

Professional Summary

- **Clinical Data Management Professional** with 8+ years of expertise in **Medical Devices** and **Pharmaceutical trials**.
 - Proficient in managing the **Study Data Lifecycle** in all phases including **Study Start-up, Conduct, and Close-out**.
 - Experience managing **end-to-end deliverables of multiple studies**.
 - Experience in developing **e-CRF specifications, eCRF Completion guidelines, Edit check Specifications, UAT scripts, Data Management Plan (DMP), Data Transfer Agreements (DTA)** with external vendors.
 - Experience in **leading studies** in Conduct phase with scope **Data Cleaning, Discrepancy Management** and conducting **cross functional team meetings** for query resolution.
 - Worked on **Lab data Reconciliations and SAE (Serious Adverse Events) Reconciliations**.
 - Experience developing **Study Reports and Study metrics** to enable tracking data quality and site performance.
 - Managed Close-out activities including **data review and DB lock, archival and e-TMF documentation**.
 - Experience providing oversight for **outsourced studies**.
 - Managed multiple studies across various **therapeutic areas simultaneously**, including **Oncology, Cardiovascular, Gastrointestinal, Pulmonary, and Endocrinology, Urology**.
 - Good understanding of **FDA, ICH/GCP guidelines, 21 CFR Part 11, and IRB documentation** to ensure compliance across all clinical trial stages.
 - Ability to prioritize, multitask, in a complex, cross-functional work environment.
 - Strong **communication and team management skills**, effectively working with **global and cross-functional teams**.
-

Objective

- Leverage **8 + years** of experience in **Clinical Data Management** to drive efficient and high-quality management of clinical trial data across all phases (I-IV).
- Actively work to improve skills through training sessions and workshops.
- Ensure **data integrity and compliance** with regulatory standards such as **GCP, CDISC, 21 CFR Part 11**, and other applicable guidelines.
- Lead and manage **cross-functional teams**, collaborating with **clinical operations, biostatistics, safety teams, and vendors** to achieve successful trial outcomes.
- Oversee the entire **study lifecycle**, from **study startup** through **data collection, data cleaning, discrepancy resolution, until closeout and archival**.
- Utilize **data capture platforms** such as **Medidata RAVE, Zelta (Merative), Oracle Inform, Veeva Vault**, etc to ensure **data accuracy, efficiency, and timely reporting**.
- Drive **database lock activities**, ensuring **soft locks and hard locks** are completed with thorough **quality checks**.
- Develop and maintain strategies for **Data Management Plan (DMP), eCRFs, edit check specifications, and query management**.
- Ensure smooth execution of **user acceptance testing (UAT)**, ensuring databases and systems are set up and function according to study protocols and specifications.
- Enhance **data visualization** capabilities using tools such as **PowerBI** to analyze trends, study progress, and ensure proactive issue resolution.
- Support **regulatory submissions**, ensuring that clinical trial data is well-documented and meets the required standards for submission to regulatory agencies.
- Provide **leadership and mentorship** to junior data management staff, fostering growth and ensuring high standards of performance.
- Maintain strong communication with **external vendors**, ensuring **data transfer agreements (DTAs)** and **data integration processes** run smoothly.
- Drive **continuous improvement** in clinical data management processes to reduce data discrepancies, streamline timelines, and optimize resource utilization.
- Cultivate strong working relationships with **global study teams and stakeholders**, facilitating efficient data flow and issue resolution.
- Strive for the highest standards of **quality assurance**, ensuring all aspects of clinical data management are conducted with accuracy, timeliness, and regulatory compliance.

Technical Skills and Tools

- 21 CFR Part 11
- CDISC standards
- Data Capture Platforms- Medidata Rave, Zelta, Oracle Inform, Veeva Vault
- eCRF Design
- Edit Check Specifications (ECS)
- Data Validation Specifications (DVS)
- eCRF Completion Guidelines (eCCG)
- Data Management Plans (DMP)
- Data Transfer Agreements (DTA)
- MedDRA
- Excel (for reporting and data analysis)
- PowerBI, Tableau
- Data Lock Activities (Soft and Hard Lock)
- eTMF Systems

Professional Experience

Sr. Clinical Data Manager

PSI |

April 2024 – March 2025

- **Led the conduct phase** for two **Phase 2 studies**, overseeing all aspects of **data management, data cleaning, and query resolution**.
- Manage the **data review process** to ensure accurate and timely resolution of discrepancies while adhering to **study timelines**.
- Collaborate with **external vendors** to facilitate **data transfer agreements (DTAs)** and address any **data-related issues** from third-party sources.
- **Monitor and review study progress** through detailed **study metrics** and **status reports** to keep both internal and external stakeholders informed.
- Conduct **cross-functional meetings** to ensure alignment on **data management activities**, timeline adherence, and **problem resolution**.
- Implement **data validation protocols** to ensure data integrity, including **edit checks** and **discrepancy management**.
- **Facilitate database lock** activities, including soft and hard locks, ensuring thorough **quality checks** of all data before lock.
- Provide **guidance and leadership** to team members, ensuring that data management standards are met, and that training is provided as needed.

Sr. Clinical Data Manager

Abbott Point of Care, NJ |

May 2022 – Mar 2024

- **Worked on seven in-vitro studies** across all phases (start-up, conduct, and close-out), and **leading two** of them, ensuring the integrity and quality of clinical trial data in each.
- Supported **eCRF design** and **data validation** processes, ensuring all forms and data capture mechanisms were properly implemented and aligned with study requirements.
- Actively participated in **study design** and **protocol review meetings**, contributing to the development of **Data Management Plans (DMP)** and **eCRF completion guidelines**.
- Created and reviewed **Data Surveillance Specification Documents** to ensure that all data was appropriately monitored and reviewed for discrepancies.
- Performed comprehensive **data review** to identify and resolve discrepancies, ensuring accurate and complete data for submission.
- Used **advanced data visualization tools**, analyzing trends and study progress to ensure data quality and timely delivery of study milestones.
- Managed **data review logs** and tracked study metrics to report data quality, trends, and site performance to all relevant stakeholders.
- Supported **database lock activities**, ensuring all data was validated, discrepancies were resolved, and database lock was achieved on time.

Clinical Data Manager

BMS, NJ |

Mar 2020 – Apr 2022

- **Led two studies in the conduct phase**, overseeing all aspects such as **Query Management, discrepancy resolution, data cleaning and data review**.
- Provided **oversight to a CRO outsourced study** for about a year. Acted as a **liaison** between the study team and external partners to ensure smooth data flow and timely resolution of data issues.
- Adhered to **ICH- GCP** guidelines, Institutional policies, Standard Operating Procedures (**SOPs**), and standard guidelines (**CDISC/CDASH**) to ensure smooth functioning of study.
- Performed and managed start-up tasks like **eCRF design, Edit Checks design and data review plan**.
- Assisted in **soft and hard lock activities** at the end of study phases, after thorough QC of the data
- Created, implemented and maintained **Data Management Plans (DMP)** through the project lifecycle according to study design and requirements.
- Managed third party **vendor data transfer plans (DTAs)**, data transfers as well as reconciliation and trouble shooting of the Vendor data issues.
- **Coordinated with cross-functional teams** to ensure alignment on study timelines, deliverables, and **problem resolution**, facilitating smooth progress through the study lifecycle.
- Led regular **data review meetings** with stakeholders to discuss progress, challenges, and resolve data-related issues.
- Provided **guidance** to junior team members, mentoring them in best practices in **data management and quality control**.

Clinical Data Manager

Merck, NJ

Oct 2017 – Mar 2020

- Reviewed clinical research study Protocols and developed Data Management Plan (DMPs)
- Developed Case Report Forms (CRFs), Data Validation Plans (DVPs), CRF completion guidelines (CCGs) according to company guidelines and SOPs.
- Performed **laboratory data reconciliation** activities for both **local and central labs**, ensuring that all data was accurate, consistent and complete.
- Performed **SAE reconciliation** of Adverse events of Clinical Database and Safety database
- Involved in data transfers, reviewing and monitoring data as per DTA.
- Developed **Edit Check Specifications (ECS)** document for the electronic CRFs.
- Conducted **User Acceptance Testing (UAT)** of programmed **edit checks** and worked closely with **programmers** to ensure the database development aligned with study requirements.
- Generated **study-specific reports, ad hoc reports**, and **metrics** to track study progress.
- Provided oversight and support during **database lock** activities, ensuring that data was thoroughly checked for completeness and accuracy before lock.
- Ensured **compliance** with **GCDMP** (Good Clinical Data Management Practices) and **GCP** (Good Clinical Practices) guidelines, maintaining high standards of data quality and regulatory adherence throughout the study.

Clinical Data Reviewer

ClinChoice, PA

Aug 2015 – Sep 2017

- Independently reviewed **Case Report Forms (CRFs)** data for **completeness, accuracy, and consistency**, ensuring they met study protocols.
- Independently prepared **database test documentation** and **test data entry screens**.
- Identified **data discrepancies** through **computerized edits** and **manual checks**, and generated queries to resolve them, ensuring quality data.
- **Followed up with cross-functional team** to ensure that data queries were addressed promptly.
- Assisted in **external data reconciliation**, including **SAE, ECG, LAB, and IVRS reconciliation**, in accordance with applicable procedures.
- Generated, reviewed, and distributed **status reports** as requested.
- Compiled **study documentation** and maintained study files in accordance with applicable procedures.
- Assisted in preparing **study documentation** for regulatory submissions in compliance with applicable procedures and SOPs.

Education

- **Master of Pharmacy**, Bharati Vidyapeeth Deemed University, India
