🌐 [aswinjojo](#)

Software Engineering graduate specializing in high-performance, low-latency software development. Experienced in building robust data pipelines, scalable cloud systems, and full-stack applications. Passionate about financial technology, trading systems, and collaborating within team-driven environments.

EDUCATION

•Master of Science in Computer Science

2024-2026

University of Houston, Texas

GPA: 3.78/4

•Bachelor of Technology in Computer Science and Engineering

2019-2023

Vellore Institute Of Technology, Chennai

GPA: 9/10

EXPERIENCE

•University of Houston

Aug 2025 - Present

Research Assistant

Houston, Texas

- Developed high-throughput Python pipelines for processing 50,000+ geospatial files, leveraging multithreading and I/O optimization for minimal latency and robust uptime.
- Built **multi-threaded batch jobs** with automated error handling, ensuring efficient and reliable processing.
- Collaborated with faculty and students in an **Agile setting**, contributing to reproducible research with clean, tested code.

•Resolve Tech Solutions

Jun 2025 - Aug 2025

Junior Engineering Intern

Dallas, Texas

- Built a **cloud-based onboarding platform** using **React (frontend)** and **FastAPI (Python backend)** with low-latency APIs.
- Designed automated **CI/CD pipelines (GitLab)** for deployments, reducing manual errors.
- Implemented robust **testing and debugging workflows** to ensure production stability.

•Policybazaar.com

Oct 2022 - Jul 2024

Technical Associate & Software Engineer Trainee

Gurugram, India

- Developed and deployed **full-stack web applications** with **React, Node.js, and Python services**.
- Created a lead management dashboard handling **70M+ records** with advanced search, filtering, and analytics.
- Integrated **REST APIs, AWS SQS, and Redis caching**, improving scalability and reducing response times.
- Followed **Agile Scrum methodology** with CI/CD best practices, contributing to sprints and code reviews.

PROJECTS

•Onboarding Task Manager (React, FastAPI, MySQL, AWS)

Full-stack onboarding platform with automated task workflows and role-based access management.

- Built a system to manage employee onboarding tasks with **automated task assignment and deadlines**.
- Developed **FastAPI backend services** with MySQL and **React frontend** for smooth task tracking.
- Integrated Microsoft Entra Graph API for single sign-on and secure access.
- Implemented **CI/CD pipelines (GitLab)** and WebSocket APIs for real-time collaboration.

•Pbpartners Website (Node.js, Next.js, MongoDB, MySQL, MSSQL)

Web platform for insurance agents (POSPs) to manage leads, renewals, claims, and support tickets.

- Improved the UI/UX of the Renewals Page, increasing policy renewals by **20%**.
- Built a real-time contest leaderboard to boost engagement and partner participation.
- Developed a **ticketing system** to streamline support and issue resolution.
- Implemented a comprehensive **claims management module** for partners.
- Integrated partner branding and promotional tools, enhancing client self-service.

•Ride Sharing Platform (Java, Spring Boot, MySQL, AWS, React)

Scalable serverless app for creating and joining rides with real-time approvals.

- Developed **REST APIs in Spring Boot**, handling ride management and approvals with **real-time, low-latency updates** for thousands of concurrent users.
- **Optimized backend throughput** via asynchronous event processing, **minimizing latency** and scaling MySQL connections for high-frequency transactions.
- Integrated **secure authentication** protocols; deployed platform to **AWS cloud** for reliable, fault-tolerant operations.
- Implemented **automated tests in JUnit** to enforce code reliability, coverage, and continuous integration standards.
- **Configured CI/CD (GitLab)** for automated build, test, and deployment workflows, reducing operational overhead and improving release velocity.

•Ticketing Assistant (FastAPI, ServiceNow, CI/CD)

API-based ticket routing system integrated into ServiceNow workflows.

- Built a Logistic Regression-based classifier with reinforcement learning for retraining.
- Automated real-time routing of tickets, reducing manual triage effort.
- Implemented test automation with **Selenium and Pytest**, enabling continuous debugging.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Go

Frameworks/Tools: Spring Boot, FastAPI, Node.js, React/Next.js, JUnit, Selenium, Pytest, Git, GitHub, GitLab CI/CD, Jenkins, Postman, Jira, ServiceNow, Microsoft Entra (Graph API)

Cloud & Infrastructure: AWS (Lambda, SQS, EC2, Amplify, Cognito), Cloud Deployment & Monitoring

Databases: MySQL, MSSQL, PostgreSQL, SQLite, MongoDB, DynamoDB
