EDUCATION

University of Houston, C. T. Bauer College of Business, Houston, TX
Master of Science in Management Information Systems, **GPA: 3.89/4.0**

August 2022

University of Mumbai, K.J. Somaiya College of Engineering, India
Bachelor of Science in Information Technology

May 2017

- **Relevant Coursework:** Object-Oriented Programming, Data Structure and Algorithm, Operating Systems, System Analysis and Design, Distributed Systems, Advanced Programming for Big Data Analytics, Business Analytics in R, Predictive Analytics, Database Management Tools for Business Analytics (NoSQL), Relational Database Management Systems (RDBMS)

TECHNICAL SKILLS

- **Languages:** C,C#,C++,Java/J2EE, Kotlin, .NET, Python (Pandas, NumPy, matplotlib, PySpark), R (ggplot2, dplyr, tidyverse)
- **Web-based Technologies:** HTML5, CSS, Bootstrap, JavaScript, Angular, ReactJS, Redux, TypeScript, Flask, Node.js, XML, JSON
- **Databases:** MySQL, NoSQL (HBase/ Hadoop, Hive, Mongo DB, CouchDB, Neo4j, Redis), DynamoDB, Oracle PL/SQL
- **Tools:** Power BI, Tableau, SAS, IntelliJ, Jupyter Notebook, Eclipse, RStudio, Jenkins, GIT, Jira, HP ALM, MS Excel (Pivot Tables, VLOOKUP), WebStorm, VS Code, ESLint, Selenium, Jest, Build tools: Maven/Gradle, Jasmine, Apache Spark, Apache Tomcat
- **Cloud:** AWS Lambdas, Step-Functions, S3 buckets, EC2, Cloud Watch, IAM, Cloud Formation, Athena, Redshift, Quicksight
- **Certification:** Agile Professional (Accenture), Automation Prime in AI & Data Analytics (Accenture)

EXPERIENCE

UI PATHTEK LLC – Software Development Engineer, USA

May 2023 – Present

- Interacted with clients to understand business requirements, created SQL database tables, and added endpoints in the microservice to perform CRUD operations.
- Built dashboards by retrieving data from SQL Server to track internal employee data on the bench and allocate them to client projects as per demand. This has reduced employees on the bench by 25%.

AMAZON WEB SERVICES – Software Development Engineer I, USA

August 2022 – May 2023

Technology: Python, Flask, Boto3, HTML, CSS, Typescript, CDK, AWS, SQL, Java, Rest API, Microservices, SOAP, Kotlin, ReactJS, Linux, Test-Driven Development (TDD), CI/CD, Docker, Agile: Scrum and Kanban

- Designed, developed, and deployed a testing framework for Amazon Connect Service, focusing on the perspective of external customers. This framework enhanced team operational efficiency by 35% and participated in the on-call support.
- Established metrics and alarms through Amazon CloudWatch, and constructed dashboards for the Wisdom Content Indexing feature, enabling analysis of customer usage.
- Collaborated with PMs and SDMs to develop ETL solutions and implement downloadable reports that evaluate the utilization of the Wisdom service across various channels, including voice and chat, in order to inform strategic business decisions.
- Consistently contributed to process improvement by ensuring the health of pipelines, migrating services to CDKV2, designing code review templates to safeguard customer data, and writing tests such as JUnit, Mockito, Integration, and Canary testing.

ACCENTURE SOLUTIONS PVT LTD – Application Development Analyst, India

December 2017 - December 2020

Technology Stack: HTML, CSS, JavaScript (ES6), AngularJS, React JS, Java8, Springboot, Bootstrap, CI/CD, Apache Kafka, Agile: Scrum

- Developed highly interactive web application for a major U.S. telecom using React JS, JavaScript, HTML, CSS, Bootstrap, SASS
- Worked on building the backend spring web flow services based on Spring boot and Java by adding the business layer logic
- Increased code coverage of classes by writing unit test cases using Junit and Mockito adopted SonarQube parameters which improved overall code quality by 25%. Provided on-call support and maintenance for released features.
- Worked in an Agile environment (stand-ups, sprint planning, team retrospectives, demo sessions). Interacted with the Product Owner and Business Analyst to develop and deliver the requirements within the stipulated timeframe.

PROJECTS

Impacts of Covid-19 on mental Health using MongoDB

August 2021 – December 2021

- Conducted web scraping of a Kaggle, cdc.gov website to find two real-time datasets of Covid-19 and mental health in the US
- Performed data cleaning, data-wrangling on the dataset, and analysis on impacts of covid-19 trends on mental health using Power BI, deploying MongoDB and MySQL on a spreadsheet of 500,000+ entries
- Analyzed the results and concluded variables such as virus spread and unemployment in the year 2020-2021 have impacted mental health during a pandemic

Resort Hotel room-book prediction - Data analytics in R

August 2021 – December 2021

- Performed data munging, and data visualization on 10,000+ records using R programming
- Implemented linear regression to determine the KPIs out of 10 attributes that can improve room-book
- Increased room booking by 55% by performing a regression model to determine variance using room booking predictors

ACHIEVEMENTS

Star Performer Award - for remarkable performance, diligently initiating and leading new tasks (August 2020)
