PROFESSIONAL SUMMARY

Clinical Data Scientist with experience delivering clinically relevant, regulatory-ready analyses for real-world evidence and post-market (Phase IV) studies. Experienced in designing and executing longitudinal, repeated-measures, and time-to-event analyses using **SAS and R**. Strong background in **SAP development**, **SDTM/ADaM** datasets, and **validated TFLs**, with a proven ability to translate complex statistical results into conference presentations, scientific manuscripts, and stakeholder-ready insights. Adept at working with diverse healthcare data sources and collaborating across multidisciplinary clinical teams.

EMPLOYMENT HISTORY

CLINICAL DATA SCIENTIST

Jan 2021 - May 2025

Xenobiotic Laboratory, UNL in Collaboration with Nebraska DHHS

Lincoln, NE

- Designed and executed clinically relevant statistical analyses for Phase IV and real-world evidence studies supporting post-market safety and effectiveness evaluations.
- Developed Statistical Analysis Plans (SAPs) defining endpoints, estimands, analysis populations, and clinically meaningful comparisons in alignment with FDA and ICH E3/E9 guidance.
- Performed longitudinal and repeated-measures analyses using mixed-effects models to assess changes in clinical outcomes over time.
- Conducted time-to-event and survival analyses (Kaplan–Meier, Cox proportional hazards) for safety and effectiveness endpoints where applicable.
- Applied causal inference techniques to estimate treatment and exposure effects in observational healthcare datasets.
- Produced audit-ready Tables, Listings, and Figures (TFLs) used for internal review, conference presentations, and manuscript development.
- Developed and validated CDISC-compliant SDTM and ADaM datasets, implementing QC checks to ensure traceability, reproducibility, and regulatory readiness.
- Implemented missing data handling strategies (multiple imputation, sensitivity analyses) to ensure robustness and scientific defensibility of results.
- Collaborated with clinicians, investigators, and analysts to interpret findings and communicate results to both technical and non-technical stakeholders.
- Supported preparation of scientific abstracts, presentations, and manuscript-ready outputs for dissemination of study findings.

STATISTICAL CONSULTANT

Jan 2023 - Dec 2024

Lower Elkhorn District, Nebraska

Lincoln, NE

- Designed study frameworks and sampling plans that ensured 80–90% power for primary and secondary endpoints.
- Spearheaded the development of statistical models, enhancing predictive accuracy and enabling data-driven decision-making.
- Designed observational study analyses consistent with real-world evidence frameworks, including confounder adjustment and causal inference techniques.
- Collaborated with cross-functional teams to deliver comprehensive statistical insights, fostering a culture of shared knowledge and continuous improvement.
- Translated complex statistical findings into decision-ready summaries for non-technical stakeholders.

EDUCATION

M.S., STATISTICS (BIOSTATISTICS)

2022 - 2025

University of Nebraska–Lincoln

Lincoln, NE

M.S., MATHEMATICS (DATA ANALYTICS)

2021 - 2022

University of Alabama at Birmingham

Birmingham, AL

B.S., MATHEMATICS AND STATISTICS

2015 - 2019

University of Cape Coast

Cape Coast, Ghana

CERTIFICATIONS

CERTIFIED IN PUBLIC HEALTH (CPH)

National Board of Public Health Examiners

CERTIFIED: DATA SCIENTIST ASSOCIATE

Microsoft

CERTIFICATIONS (BIOMEDICAL & BEHAVIORAL RESEARCH)

HIPAA & CITI

TECHNICAL SKILLS

Statistical & Analytical Tools: R, SAS, SQL, Power BI, Tableau, Excel, Access.

Clinical & Data Science Methods: Longitudinal analysis, mixed-effects models, time-to-event analysis, causal inference, power & sample-size estimation, missing-data methods, sensitivity analyses.

Clinical Data & Standards: SDTM, ADaM, TFLs, SAP development, QC/validation, data traceability, audit-ready documentation.

Professional Skills: Clinical interpretation, scientific writing, stakeholder presentations, cross-functional collaboration, independent project execution.
