WORK EXPERIENCE

Software Development Intern

May 2024 – Aug 2024

Marchup, San Jose, CA, United States

- Enhanced system reliability by refactoring problematic database queries, reducing top user-reported errors by 21% and accelerating data retrieval by 30%, directly improving the user experience.
- Optimized high-traffic data retrieval processes, slashing query times by 50% and reducing server load during peak hours, which decreased AWS compute costs and improved system stability.
- Drove a 15% increase in user retention and engagement by developing an AI-powered support chatbot, reducing the burden on human customer support and scaling personalized user assistance.

Head Teaching Assistant

Aug 2023 – May 2025

Indiana University, Bloomington, IN, United States

- Provided critical debugging and development support to over 200 students, contributing to a higher course pass rate and improved student satisfaction scores.
- Mentored and trained a team of junior TAs, standardizing teaching methodologies across sections which led to a measurable increase in student proficiency and project grades.

Software Developer Engineer

Jul 2022 – May 2023

Tech Hut, Pune, Maharashtra, India

- Developed high-performance RESTful APIs that reliably served 1,000+ daily users, improving response latency by 12% and enhancing fault isolation, which ensured a smoother experience for our client's customers.
- Architected and implemented a containerized microservices ecosystem, increasing system scalability by 70% and enabling the business to handle growing user traffic without service degradation.
- Modernized the tech stack by migrating legacy services to Spring Boot, which cut server response time by 40% and reduced long-term maintenance costs.
- Strengthened application security by implementing JWT-based authentication and RBAC, mitigating potential security risks and ensuring compliance with data protection standards.

Full Stack & Mobile Developer

Jan 2021 – Jul 2022

Art Wood, Pune, Maharashtra, India

- Secured client applications by implementing Firebase Auth, slashing instances of unauthorized access by 90% and protecting sensitive user data.
- Boosted content team productivity and satisfaction by 90% for over 12 clients through custom CMS solutions that streamlined their publishing workflows and reduced content update time by up to 30%.

EDUCATION

Indiana University, Bloomington, IN, United States

Aug 2023 – May 2025

Master of Science in Computer Science

MIT World Peace University, Pune, MH, India

Jul 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

TECHNICAL SKILLS

- Languages** : Python, R, JavaScript, Typescript, Bash/Shell Scripting, Java
- Databases** : MySQL, PostgreSQL, MongoDB, Cassandra, Snowflake, NoSQL, AWS Redshift, Elasticsearch
- Frameworks** : React.js, Spring Boot, Spring Security, Spring Cloud, Next.js, Node.js, Express.js
- Cloud and DevOps** : AWS, GCP, Microsoft Azure, Docker, Kubernetes, CI/CD, Windows, Mac OS, Linux
- Development tools** : Git, GitHub, Jenkins, Hadoop, Apache Kafka, Postman

PROJECTS

[PixelPen](#) | *Next.js, Prisma, NextAuth, MongoDB, Vercel*

- Invented a Medium-like blogging platform using Next.js, optimizing routing for seamless navigation and scaling to 10,000 users. Integrated Prisma with MongoDB and Firebase Storage for handling 5,000+ images.
- Implemented secure user authentication with NextAuth, streamlining login and registration, reducing authentication time by 30%.

[ConnectSport](#) | *MongoDB, Express.js, React, Node.js, Docker*

- Led a team of 5 students to develop a scalable social media platform, serving 10,000+ users, by implementing RESTful APIs, OAuth 2.0 for authentication, and secure data encryption.
- Orchestrated features like private/group messaging, multimedia sharing, and real-time updates using WebSocket, achieving 99.9% uptime during testing.

[SmartBank](#) | *Java, Spring Boot, MySQL, AWS*

- Developed a core banking backend system using Spring Boot with account management, transaction logging, and user authentication.
- Integrated MySQL and JPA for persistent storage and built REST APIs tested via Postman and Swagger. Deployed backend services on AWS EC2 with CI/CD setup for automated deployment.
