

PROFESSIONAL SUMMARY

- Sr. Full Stack Java Developer with 6 years of experience in analysis, development, testing implementing Web based, Client/Server Applications.
- Distributed applications across the entire Software Development Life Cycle using Java and J2EE Technologies.
- Expertise on advanced software development methodologies such as Agile/Scrum model processes.
- Experience in Software Development Life Cycle (SDLC), Requirements Specification, designing documents and writing.
- Experience in Use Cases, Sequence Diagrams and Class Diagrams using UML, J2EE Design Patterns.
- Expertise in back - end procedure development, for Database Applications using Oracle, SQL and PL/SQL
- Hands-on experience with Integrated Development Environments (IDE's) tools like Eclipse and NetBeans.
- Experienced in other front-end technologies such as LESS, Typescript, BOOTSTRAP, Angular, Ajax, JSON, NodeJS etc.
- Expertise in J2EE Architecture using Java, JDBC, Java Beans, EJB, Servlets, JSP, JMS, Struts, ANT, Log4j, UML, XML, CSS, HTML, and JavaScript.
- Expertise in Spring framework, extensively used Spring D, Spring AOP, Spring JDBC templates and Spring MVC.
- Expertise in Client Side designing and validations using HTML4/HTML5, CSS3, JavaScript and jQuery.
- Experience in developing web interfaces using HTML5, CSS3, JavaScript, AngularJS, Angular 2.0, DOM Scripting and jQuery.
- Expertise in using Hibernate, extensively used Entity Class Associations, Criteria Queries and Projections.
- Expertise in server-side development with JDBC, JMS, Servlet, MVC architecture, Java Beans, XML
- Proficient in XML technologies like XSL, XSLT, SAX, DOM, XPath, WSDL, DTD, XSD, SOA, JAXB, Apache Axis.
- Experience working with SOAP and Restful Web Service.
- Extensive experience using MAVEN to build the projects.
- Comprehensive knowledge of physical and logical data modeling, performance tuning and monitoring.
- Strong web development skills using HTML/HTML5, CSS/CSS3, JavaScript (ES5 & ES6), jQuery, BOOTSTRAP, Angular JS, React JS, Node JS, Require JS, XML, AJAX, JSON which meets W3C Web Standards.
- Experience working with Agile SCRUM methodology and working in pair.
- Experience in client-side development with CSS, JavaScript.
- Extensive experience in developing GUIs using Struts, SPRING MVC, SPRING web flow Frameworks.
- Experience Hands on with PL-SQL Stored Procedures, Triggers and Views.
- Experience on Web Services, SOAP, JAX-RPC, WSDL, JSF, HIBERNATE, EJB, XML.
- Experience in SPRING, struts frameworks.
- Experienced with IBM WebSphere Application Server, Oracle WebLogic application servers, BOSS and Apache Tomcat Application Server.

- Have good experience in using Version Controlling tools (CVS, VSS, CM SYNERGY, Subversion, ClearCase and Jenkins) and defect tracking tools like Clear Quest, Quality Center.
- Proficient in SQL, PL/SQL, Views, Functions, Stored Procedures and Triggers.
- Having hands-on experience in deploying web and j2EE enterprise applications on WebLogic, WebSphere, Tomcat and JBOSS Server.
- Worked in TDD and version management tools GitHub, SVN.
- Experience in LDAP for authentication schemes and in middleware technologies.
- Experienced in methodologies like Iterative, Agile, Scrum and waterfall approaches.
- Experience in working as a developer, a team lead, and an onsite coordinator.
- Experience in interacting with the client directly at client location.
- Possessing good interpersonal skills which were applied in coordinating with the development team, QA team and support team as required.
- Have the motivation to take independent responsibility as well as ability to contribute and be a productive team member.

EDUCATION

Bachelors in computer science

St. cloud state university

720 4th Ave S, St. Cloud, MN, 56301

TECHNICAL SKILLS

Programming Languages	Core Java 1.8, SQL, PL/SQL, C, C++.
Java Technologies	Servlets, JSP, JDBC, JNDI.
Frameworks	MVC, Spring 3.2, Hibernate and JDBC.
Distributed Technologies	Web Services (SOAP/REST), SOA, RMI, XSLT, XSD, DOM, SAX, Apache, WSDL.
Web/Application Servers	JBoss, Apache Tomcat, WebSphere, WebLogic.
IDEs	Eclipse, My Eclipse, JDeveloper, NetBeans.
Scripting Languages	AngularJS, JavaScript, jQuery, CSS3.

Markup Languages	HTML, DHTML, XML.
Testing/Logging Tools	JUnit, Log4j.
Database Server	Oracle, MySQL, SQL Server, DB2.
Methodologies	OOPS/OOAD, UML, Design Patterns, Agile.
Messaging Services	JMS.
Version Control Tools	GIT, SVN, CVS.

PROFESSIONAL EXPERIENCE

Vindicia, REDWOOD CITY, CA

Jan 2023- Present

Full Stack Java Developer

- Involved in Design, Development and Support phases of Software Development Life Cycle (SDLC).
- Used AGILE methodology and participated in SCRUM meetings.
- AWS EC2 instances were configured in developing and QA environments with Node/5.
- Designed interactive web pages with front-end screens using HTML and CSS3.
- Designed and implemented the user interface using HTML5, CSS3, JavaScript and AngularJS.
- Developed Hibernate mapping files using different mapping strategies such as table per class hierarchy and used Hibernate Persistence Strategy to interact with
- Developed cross-browser/platform HTMLS, CSS, and Java Script to match design specs for complex page layouts while adhering to code standards.
- Used advanced level of HTML, JavaScript, CSS and Angular 2.0
- Enhanced user experience by designing new web features using MVC Framework such as Express JS and Node JS.
- Worked on the modernization of a legacy and outsourced UI technologies used were Angular JS, CSS, Node JS, and AWS (Amazon Web Services)
- Developed a tool to retrieve and send data to third party service providers, this feature was implemented using REST.
- Involved with bug fixing on functionality, performance and designing issues with JavaScript, jQuery, HTML, CSS, and AngularJS.
- Used Bootstrap and Angular, React Js and Node js in effective web design.
- Created Buckets in AWS and stored files. Enabled Versioning and security for files stored.
- Used RESTFUL client to interact with the services by providing the RESTFUL URL mapping.
- Built MAVEN scripts for automated deployment for the build operation of the entire application.
- Deployed the application in WebSphere Application Server 6.0.1 and Configured JMS in the WebSphere application server to send messages on the queue.
- Spring controllers were used with Angular JS to route the control to desired lava services.
- Implemented scripting with Ajax and XML TC dynamically refresh the page contents.

- Developed Controller for request, response paradigm by Spring Controllers using Spring-MVC. Used JSON as response type in REST services.
- Involved with bug fixing on functionality, performance and designing issues with JavaScript, Query, HTMLS, CSS3 and AngularJS.
- Developed core Java programs for all business rules and workflows using spring framework.
- Utilized Vue.js to build the front-end of the web application, ensuring a smooth and interactive user experience.
- Designed and developed restful service interface using Spring MVC to the underlying customer event API. Involved in building Restful Web services using JAX-RS API.
- Worked on Cloud implementation by installing, building and deploying applications using cloud Foundry and using Aws.
- Created custom Plugins, templates, and functions for AngularJS application.
- Implemented Hibernate for data persistence and management.
- Analyzed and fixed issues related to REST Web services and Application responses.
- Used Maven as the build tool and TortoiseSVN as the Source version controller:
- Used Subversion as the configuration management tool to manage the code repository.
- Performed unit testing using JUnit.
- Followed Agile Scrum methodology and used TDD for writing test cases.
- Involved in developing stored procedures and Triggers on Oracle.
- Used NPM to manage server-side packages.

Environment: Java 1.7, J2EE, Spring Framework 4.0, Hibernate, AJAX, Oracle, Web Services, AWS, Agile, REST, XML, SOAP, WebSphere, JavaScript, Angular S, NodeJS, ReactJS, Bootstrap, Query, JBOSS, JUnit, Grunt, GitHub, SQL, JMS, HTML5, JSP, CVS, CSS3, MVC, Maven and SVN.

Minnesota Lakes Insurance, MAPLE GROVE, MN

Sep 2020- Dec 2022

Java Full Stack Developer

Responsibilities:

- Worked as a full stack developer to develop web applications using spring. Rest based Web services. Used HTML, CSS3, JavaScript, JSP, JQUERY, AngularJS, AJAX, Bootstrap in front end.
- involved in Design, Development, Unit Testing and maintenance of application.
- Involved in discussions with Business Analysts and designed the TDD (Technical Design Documents).
- Involved in writing Spring Configuration XML files that contain declarations and other dependent objects declaration.
- Designed and documented REST/HTTP APIs, including JSON data formats and API versioning strategy.
- Implemented Vuex for state management and Due Router for navigation between different components.
- Developed user interface using BOOTSTRAP UI and Angular JavaScript to simplify the complexities of the application.

- Worked extensively with importing metadata into Hive using Scala and migrated existing tables and applications to work on Hive and AWS cloud Developed code for server side and client-side implementations using Spring Web MVC, OP and Dependency Injection.
- Developed User Interfaces using HTML and Backbone.Js.
- Developed reusable Backbone.JS directives and worked on Backbone is Controllers which Isolates scope to perform operations in UI.
- Implemented scripting with Ajax and XML to dynamically refresh the page contents and Implemented JAXB in XML binding.
- Experience in Developing User Interface (UI) Rich Web Applications and Web Service Applications using HTML 4, XHTML, CSS 2, XML, AJAX, Object Oriented Java Script, ANGULARJS, REACTS, BOOTSTRAP Framework, RESTful services, JAVA, JSP.
- Working on AWS Elastic load balancing for deploying applications in high availability.
- Developed API for using AWS Lambda to manage the servers and run the code in the AWS.
- Angular IS was used to parse the JSON file using the REST web services.
- Developed business tier components and services using RESTful web services.
- Used Spring Rest Controllers, Spring Web MVC and Spring Boot extensively to implement server-side business logic.
- Developed cross-browser/platform HTML5, CSS3, and JavaScript to match design specs for complex page layouts while adhering to code standards.
- Used advanced level of HTML5, JavaScript, CSS3 and pure CSS layouts (table less layout).
- Used Spring JPA to design entity data mapping with Oracle DB.
- Implemented Log4j1.2 for Logging Errors, debugging and tracking using loggers.
- Involved in JAD sessions with the client and functional team and gave demos on developed functionality.
- Involved in production support for resolving user problems.
- involved in pre-testing the Web-Service calls with Postman (Plug- in for chrome).
- Developed Unit test classes for Controller, Service and Data layers.
- Performed code reviews and provided guidelines for best practices of software management, Coding Standards and Code Commenting for better understandability.
- Used Mockito for data mapping along with J-unit.

Environment: Java, J2EE, Hibernate, AJAX, Oracle, Web Services, AWS, Postman Agile, WebSphere, JavaScript, Angular , NodeJS, ReactJS, Bootstrap, Query, JUnit, CVS, CSS3, MVC, Maven, SVN, Mockito, Log4j, JPA, HTML, Spring Boot, MVC, Bootstrap

Legacy Home Care, GOLDEN VALLEY, MN

Jun 2018 - Aug 2020

Java Developer

Responsibilities:

- Involved in the requirements analysis, designing, development, testing and deployment of the enhancements.

- Develop Servlets, Session, and Entity Beans to implement business logic and deploy them on the Web Sphere Server.
- Developed and implemented the MVC Architectural Pattern using Struts Framework including JSP, Servlets, EJB, Form Bean and Action classes.
- Used Web logic server for deployment and eclipse 3.0 as Java IDE tool for creating JSP's, Servlets.
- Involved in developing raw java back-end programs for back-end Interfaces programs which would involve processing the batch files and the mockup files.
- Used SP, JavaScript, JSTL, EL, Custom Tag libraries, Tiles and Validations provided by struts framework.
- Worked extensively on SOAP Web Services, XML. IMS and Sarine Controller.
- SOAP (AX-W5) web services have been developed to be consumed by a middleware module to push the communication center messages into the web module.
- Created relevant staging tables to load the CV files, identified the business validation rules. Created SQL Loader script generator application using UNIX shell scripting and PL/SQL.
- Coded different action classes in struts responsible for maintaining deployment descriptors like struts-config, EJB-jar and web.xml using XML.
- Developed authentication and authorization classes and manage it in the front controller for all the users per their entitlements.
- Implemented caching techniques, wrote POJO classes for storing data and DAO's to retrieve the data and did other database configurations using EJBs.
- Prepared EB deployment descriptors using XML.
- Involved in Configuration and Usage of Apache Log4j for logging and debugging purposes.
- Created log scripts in XML and the corresponding code in the java classes.
- Developed Action Classes to service the requests from the UI, populate business objects & invoke EJBs.
- Develop the User Interface Screens for presentation logic using JSP, Struts and HTML.
- Created Web service methods and worked on making changes to the WSDL and SOAP protocols as required by the design for the application.
- Written and debugged the ANT Scripts for building the entire web application.
- Created Unit test classes for the services and prepared documentation.

Environment: Core Java, JEE, Struts, JSP, JSTL, Servlets, JDBC, Log4j, Ant, Apache Tomcat Server, XML, AJAX, JavaScript, Eclipse, GIT, Oracle, PL/SQL.
