communication, improving performance by **40%**

Ipssoft Technologies

Bengaluru, India

Application Developer

April 2018 – January 2019

- Designed an e-commerce web app with **.NET**, and **OAuth2**, improving deployment reliability and security compliance
- Automated deployment pipelines with **GCP** workflows, reducing manual interventions and deployment errors

ACADEMIC PROJECTS

Cloud Computing Web Application | AWS, GCP

September 2023 – December 2023

- Developed and deployed **Spring Boot** REST API app on **AWS** and **GCP** with automated **CI/CD pipelines**
- Provisioned infrastructure through **Packer** to build AMI images and implemented auto-scaling and load-balancing
- Utilized **Pulumi** and **Terraform** to deploy VPC, Subnets, IGW, Route53, SG, IAM, EC2, RDS, S3, and Lambda

CheersClub | Spring Boot, Hibernate, MySQL Database

January 2023 – August 2023

- Developed a scalable **blogging web app**, with advanced search, real-time chat, and content moderation features
- Ensured security, performance, and scalability following **Object-Oriented Design** and through testing by 100 users

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, C++, JavaScript, TypeScript, Spring Boot, Node.js, React, HTML, CSS, ABAP

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Terraform, Pulumi, Spinnaker, Packer, CI/CD, CloudWatch, Datadog

Backend Technologies: REST API, GraphQL, Apache Kafka, JUnit, Mockito, Selenium

Database: MySQL, Redis, PostgreSQL, Sybase, MS SQL Server, MongoDB, RDS, S3, DynamoDB, Elasticsearch

Tools & Practices : Git, Postman, VS Code, IntelliJ, Eclipse, OOP, SOLID principles, Agile, TDD
