SUMMARY

- Analyst skilled in data science and advanced analytics with experience in SQL, Python, Power BI, Tableau, and Snowflake. Strong background in predictive modeling, data pipelines, and dashboarding to drive actionable insights across financial services, trading, and business intelligence.

SKILLS

Programming: Python, Java, C++, SQL

Data Tools: Pandas, Scikit-learn, Snowflake, Power BI, Tableau, Flask, Excel, Power Query

Expertise: Machine Learning, Feature Engineering, Data Cleaning, Data Visualization, Regression Models

EDUCATION

Duke University

Durham, NC

Bachelor of Science in Mathematics and Computer Science

- Cumulative GPA: 3.77, Dean's List with Distinction Fall 2021, Dean's List Spring 2022
- Relevant Coursework: Data Analysis, Machine Learning, Algorithms, Mathematical Finance

EXPERIENCE

Data Intelligence Analyst

Jun 2025 – Present

CTBC Bank USA

Los Angeles, CA

- Designed and built Snowflake data marts to support efficient querying and analytics, enabling faster insights and scalability across 10M+ records.
- Developed predictive models focused on deposit-side behavior, reducing churn rate by 15% and driving the reactivation of 1,000+ dormant accounts through targeted retention strategies.
- Optimized marketing campaigns, increasing cross-sell revenue by 25% and deposit revenue by 10%.
- Designed Power BI dashboards, improving reporting efficiency by 40% for 10+ stakeholders.

Algorithmic Trading Simulation

May 2024 – Aug 2024

Independent Project

Remote

- Developed 3+ trading strategies using technical indicators and ML models, simulating returns of 15–25%.
- Engineered time-series features and models, improving forecast accuracy by up to 25% against baseline strategies.
- Created interactive dashboards with Matplotlib and Pandas for backtest insights.
- Integrated OANDA broker APIs for real-time data retrieval and strategy simulation.

Research and Trading Intern

Jun 2023 – Aug 2023

JS Global Capital

Karachi, Pakistan

- Analyzed stock market data with Pandas/Excel to identify market trends and arbitrage opportunities.
- Built dashboards summarizing valuation metrics (P/E, ROI, ROE) to support buy/sell recommendations.
- Contributed to predictive analytics by quantifying risk and expected returns for 6 high-potential equities.
- Presented data-driven reports to senior analysts, enhancing investment decisions.

PROJECTS

Airbnb Price Prediction

Nov 2023 – Dec 2023

Duke University

Durham, NC

- Built regression models on Airbnb data, achieving 0.55 predictive accuracy with Random Forests.
- Performed feature engineering, one-hot encoding, and missing value imputation using Pandas/Scikit-learn.
- Produced visualizations (boxplots, heatmaps) to identify key pricing drivers.

Mini Amazon Full-Stack Application

Sep 2024 – Dec 2024

Personal Project

Durham, NC

- Developed backend of an e-commerce app simulating Amazon's workflows (auth, cart, orders).
- Implemented Flask with SQL for dynamic data storage and advanced query handling.
- Tested end-to-end functionality from login to checkout with mock transaction data.

INTERESTS

- Fantasy Soccer (Top 0.5%), Chess (97th Percentile)
