SUMMARY OF QUALIFICATIONS

Management

- Design and implement processes to increase efficiency by minimizing error and reducing repetitive tasks
- Interview junior laboratory analyst candidates and schedule work hours
- Keep laboratory in compliance by evaluating laboratory analyst work for quality, ethics, and adherence to EPA, SOP, NELAP, ADEM, and GA EPD methods, rules, and regulations
- Collaborate with Shipping and Receiving Department to ensure clients sample kits are distributed and collected via client pick up, company drop off, or shipping
- Coordinate with clients and company distribution system to create monthly laboratory client testing schedule

Communication

- Develop relationships with clients and present an explanation of results, updates on testing, and research testing parameters via email, phone calls, and video conferences
- Coordinate lab task assignments for 4-6 laboratory analysts to ensure smooth running of day-to-day activities
- Notify technical manager when results are deemed abnormal or failing
- Ensure junior laboratory analysts are trained adequately and are competent to carry out assigned tasks
- Develop strong team relationships through support and flexibility to ensure a significant impact on the overall efficiency and success of operations

Data Collection/Processing/Results-Driven

- Verify results and diagnose the cause of abnormal variation to take proper actions
- Interpret results, calculate data, create reports, and submit data for final review
- Review analyst results for completion and accordance with compliance
- Reanalyze samples when results are deemed outside of detection limit and properly document
- Assist clients with determination of chemical dosage for water treatment according to test results
- Analyze 1000s of samples per month in a fast-paced work environment while paying attention to details and maintaining accurate and dependable results

Analytical

- Conduct toxicological, organic, inorganic, chemical, anion, and bacteriological testing procedures on drinking water, wastewater, and soil samples for permit and research purposes in accordance with EPA approved methods
- Perform quality control tests for materials and laboratory supplies
- Document and maintain reagent, standard, and stock solution forms
- Operate standard analytical instrument e.g., IDEXX Quanti-Tray Sealer, OI Analytical 1010 Analyzer, GC with dual ECD detectors, GC/MS, Purge and Trap analyzer, HPLC, Dionex ICS2000, Dionex Aquion, Dionex AS-AP Autosampler, SEAL AQ300, SEAL AQ400, Spectrophotometer HACH DR2800,
- Proficient on ChemStation software, WinTOC software, Laboratory Information Management Systems, TOXCALC, Chromeleon software, and Microsoft Excel and Word

EDUCATION

B.S. Laboratory Technology, Auburn University, Auburn, AL, 2014

EXPERIENCE

June 2021-June 2025- **Analyst I**, Eurofins Environment Testing Savannah, Georgia. Served as primary analyst to organize, prep, and analyze inorganic anions (fluoride, chloride, sulfate, bromide, nitrate, and nitrate) via ion

chromatography and colorimetry in drinking water, wastewater, and soil samples in accordance with EPA methods 300.0, 9056A, and 353.2.

Served as secondary analyst to organize, prep, and analyze for various properties and compounds (chemical oxygen demand, hardness, sulfide, total cyanide, and residual chlorine) via automated and semi-automated colorimetry and iodometric titration methods in drinking water, wastewater, and soil samples in accordance with EPA methods 410.4, SM5520D, 2340C, 335.4, 9012B, 9013, SM4500-CN-C/E, 376.1, 9030B, 9034, SM4500-S²F, SM4500-Cl-B, 330.3. Upload, first level review, and submit analytical data for second level review for reporting purposes.

September 2020-May 2021- **Senior TOC Analyst**, Environmental Resource Analysts, Inc., Auburn, Alabama. Served as primary analyst to organize and analyze total organic carbon and dissolved organic carbon drinking water and wastewater samples in accordance with SM5310C-11. Review and submit analytical data for reporting purposes.

August 2014-May 2021- **Senior Toxicity Analyst**, Environmental Resource Analysts, Inc., Auburn, Alabama. Served as senior analyst to oversee 4-6 junior laboratory analysts to ensure lab rules are being followed, necessary sample adjustments are made, and monthly checks and studies are being run. Conduct chronic and acute tests using *Ceriodaphnia dubia* and *Pimephales promelas*, analyze, and report results for regulated stream, pond, river, lake, and other bodies of water located near industries and companies that release into them according to EPA methods 1000.0, 1002.0, 2000.0, and 2002.0.

August 2014-May 2021- **Assistant Organic Chemistry Analyst**, Environmental Resource Analysts, Inc., Auburn, Alabama. Assisted senior analyst with extractions, loading and running regulated drinking water samples, and reviewing analytical data for reporting purposes in accordance with EPA methods 504.1, 508.1, 515.3, 525.2, 524.2, 548.1, 549.1, 550.1, 547, 531.1, and 555 for synthetic organic compounds and haloacetic acids and dalapon in accordance with EPA method 552.2.

August 2014-May 2018- **Senior Microbiology Analyst**, Environmental Resource Analysts, Inc., Auburn, Alabama. Served as senior analyst to oversee 2-4 junior laboratory analysts to ensure lab rules were followed and weekly and monthly checks and studies were run. Conducted and analyzed regulated wastewater and drinking water samples in accordance with EPA approved methods IDEXX/9223B-2004, SimPlate, and 9222D for total coliforms, fecal coliforms, *E. coli*, and heterotrophic bacteria.
