

Chintankumar Devani

California, USA | (669) 207-2208 | Chintanat03@gmail.com | <https://www.linkedin.com/in/chintan-devani-03>

SUMMARY

- Marketing Data Analyst with 4 years expertise in designing and implementing end-to-end data pipelines, performing ETL, data cleaning, and integration across multiple structured and unstructured data sources.
- Skilled in SQL, Python, and advanced Excel, leveraging programming and analytical techniques for data modeling, statistical analysis, forecasting, and predictive analytics in retail and pharmaceutical domains.
- Proficient in developing and maintaining interactive dashboards using Power BI, Tableau, and Looker Studio, enabling self-service reporting and actionable insights for marketing, sales, and operational teams.
- Experienced in marketing analytics, CRM, and digital campaign measurement, including multi-touch attribution, audience segmentation, campaign performance analysis, and funnel optimization.
- Adept at integrating cloud and enterprise platforms, including Google Cloud Platform, BigQuery, SAP ECC, Salesforce Marketing Cloud, and Adobe Analytics, to create unified datasets for analysis and reporting.
- Demonstrated ability to collaborate with cross-functional teams, define KPIs, and deliver data-driven recommendations that support business strategy, process improvement, and marketing optimization.

SKILLS

Data Analysis & Visualization:	Microsoft Excel (Advanced Formulas, Pivot Tables, Power Query), Power BI, Tableau, Google Data Studio, Looker Studio, Qlik Sense
Statistical Analysis & Modeling:	SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), R, A/B Testing, Regression Analysis, Hypothesis Testing
Database Management:	MySQL, PostgreSQL, Google BigQuery, Snowflake, Microsoft SQL Server
Marketing Analytics Tools:	Google Analytics 4 (GA4), Google Tag Manager, Adobe Analytics, HubSpot, SEMrush
Digital Marketing Platforms:	Google Ads, Meta Ads Manager, LinkedIn Campaign Manager, Bing Ads
CRM & Marketing Automation:	Salesforce, HubSpot CRM, Zoho CRM, Marketo, Mailchimp
Data Cleaning & ETL:	Python (ETL scripting), Alteryx, Talend, Power Query, OpenRefine
Reporting & Dashboarding:	Power BI Service, Tableau Server, Google Looker Studio, Excel Macros
Business & Product Analytics:	Mixpanel, Amplitude, Hotjar, Kissmetrics, Market Segmentation, GAP Analysis, SWOT, Competitor Analysis, Customer Journey Mapping, KPI Design & Tracking, ROI Analysis, Funnel Analysis, Sales Forecasting
Project Management:	Jira, Trello, Asana, Microsoft Teams, Slack
Other Technical Competencies:	API Data Integration, Data Warehousing Concepts, SEO/SEM Analysis, Forecasting Models, AI (Artificial Intelligence), ML (Machine Learning), Stakeholder Engagement, Requirements Gathering, Business Process Optimization, Product Strategy, Change Management, Cross-Functional Collaboration, Campaign Performance Analysis, Budgeting & Forecasting, Customer Retention Strategy

WORK EXPERIENCE

The Home Depot

Jan 2024 – Present

Marketing Analyst – E-Commerce

California, USA

- Built scalable ETL pipelines in Google Cloud Platform (BigQuery, Dataflow) to ingest, transform, and validate 500M+ daily ad impressions, clickstream events, and e-commerce transactions, enabling near real-time campaign performance tracking.
- Designed SQL-based audience segmentation models leveraging transactional and mobile telemetry data, implemented in Adobe Audience Manager, improving campaign engagement by 13% and reducing acquisition costs by 9%.
- Developed a multi-touch attribution model in Python (Pandas, NumPy, Scikit-learn) using DV360, Adobe Analytics, and Salesforce Marketing Cloud, improving attribution accuracy by 22% and informing \$15M+ annual media spend.
- Designed and implemented AI-driven customer propensity models using Machine Learning algorithms (Logistic Regression, Gradient Boosting) in Python and BigQuery ML to predict conversion likelihood, optimize audience targeting, and increase campaign ROAS by 11%.
- Built predictive ad revenue models in Python using historical DV360 and sales data to forecast slot-level profitability, generating actionable recommendations that drove \$2.1M in incremental annual revenue.
- Conducted cross-channel performance analysis by integrating DV360 programmatic spend with e-commerce revenue in BigQuery, identifying underperforming channels and reallocating 12% of media budget to higher-ROI campaigns.
- Led A/B and multivariate experiments in Optimizely on homepage carousels and sponsored listings, optimizing creative placement and content strategy, resulting in a 9% increase in high-margin product conversions.

- Implemented personalized CRM campaigns in Salesforce Marketing Cloud using customer lifetime value and behavioral segmentation, enhancing retention rates and driving repeat purchase growth.
- Developed AI-powered Customer Lifetime Value (CLV) and churn prediction models using Scikit-learn, leveraging behavioral, transactional, and clickstream data to enable intelligent personalization strategies and improve retention by 8%
- Created dynamic Power BI dashboards connected to BigQuery and Salesforce Marketing Cloud, enabling executives and marketing teams to access self-service insights and reducing manual reporting by 40 hours/month.
- Automated daily campaign reporting and KPI tracking in Power BI using SQL queries and BigQuery views, providing near real-time insights for media and analytics teams.
- Delivered quarterly scorecards and campaign insights in Power BI, highlighting attribution results, revenue trends, audience behavior, and channel performance, supporting a 14% YoY growth strategy for the retail media business.

Accenture (Client: Mankind Pharma)

Jan 2021 – Dec 2022

Data Analyst

India

- Extracted and cleaned 50M+ monthly sales, inventory, and distributor records from SAP ECC using SQL Server, ensuring accurate SKU-level reporting for 120+ pharmaceutical products, including Moxikind, Telmikind, NMF, and nutraceuticals.
- Developed ETL workflows in Python (Pandas) to standardize distributor IDs, align sales territories, and resolve SKU discrepancies, increasing master data reliability from 85% to 97%, supporting consistent downstream reporting and analytics.
- Built time-series forecasting models using Python (Prophet and ARIMA) to predict SKU-level demand, improving forecast accuracy by 21% and reducing stock-outs for high-demand products during peak season by 15%.
- Integrated internal sales and inventory data with IMS Health market intelligence in SQL Server and created competitor benchmarking dashboards in Tableau, identifying 7% untapped market potential in underpenetrated Tier-2 and Tier-3 regions.
- Conducted promotional effectiveness analysis using Python (SciPy for hypothesis testing) and cohort analysis, optimizing dermatology and gynecology campaigns and increasing campaign ROI by 18% on an annual ₹25 Cr spend.
- Performed market basket and customer segmentation analysis using SQL and MLxtend (Python) to identify high-value customer segments and bundling opportunities, increasing average order value by 14% and improving distributor targeting.
- Designed interactive Tableau dashboards to monitor six distributor networks, tracking sales vs. target, coverage, stock aging, fulfillment, and promotional impact, identifying inefficiencies that drove ₹3.2 Cr incremental sales.
- Built contribution margin dashboards in Excel Power Query, integrating sales, freight, and discounting data to identify pricing optimization opportunities, unlocking ₹2.5 Cr in annual savings.
- Automated weekly reporting pipelines by embedding SQL queries into Power BI datasets, enabling near real-time visibility of sales, inventory, and marketing KPIs, and reducing report generation time from 7 days to under 24 hours.
- Led hands-on training for 25+ regional managers on Power BI and Tableau, boosting self-service analytics adoption from 35% to 92% and enabling data-driven decision-making in sales and marketing operations.

EDUCATION

Master of Science in Computer Science
California State University Long Beach

GPA: 3.7/4
California, USA

CERTIFICATION

Google Data Analytics Professional Certificate – Foundations Data, Data Everywhere
