EDUCATION

The George Washington University

Washington, DC

Bachelor's in Information Technology (GPA: 3.65)

Jan. 2024 – Dec 2025

- **Certification:** CompTIA Security+
- **Coursework:** Python for Statistics, Relational Databases and Design, Software Development Processes, Cloud Architecture, Information Network Security, Survey of AI

Northern Virginia Community College

Alexandria, VA

Associate's in Information Technology

Jan. 2022 – Dec 2023

PROJECTS

COVID-19 Data Analysis and Forecasting | *Python, R, MySQL, Power BI, Facebook Prophet*

July 2025

- Built and deployed a machine learning model with Facebook Prophet that forecasted 30-day COVID-19 trends with 92% accuracy using time-series analysis techniques.
- Processed 82,000+ records 3x faster by designing an automated MySQL–Python–R pipeline, streamlining data preparation for analytics.
- Improved executive decision-making by 25% by developing governed Power BI dashboards aligned with KPIs, ensuring data accuracy and compliance.

PROFESSIONAL DEVELOPMENT

Data Analyst Bootcamp

2026

SQL, Excel, Tableau, Power BI

- Developed strong proficiency in SQL by creating and managing relational databases, writing complex queries using JOINS, subqueries, CTEs, Window Functions, CASE statements, and implementing data cleaning techniques.
- Applied core SQL concepts including GROUP BY, HAVING vs. WHERE, UNION operations, aliasing, string functions, temporary tables, triggers, and events to analyze structured datasets.
- Utilized Excel for data analysis by building Pivot Tables, applying advanced formulas, XLOOKUP, conditional formatting, and generating charts to identify trends and key performance indicators.
- Designed introductory dashboards in Tableau and Power BI using data modeling fundamentals, calculated fields, filters, relationships, and basic DAX to present actionable business insights.

EXPERIENCE

Mentor

Jan 2023 – Dec 2023

College Steps Program

Alexandria, VA

- Mentored 30+ students in study skills, time management, and assistive technologies, resulting in a 20% average improvement in academic performance.
- Enhanced academic outcomes by 15% by introducing data-driven tools (Excel, Tableau, visualization platforms) to track progress and enable informed decisions.
- Boosted student engagement by 40% through interactive, technology-enabled presentations promoting independent learning and digital literacy.
- Facilitated collaboration between students, faculty, and support staff, accelerating resolution of academic and accessibility requests through structured communication workflows.

TECHNICAL SKILLS

Languages: Python, R

Data Analysis / Visualization: MySQL, Excel (PIVOT TABLES, XLOOKUP) , Tableau, Power BI, ERDs, UML

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, Terminal, Lucidchart

Productivity / Collaboration: MS Office (PowerPoint, Outlook), Agile Collaboration
