

AVIRAL SHRIVASTAVA

(469) 667-6291 | aviralshrivastava27@gmail.com | www.linkedin.com/in/aviralshri/ | github.com/ashriv27 | Lubbock, TX

EDUCATION

Texas Tech University, Lubbock, TX

Aug 2021 – May 2023

Master of Science in Computer Science

GPA: 3.55/4.0

Relevant Courses: Analysis of Algorithm, Computer Architecture, Machine Learning, Software Security

Rajiv Gandhi Proudhyogiki Vishwavidyalaya, Bhopal, India

Aug 2013 – May 2017

Bachelor of Engineering in Electronics and Communication

GPA: 7.45/10

Relevant courses: Microprocessors and Microcontrollers, Computer Networks, Database Management and Design

CORE SKILLS

<i>Programming Languages:</i>	Java, Python, Shell Scripting
<i>Web Technologies:</i>	RESTful APIs, HTML, CSS, AWS
<i>Databases:</i>	SQL, MySQL, DB2
<i>Frameworks:</i>	Angular, Spring Boot, Web Services, Maven, Mybatis
<i>Operating Systems:</i>	Windows, Linux/Unix
<i>Softwares / Tools</i>	Git, CI/CD, Linux, Jenkins, Postman, Jira
<i>Soft Skills:</i>	Management, Communication, Curious, Agile, Debugging, Problem Solving

EXPERIENCE

Texas Tech Health Science Centre, Lubbock, TX

Dec 2021 – Present

Software Developer

- Designed interactive GUI application using Java for speech therapy and tele practice for supporting the NIH research work.
- Enhanced python GUI application which can be utilized to diagnose speech impaired children remotely.
- Learned E-Basic object-oriented programming language and created interactive GUI applications to collect 1000s of speech samples and response data from users for NIH research.

Sears Holdings, Pune, India

Aug 2017 – Jul 2021

Software Developer

- Designed, developed, and maintained highly scalable, robust, and fault-tolerant production grade microservices and web applications by using Java and Spring frameworks.
- Improved the performance of web services and spring batch jobs, leading to a 33% reduction in the number of bugs by enhancing the code quality.
- Migrated monolithic java applications to AWS resources which helped in cost reduction by 30%.
- Built and deployed CI/CD pipelines with 100% success rate using microservices.
- Collaborated with cross technical teams to get the API specifications and for API's testing.
- Followed agile methodology and scrum with 15-day sprint cycle.

PROJECTS

Stress-ng API

- Technologies: Python, Stress testing, Linux, C
- Analyzed open-source program of stress-ng, a popular tool for stress testing of computer systems.
- Enhanced open-source program of stress-ng by developing an open API for many stress-testing functionalities.

Spam Text Detection

- Technologies: Python, Naïve Bayes, Random Forest
- Classified text from dataset as a ham and spam messages using Naïve Bayes and Random Forest classifier and concluded the best classifier by observing the accuracies.

Automatic Medicine Dispensing Machine

- Technologies: Java, ESP8266 Wi-Fi Module, Microcontroller Programming, MySQL
- Developed a software to allow doctors to prescribe medicines to patients using an RFID card using Java language.
- Integrated the software with vending machine for easy dispense of medicines by swiping the RFID card which helped in time reduction.
