## Education

**College of Engineering Guindy, Anna University**

*Bachelor of Technology in Information Technology*

**Jul 2021 – Jun 2025**

*Chennai, India*

## Professional Experience

**Eucloid Data Solutions**

**Aug 2025 – Present**

*Data Engineer*

*Chennai, India*

- Developing and optimizing ETL pipelines in Databricks to efficiently ingest, transform, and validate large-scale datasets from multiple sources, ensuring high-quality data processing.
- Designing and maintaining robust data models to support efficient analytics, reporting, and downstream machine learning workflows, facilitating actionable insights and data-driven decision-making.

**Apple**

**Jan 2025 – Jun 2025**

*Software Development Engineer Intern*

*Hyderabad, India*

- Developed and optimized an end-to-end knowledge graph pipeline for 10K+ developer.apple.com documents, utilizing Gemini 2.0 Flash model for entity extraction, FastAPI for API development, and Neo4j for graph database management.
- Designed and implemented a 7-stage data processing pipeline featuring deduplication, enrichment, and normalization, enabling advanced semantic querying and multi-hop entity traversal for better data insight.
- Collaborated with cross-functional teams to integrate APIs with internal platforms, improving document discovery speed by 40% and reducing retrieval errors by 25%, enhancing internal workflows and user experience.
- Delivered a scalable, production-ready solution, enabling intelligent search and content recommendation systems, with a focus on performance and reliability under high-volume usage.

## Projects

**Stock Forecast Dashboard | Python, Streamlit, Facebook Prophet Model**

- Developed a machine learning-powered dashboard using Facebook Prophet to forecast stock prices over a 4-year period with high trend accuracy.
- Integrated an interactive business newsfeed alongside forecast charts to provide contextual insights for stock movement analysis.

**Ride Vibe – Student Carpool App | Flutter, Firebase**

- Built a real-time mobile application using Flutter and Firebase to enable ride-sharing among 500+ university students.
- Reduced commute costs and carbon emissions by facilitating efficient, student-driven carpooling solutions.

**Virtual Shopper – E-commerce Website | HTML, CSS, SQL**

- Built a user-friendly online shopping platform with a responsive UI for seamless product browsing and purchasing.
- Implemented efficient SQL-based database design to manage product listings, user accounts, and transaction records.

## Achievements

- Solved more than **700+** problems across platforms.
- Achieved a Top 20 rank at the school level in CBSE AISSE (Class 10).
- Shortlisted for the Second Round of the Association of Mathematics Teachers of India (AMTI) Exam

## Technical Skills

- Languages:** Java, C/C++, Python, JavaScript, HTML, CSS
- Technologies/Frameworks/Libraries:** ReactJS, MongoDB, Databricks, Apache Kafka, Selenium, Linux Shell Scripting, Git(VCS), Qwen2.5, Gemini 2.0 Flash, Prompt Engineering
- Tools/Cloud:** Neo4j, SQL, FastAPI, AWS (Amazon Web Services)
- Relevant Coursework:** Data Structures and Algorithms, Object Oriented Programming, Database Management System, Operating System, Computer Networks
