

Mari Setty Chinni Krishna

Mount Pleasant, Michigan | Maris1c@cmich.edu | +1 989-317-7145 | LinkedIn: [Chinni Krishna](#)

EDUCATION:

Central Michigan University

Jan 2024 – Dec 2025

Masters in computer science

Related Coursework: Information Security, Networking, Web Development, Data Analytics

Sree Vidyanikethan Engineering College

Jun 2019 - Jun 2022

Bachelor of Engineering in Computer Science

Related Coursework: Computer Networks, Data Structures, Object Oriented Programming, Design and Analysis of Algorithms, Database Management Systems, Operating Systems

TECHNICAL SKILLS:

Expertise Areas: Cybersecurity, Identity Management, Deep Learning, Cloud Platforms

Languages: Python, Java, JavaScript, TypeScript, C/C++, SQL, Linux

Frameworks/Web Technologies: SailPoint, AWS, Azure, GCP

Databases: Oracle, MySQL, SQL Server, MongoDB, PostgreSQL

Technologies: AWS, Azure, Power BI, Snowflake, Figma, Git, GitHub, Bitbucket, Postman, Docker, Kubernetes

EXPERIENCE:

Cyber Security Analyst, Cognizant

Jun 2022 - Nov 2023

- Analyzed and processed identity management workflows in SailPoint, reducing processing time by 40% and improving operational efficiency.
- Conducted over 200 Play Store application security reviews per month, ensuring adherence to industry security standards and compliance requirements.
- Introduced best practices for data privacy and security, resulting in a 30% increase in application compliance and a 20% reduction in data privacy incidents.
- Resolved 90% of flagged issues within 48 hours, achieving a 95% approval rate for applications through comprehensive security reviews and effective developer collaboration.
- Enhanced SailPoint workflows, reducing unauthorized access incidents by 25% and increasing system security ratings by 15%.
- Built and documented incident response strategies, improving the team's ability to address and resolve security issues promptly.

Software Development Intern, Epam Systems India Pvt Ltd

Jun 2020 - May 2021

- Completed over 10 object-oriented programming projects, improving team productivity by 25%.
- Enhanced code quality across projects by 30% through best practices, reducing defect rates by 20%.
- Conducted over 50 test cases with a success rate of 95%, gaining experience in both manual and automated testing.
- Fostered collaboration to boost project delivery speed by 15%.

PROJECTS:

Identity Management Optimization

- Launched and Defined workflows in SailPoint to streamline access control.
- Initiated system security ratings by 15% through robust user authentication mechanisms.

Malaria Detection using Deep Learning

- Built a convolutional neural network (CNN) model using VGG19 architecture for malaria detection from microscopic blood smear images.
- Combined training using advanced techniques such as learning rate scheduling and data augmentation, improving accuracy by 15%.
- Restructured the model with TensorFlow and Keras, achieving 95% classification accuracy on test datasets.
- Designed a user-friendly front-end interface for real-time image uploads and disease prediction.

Disease Data ETL and Analysis using AWS

- Developed and automated ETL pipelines using AWS S3, Athena, Lambda, and Redshift for extracting, transforming, and loading disease data, including COVID-19.
- Cleaned and transformed raw data using Athena queries and Lambda functions before loading it into Redshift for scalable storage and analysis.
- Transformed ETL workflows, improving data processing speed by 25% with AWS Redshift and Lambda automation.
- Created real-time dashboards in AWS Quick Sight to visualize disease trends and support data-driven decision-making.
