
BHUMI AMIN

Sparta, NJ 07871 | 862-384-5055 | bhumiamin2508@gmail.com

Summary

Compassionate Clinical Data & NICU Specialist with a background in Neonatal Intensive Care Unit (NICU) support, healthcare data analysis, and clinical technology implementation. Proven track record of collaborating with multidisciplinary teams to enhance patient care, feeding management practices, and optimize clinical workflows. Experienced in EMR/EHR data management, clinical documentation, reporting, and user support. Certified in Good Clinical Practice with a passion for driving patient care excellence and technology adoption.

SKILLS

- **NICU Clinical Support & Feeding Management Assistance**
- **Clinical Data Analysis & Reporting (SQL, Python, Tableau, Power BI)**
- **Scientific Communication & Reporting (Reports, Presentations)**
- **Systematic Literature Review (PRISMA, PubMed, PICO) – Ongoing Self Projects**
- **Clinical Documentation Management (EHR, EMR)**
- **Regulatory Research Awareness (FDA, EU MDR – Self Learning)**
- **Quality Control, Data Validation, Risk Assessment**
- **GCP Certified | Statistical Tools (SAS, SPSS)**

Certifications

- Clinical Trials: Good Clinical Practice Specialization
- Microsoft Power BI Analyst
- IBM Data Analyst
- IBM Data Science
- Preparing Data for Analysis with Microsoft Excel
- Python for Data Science, AI & Development
- Homeopathic Physician
- Healthcare IT Support
- Medical Billing and Coding Fundamentals
- Systematic Review and Meta-Analysis – Ongoing (Coursera/Udemy)

Education

Rutgers School of Health Professions - Piscataway, NJ | Master of Science
Health Informatics, 05/2025

Baroda Homoeopathic Medical College - India | Bachelor of Science
Bachelor of Homeopathic Medicine and Surgery, 07/2019

Experience

DATA ANALYST INTERN | 01/2022 - 07/2022

Lifeline Hospital - Vadodara, India

- Analyzed healthcare trends and supported data-driven clinical decisions.
- Developed reports using SQL, Python, and Excel for clinical decision-making support.
- Ensured data integrity through audits and validation of EHR data.
- Created dashboards and clinical presentations for stakeholders.

PHYSICIAN ASSISTANT | 01/2021 - 12/2021

Lifeline Hospital - Vadodara, India

- Managed electronic medical records (EMR) to ensure accurate patient care data.
- Monitored disease progression trends through patient record evaluation.
- Conducted regular follow-up visits to track patient progress.
- Documented patient visits in the EMR system, with proper coding.
- Ensured patient privacy and compliance with HIPAA data security standards.

CLINICAL ASSISTANT – NICU & COVID UNIT | 12/2019 - 07/2020

Parul Institute of Medical Sciences & Research

- Provided bedside care and feeding support for critically ill neonates in the NICU.
- Assisted in feeding preparation, feeding record documentation, and collaboration with lactation consultants.
- Supported the clinical team during COVID care, managing real-time patient data and vital sign monitoring for epidemiological reporting.
- Collaborated with nurses and physicians to streamline care delivery and ensure adherence to protocols and safety standards.

MEDICAL OFFICER INTERN | 07/2018 - 11/2019

Samarpan Hospital

- Managed patient medical records and improved documentation processes to enhance clinical decision-making
- Coordinated referrals and ensured proper coding for insurance claims

PROJECTS & DATA ENGINEERING EXPERIENCE

Healthcare Insurance Management System (Course Project)

- Designed and developed a healthcare insurance management system using SQL.
- Created normalized database schemas to efficiently store and retrieve insurance records.
- Wrote optimized SQL queries to manage policyholder data, claims, and payments.
- Implemented stored procedures and triggers to automate policy updates and claim approvals.

Heart Disease Prediction using Python (Project)

- Analyzed heart disease prediction dataset using Python (Pandas, NumPy, Scikit-learn) in Jupyter Notebook.
- Performed data preprocessing, feature selection, and model training. Built and evaluated machine learning models (Logistic Regression, Random Forest, SVM) for prediction.
- Created visualizations using Matplotlib and Seaborn to explore data patterns.
- Analyzed heart disease prediction dataset using Python (Pandas, NumPy, Scikit-learn).
- Performed data preprocessing, feature selection, and model training.
- Created visualizations using Matplotlib and Seaborn to explore data patterns.

SQL Data Analysis & Report Writing

- Developed complex SQL queries for data retrieval and reporting.
- Created automated reports using Python and SQL to improve reporting efficiency.
- Presented insights to stakeholders, enhancing data-driven decision-making.

ADDITIONAL INFORMATION

Additional Information

- Actively pursuing knowledge in FDA, EU MDR, and medical device clinical evaluation frameworks.
- Fast learner with passion for clinical evidence strategy, medical device regulations, and scientific storytelling.
