

Arbaz Baig | Data Analyst

IL, USA | +1 312 262 8530 | arbazz2501@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with nearly **4 years of experience** transforming financial, marketing, and operational data into measurable insights. Proficient in SQL, Python, Power BI, and cloud platforms (AWS, Azure, Snowflake). Skilled in designing ETL pipelines, building forecasting models, and developing interactive dashboards that improve reporting accuracy and decision speed. Adept at translating business needs into analytical solutions while ensuring HIPAA and SOC 2 compliance across enterprise environments.

TECHNICAL SKILLS

Data Analysis & Interpretation: Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing, A/B Testing, Trend & Pattern Analysis, Root Cause Analysis, KPI Definition, Data Storytelling, Actionable Insights

Visualization & Reporting: Power BI, Tableau, Looker, Qlik Sense, Excel (Pivot Tables, Power Query, Power Pivot, VBA), Google Data Studio, SSRS

Programming & Querying: SQL (Joins, CTEs, Window Functions, Stored Procedures), Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn), R (dplyr, ggplot2, tidyr), Bash/Shell scripting

Databases & Data Warehousing: MySQL, PostgreSQL, SQL Server, Oracle, Snowflake, Redshift, BigQuery, Azure Synapse, MongoDB, Databricks

ETL & Data Engineering: Apache Airflow, AWS Glue, Talend, Alteryx, Azure Data Factory, PySpark, ETL/ELT Pipeline Automation

Cloud & Big Data: AWS (S3, Lambda, Redshift, Athena), Azure (Data Factory, Synapse, Data Lake), GCP (BigQuery, Cloud Functions), Spark, Hadoop, Hive

Machine Learning & Predictive Analytics: Regression, Classification, Clustering, Forecasting, Feature Engineering, Time Series Analysis, Model Validation, Performance Metrics (R^2 , RMSE, ROC-AUC)

Business & Domain Expertise: Financial Analytics, Marketing Analytics, Sales Analytics, Supply Chain Analytics, Customer Segmentation, Profitability & Cost Analysis, Forecasting, Business Requirements Gathering

Collaboration & Project Management: Git, GitHub, JIRA, Confluence, Agile/Scrum Methodologies, Stakeholder Communication, Cross-Functional Collaboration

Data Governance & Compliance: Data Quality, Metadata Management, Data Security, GDPR, HIPAA, Access Controls

Professional Competencies: Analytical Thinking, Problem Solving, Critical Thinking, Decision-Making, Attention to Detail, Clear Communication, Presentation Skills

Optional Competitive Enhancements: AI & Automation (ChatGPT/LLM Integration, Python Scripting, Power Automate, RPA Tools), Predictive & Real-Time Analytics

PROFESSIONAL EXPERIENCE

Capital One, IL, USA

Jan 2025 - Present

Data Analyst

- Systematized high-volume transaction pipelines using Python, Airflow, and AWS Redshift, cutting data latency from 12 hours to 45 minutes and enabling near real-time credit-risk analytics.
- Planned Power BI dashboards integrating Snowflake datasets, improving executive visibility into financial KPIs and accelerating decision-making speed by 38% across lending operations.
- Enhanced ARIMA and Prophet forecasting models for delinquency prediction, improving forecast accuracy by 22% and supporting early intervention for at-risk accounts.
- Conducted A/B testing and regression analysis using Python (StatsModels, SciPy) to refine marketing campaigns, increasing conversion rates by 8.4%.
- Established data-governance automation in Snowflake, enforcing HIPAA and SOC 2 compliance while reducing audit workloads by 60%.
- Partnered with finance and engineering teams to translate analytical outcomes into actionable risk-mitigation strategies, driving measurable business improvement.

Cognizant Technology Solutions, India

Nov 2021 - Aug 2023

Data Analyst

- Built and maintained ETL pipelines with Azure Data Factory and SQL Server, reducing data refresh cycles by 40% for global marketing and customer analytics.
- Expanded Looker dashboards visualizing ROI and funnel conversion metrics, cutting manual reporting efforts by 60% and improving campaign decision turnaround.
- Performed EDA and regression modeling on marketing datasets using Python and R, identifying churn drivers that enhanced retention by 14%.

- Executed Python-based validation scripts ensuring 99.7% data accuracy, eliminating recurring inconsistencies across GDPR-compliant pipelines.
- Collaborated cross-functionally with data scientists and business leads under Agile sprints, translating KPIs into data-backed deliverables for strategic planning.
- Streamlined KPI reporting by integrating Power BI with existing SQL workflows, enabling near real-time campaign performance tracking for marketing leadership.

DXC Technology, India

Sep 2020 - Oct 2021

Data Analyst

- Extracted and transformed operational data from Oracle and PostgreSQL using SQL and Python, identifying inefficiencies that reduced SLA variance by 15% in service operations.
- Built Power BI dashboards tracking supply-chain KPIs, improving visibility and cutting reporting turnaround time by 70%.
- Mechanized ETL workflows through Talend and Bash scripting, merging ERP, CRM, and finance data into a single reporting warehouse with zero data loss.
- Created and deployed SQL stored procedures and CTEs, standardizing recurring analytical reports and saving 30+ analyst hours monthly.
- Presented actionable insights to senior leadership through visual storytelling, driving 12% improvement in process efficiency.
- Partnered with IT and finance teams to automate metric reconciliation, enhancing reliability and accuracy of cross-departmental reporting systems.

EDUCATION

Master of Science in Business Informatics

Judson University, Elgin, IL, USA

May 2025

Bachelor of Technology in Computer Science and Engineering

Siddhartha Institute of Engineering and Technology, Hyderabad, India

Dec 2022

PROJECTS

- Heuristic Prediction of Olympics Medal Using Machine Learning**
- Boosted a Python-based predictive analytics model using regression and heuristic algorithms to forecast Olympic medal counts, improving prediction accuracy by 18% through optimized feature engineering.
 - Conducted data cleaning, exploratory data analysis (EDA), and correlation modeling to identify the top indicators influencing medal outcomes, including GDP, athlete count, and prior performance trends.
- Excel Sales Dashboard Project**
- Developed an interactive Excel sales dashboard using PivotTables, Power Query, and conditional formatting to analyze monthly revenue, regional performance, and top-selling products across business categories.
 - Computerized KPI summaries and trend visualizations, reducing manual reporting effort by 65% and enabling faster decision-making for sales and marketing leadership.
