Summary

Business Analyst with 3 years of experience delivering technology-enabled business solutions across finance, banking, and technology domains. Proficient in authoring BRDs, FRDs, and RTMs, managing requirements traceability, and executing GAP and impact analysis to ensure alignment with enterprise objectives. Skilled in Agile (Scrum, Kanban) and Waterfall methodologies, sprint planning, and facilitating UAT to drive high-quality deliverables. Experienced in building KPI-driven dashboards using Power BI and Tableau, conducting SQL-based data validation, and optimizing reporting processes that improved forecasting accuracy and executive decision-making. Adept in process modeling with BPMN and UML, developing As-Is/To-Be workflows, and collaborating with stakeholders to enhance operational efficiency, regulatory readiness, and business growth

Technical Skills.

- **Business Analysis & Requirements Engineering:** Business Requirements Gathering, Functional & Non-Functional Requirements, BRD, FRD, Use Cases, User Stories, Acceptance Criteria, Requirement Traceability Matrix (RTM), GAP Analysis, Impact Analysis, Business Rules Documentation, Stakeholder Requirement Analysis
- **Process Modeling & Optimization:** Business Process Modeling (BPMN), UML Diagrams, As-Is/To-Be Analysis, Workflow Optimization, Process Reengineering, Root Cause Analysis, Value Stream Mapping, Microsoft Visio.
- **Agile and Project Management:** Agile (Scrum), Waterfall, Sprint Planning, Backlog Grooming, User Story Mapping, Daily Standups, Product Backlog Management, JIRA, Confluence, SDLC, Smartsheet, Trello, MS Project
- **Data Analysis & Reporting:** SQL (Querying & Validation), Microsoft Excel (Pivot Tables, Power Query, VLOOKUP, Advanced Formulas, Macros), Data Profiling, Data Validation, KPI Metrics, Power BI, Tableau, Dashboard Development, Data-Driven Decision Making
- **Collaboration & Documentation Tools:** MS Teams, SharePoint, Slack, ServiceNow, Microsoft Office Suite, Google Workspace, SOP Documentation, Workshop Facilitation, Training Materials
- **Soft Skills:** Stakeholder Engagement, Critical Thinking, Business Acumen, Communication, Problem-Solving, Change Management, Leadership, Conflict Resolution

Professional Experience

Business Analyst, *Accenture*

Apr 2025 – Present | Remote, USA

- Gathered and translated business requirements into BRDs, FRDs, and user stories, collaborating with stakeholders to design scalable solutions that improved operational efficiency by 20%.
- Partnered with cross-functional teams to analyze customer behavior data, aligning retention strategies with business objectives, regulatory standards, and improving client satisfaction scores by 15%.
- Designed and deployed Power BI dashboards for executives, visualizing churn analysis, revenue forecasting, and engagement KPIs, enhancing forecasting accuracy by 30% and enabling data-driven strategic decisions.
- Facilitated Agile ceremonies including sprint planning, backlog grooming, daily standups, and retrospectives, while managing requirement traceability (RTM) to ensure 100% stakeholder alignment.
- Supported UAT planning, test case design, defect tracking, and issue resolution using JIRA and Confluence, reducing testing cycle times by 25% and improving release readiness.
- Authored process documentation, workflows, and SOPs, improving knowledge transfer and standardization across business and IT teams.

Business Analyst, *Citigroup*

Aug 2024 – Mar 2025 | Remote, USA

- Conducted stakeholder interviews and requirement workshops to capture reporting and compliance analytics needs, converting them into BI dashboards that reduced manual reporting requests by 28%.
- Led data migration initiatives from legacy banking systems to Snowflake, ensuring compliance with regulatory standards, data governance, and integrity, enabling 99% reliable and audit-ready reporting.
- Managed backlog grooming, sprint reviews, and requirement prioritization in JIRA, ensuring 100% on-time delivery of financial intelligence and regulatory reporting initiatives across global teams.
- Partnered with business, compliance, and risk teams to deliver KPI-based reporting solutions, improving retention analysis, audit readiness, and driving a 15% increase in revenue opportunities.
- Developed process documentation, SOPs, and As-Is/To-Be models using Visio and Lucidchart, standardizing reporting workflows and cutting redundant manual queries by 40%.

- Conducted root cause analysis and GAP analysis for financial data quality issues, implementing preventive measures that increased executive confidence in regulatory dashboards by 25%.

Business Analyst, TCS

May 2021 – Apr 2023 | India

- Collaborated with financial clients to gather and document requirements for portfolio analysis, risk assessment, and market trend dashboards, resulting in a 15% improvement in investment strategies.
- Defined functional and non-functional requirements (FRDs, BRDs, acceptance criteria) for Tableau dashboards, enhancing financial risk reporting and reducing executive reporting turnaround by 40%.
- Created process maps, workflow diagrams, and data flow documentation using BPMN and UML, supporting business case development and portfolio diversification strategies.
- Coordinated across IT and business units to automate ETL workflows using SQL and Airflow, reducing manual data preparation by 50% and aligning outputs with business KPIs.
- Conducted risk analysis, UAT planning, and requirement-based testing scenarios to safeguard millions in assets under management, reducing exposure to market volatility.
- Engaged in change management, stakeholder communication, and requirements traceability activities, ensuring adoption of new reporting solutions and regulatory compliance.

Projects

Best Cricket Team from ICC T20 World Cup 2024

- Built a data-driven selection model using player performance data from the ICC T20 World Cup 2024, leveraging Python and Tableau to apply advanced analytics and ensure objective, role-specific selection criteria.

Multiple Object Detection in Autonomous Vehicles

- Developed a real-time object detection system for autonomous vehicles using deep learning and OpenCV, enabling accurate identification of pedestrians, vehicles, and obstacles for enhanced road safety.

Customer Churn Prediction

- Created an 85%-accurate customer churn prediction model using Python, SQL, and Tableau, delivering targeted retention strategies that increased customer retention by 12%.

Certifications

- Data Analytics, SQL, and Machine Learning Models – Udemy | Oct 2024
- MongoDB Basics – MongoDB University | Aug 2021
- Managing Agile Team – Coursera | Jul 2021
- Agile Foundation – Accenture | 2025

Education

Master of Science, Cleveland State University

May 2023 – Dec 2024 | OH, USA

Computer Science

Bachelor of Engineering, Kumaraguru College of Technology

Jun 2019 – May 2022 | Tamil Nadu, India

Computer Science
